political issues; Drug use/misuse research: methodologies, models and strategies; Ideological considerations; Social pharmacology; Internal and external environment of drug use/misuse; Substance use; Leisure and chemical coping; Chemical control and human and societal functioning; Cultural aspects of chemical coping: literature, art, mass media. Further information may be obtained from the Organizing Secretariat, Drugs and Alcohol Congress, P.O. Box 394, Tel-Aviv, Israel.

ERRATUM

In 'Psychiatric screening on a neurological ward' by J. Raymond DePaulo *et al.* the final paragraph of p. 127, column 1, should read:

Twenty-one of the 42 patients in the cerebral group

had cognitive impairment detected by the MMS; in contrast, none of the 26 patients in the peripheral group did so. The range of scores in the peripheral group was from 24 to 30; and the cerebral . . .
