

## **Fundamentals of Biochemical Pharmacology**

*Edited by Z. M. Bacq*

Covers the metabolism of drugs and their mode of action at the biochemical/biophysical level. About half the book is devoted to describing experimental technique, the remainder to current knowledge, each chapter being contributed by an expert in that field.

*644 pages £10.00 hard cover*

## **Human Anti-Human Gammaglobulins**

**Their Specificity and Function**

*Edited by R. Grubb and G. Samuelsson*

This, the first volume dealing specifically and extensively with human anti-human gammaglobulins, contains edited discussions and 28 papers by international authorities. Provides invaluable information for readers at the professional and investigative level.

*256 pages £6.00 hard cover*

## **Human Afflictions and Chromosomal Aberrations**

*R. Turpin and J. Lejeune*

Deals with human disorders which have been shown to be due to chromosomal aberrations. All modern work which is developing rapidly with the advent of new techniques is covered and these findings have opened up a hitherto closed chapter in human pathology and have encouraged the development of a new branch of medicine.

*406 pages £8.00 hard cover*

## **The Transmission of Schizophrenia**

*Edited by C. Rosenthal and S. S. Kety*

This volume contains the Proceedings of the Second Research Conference of the Foundations' Fund for Research in Psychiatry and the twenty-eight contributors represent leaders in the field throughout the world. The book concentrates upon data and evidence rather than theory, and constitutes a definitive summary of current knowledge and the data upon which it is based.

*448 pages £6.30 hard cover*

## **Serendipity in St Helena**

**A Genetical and Medical Study of an isolated community**

*I. Shine*

"This charming and extremely readable book combines in its 200 pages a vivid personal account of a unique community."

*British Medical Journal*

*212 pages £3.75 hard cover*

G 101

**Pergamon**

# Mendelian Inheritance in Man

**Catalogs of Autosomal Dominant,  
Autosomal Recessive, and X-linked  
Phenotypes**

**Third Edition**

*Victor A. McKusick* Dr. McKusick's highly praised encyclopedia of genetic disorders and Mendelian traits in man has now been updated and considerably enlarged. Latest computer techniques were used in assembling and revising this ever-growing body of information. A *Science* review of the first edition stated, "This book should be in the library of all biologists, medical or other, who are interested in genetics."

\$17.50

**Man, Mind, and Heredity** Selected Papers of Eliot Slater on Psychiatry and Genetics Edited by *James Shields and Irving I. Gottesman* \$15.00

**Epidermolysis Bullosa** A Clinical, Genetic, and Epidemiological Study *Tobias Gedde-Dahl, Jr.* \$20.00

**Development of the Genital System and Male Pseudohermaphroditism** *Jan E. Jirásek* Edited by *M. Michael Cohen, Jr.* \$12.00

**Progress in Human Behavior Genetics** Recent Reports on Genetic Syndromes, Twin Studies, and Statistical Advances Edited by *Steven G. Vandenberg* \$12.50

**Haldane and Modern Biology** Edited by *K. R. Dronmraju* \$10.95

**Proceedings of the Third International Congress of Human Genetics** Edited by *James F. Crow and James V. Neel* \$16.50

