
The journals of the British Ecological Society

Journal of Ecology

Edited by **B. Moss, J.A. Lee and J. White**

The Journal of Ecology is one of the world's oldest and most respected publications in the science. The objects of the journal are: (1) to foster and promote the study of vegetation and ecology, especially in the British Isles; (2) to afford an outlet for original work on these subjects; (3) as far as possible to present a record of the commentary on the progress of these studies throughout the world. The journal includes the series Biological Flora of the British Isles, which appear in most issues of the journal but are also available as separate offprints on standing order.

Journal of Animal Ecology

Edited by **L.R. Taylor and J.M. Elliott**

This leading international journal publishes papers on original research in all branches of animal ecology. A balance is sought between aquatic and terrestrial environments, between invertebrates and vertebrates, and between theoretical, experimental and analytical approaches to soundly-based field data. Occasional purely descriptive, theoretical or review papers may be published at the discretion of the editors on animals or concepts of special interest or as part of an extensive development of a subject or as an adjunct to a long-term project.

Journal of Applied Ecology

Edited by **W.C. Block and J. Miles**

The journal publishes the results of original research in which ecological ideas and methods are applied to the study, conservation, management, control, development and use of natural resources in the widest sense. The editors select for publication only material of the highest scientific standards and this policy has attracted contributions by the world's leading authorities.

Subscription Information

The **Journal of Ecology** is published quarterly and the **Journal of Animal Ecology** and **Journal of Applied Ecology** are published three times a year. The subscription rates for 1987 are, for each one: £77.00 (UK), £92.50 (overseas), US\$152.50 (USA, Canada & Japan) post free. Subscriptions and free specimen copies are available from:

Blackwell Scientific Publications Ltd, P.O. Box 88, Oxford, England.

Journal of the Marine Biological Association, 67, 4 (i)

New titles in Marine Biology and Fishery Science

Cephalopod Life Cycles

Volume 2

Edited by P.R. Boyle

University of Aberdeen, Scotland

This volume, together with Volume 1, presents the only cohesive study of the subject in the English language, bringing together much unpublished data as well as published material from very diverse sources.

£78.00 (UK and Europe only)/\$140.00,

ISBN: 0-12-123002-3, 464 pages, 1986

Set price £66.50 (UK and Europe only)/\$119.00

Set price is valid only with the purchase of the complete set.

Advances in Marine Biology

Volume 23

Edited by J.H.S. Blaxter

*Dunstaffnage Marine Research
Laboratory, Scotland*

A.J. Southward

The Laboratory, Plymouth, England

From Reviews of Previous Volumes:

*"This latest volume of **Advances in Marine Biology** maintains the high standard of its predecessors and is recommended to all marine biologists."*

-SEARCH

CONTENTS: Population and Community Ecology of Seaweeds. Aspects of the Biology of Frontal Systems. The Ecology of Deep-Sea Hydrothermal Vent Communities. References. Index.

£42.00 (UK and Europe only)/\$76.00,

ISBN: 0-12-026123-5, 410 pages, 1986

The Biology of Fish Growth

Edited by

A.H. Weatherley

and H.S. Gill

University of Toronto, Ontario, Canada

Chapter 7 by

J.M. Casselman

*Ontario Ministry of Natural
Resources, Maple, Ontario, Canada*

This book presents a comprehensive, modern view of the phenomenon of growth plasticity in fish. The core chapters consider somatic growth in relation to nutritional and metabolic aspects, protein and lipid contents and interdependences, the dynamics of tissue growth, and hormonal dynamics of tissue growth, and hormonal influences. The remainder of the book discusses methods of age and growth determination, the consequences of plastic somatic growth on the dynamics natural and managed populations, and finally, attempts to relate how growth biology may be applied to aquaculture and fishery management.

CONTENTS: The