# CONTENTS

## No. 1 (August 1971)

MCNEW, RONALD W. and BELL, A. E. The nature of the purebred-crossbred genetic covariance	page 7
HEDGES, R. W. Transduction mechanisms of bacteriophage $\epsilon^{15}$ . I. General properties of the system	9
HEDGES, R. W. Transduction mechanisms of bacteriophage $\epsilon^{15}$ . II. Isolation of a bacteriophage related to $\epsilon^{15}$	21
HEDGES, R. W. Transduction mechanisms of bacteriophage $\epsilon^{15}$ . III. A new class of mutations affecting the conversion of <i>Salmonella anatum</i> by bacteriophage $\epsilon^{15}$	29
POURQUIÉ, J. and HESLOT, H. Utilization and interconversions of purine derivatives in the fission yeast <i>Schizosaccharomyces pombe</i>	33
OISHI, KUGAO. Spirochaete-mediated abnormal sex-ratio (SR) condition in <i>Drosophila</i> : A second virus associated with spirochaetes and its use in the study of the SR condition	45
MITRA, R. and BHATIA, C. R. Isoenzymes and polyploidy. I. Qualitative and quantitative isoenzyme studies in the Triticinae	57
JOHNSON, D. R. Genes and genotypes affecting embryonic fluid relations in the mouse	71
MARUYAMA, TAKEO. An invariant property of a structured population	81
PUTRAMENT, ALEKSANDRA. Recombination and chromosome structure in eukaryotes	85
SVED, J. A. An estimate of heterosis in <i>Drosophila melanogaster</i>	97
STARLING, DAVID and RANDALL, SIR JOHN. The flagella of temporary dikaryons of <i>Chlamydomonas reinhardtii</i>	107
GRIMES, GARY W. and PREER, JOHN, R. JR. Further observations on the correlation between kappa and phage-like particles in paramecium	115
VYSE, E. R. and SANG, J. H. A purine and pyrimidine requiring mutant of <i>Drosophila melanogaster</i>	117

## No. 2 (October 1971)

KIMURA, MOTOO and MARUYAMA, TAKEO. Pattern of neutral polymorphism in a geographically structured population	125
SERMONTI, G., PUGLIA, A. MARIA and FICARRA, GIUSEPPINA. The time course of recombinant production in <i>Streptomyces coelicolor</i>	133
THORNTON, R. J. and JOHNSTON, J. R. Rates of spontaneous mitotic recombination in <i>Saccharomyces Cerevisiae</i>	147

NORTH, JANE and LEWIS, D. Phosphatases of <i>Coprinus lagopus</i> : the conditions for their production and the genetics of the alkaline phosphatase	page 153
UPSHALL, A. Phenotypic specificity of aneuploid states in <i>Aspergillus nidulans</i>	167
PINNEY, R. J. and SMITH, J. T. R-Factor elimination by thymine starvation	173
JOHNSTON, J. R. Genetic analysis of spontaneous half-sectoring colonies of <i>Saccharomyces cerevisiae</i>	179
DUNN, N. W. and HOLLOWAY, B. W. Pleiotropy of <i>p</i> -fluorophenylalanine-resistant and antibiotic hypersensitive mutants of <i>Pseudomonas aeruginosa</i>	185
PASZEWSKI, A., PRAŽMO, W. and JASZCZUK, E. Multiple recombinational events within the 84W locus of <i>Ascobolus immersus</i>	199
SEARLE, A. G., FORD, C. E. and BEECHEY, C. V. Meiotic disjunction in mouse translocations and the determination of centromere position	215
GALE, MICHAEL D. and FLAVELL, RICHARD B. The genetic control of anthocyanin biosynthesis by homoeologous chromosomes in wheat	237

### No. 3 (December 1971)

LATTER, B. D. H. Quantitative genetic analysis in <i>Phalaris tuberosa</i> . III. Maternal effects on seedling growth and development	245
LAMB, B. C. Some details and effects of the premeiotic controls of recombination frequencies in <i>Neurospora crassa</i>	255
SHARAT CHANDRA, H. Inactivation of whole chromosomes in mammals and coccids: some comparisons	265
OHTA, TOMOKO. Associative overdominance caused by linked detrimental mutations	277
FOSTER, T. J. and HOWE, T. G. B. Recombination and complementation between R factors in <i>Escherichia coli</i> K 12	287
DAY, A. W. and JONES, J. K. <i>p</i> -Fluorophenylalanine-induced mitotic haploidization in <i>Ustilago violacea</i>	299
WALL, A. M., RILEY, RALPH and CHAPMAN, VICTOR. Wheat mutants permitting homoeologous meiotic chromosome pairing	311
WALL, A. M., RILEY, RALPH and GALE, M. D. The position of a locus on chromosome 5B of <i>Triticum aestivum</i> affecting homoeologous meiotic pairing	329
MOORE, DAVID and STEWART, GEORGE R. Mutants of <i>Coprinus lagopus</i> selected for resistance to 2-Deoxy-D-glucose	341
HEDGES, R. W. A simple technique for the identification of chain termination suppressor mutants in species of <i>Salmonella</i>	353
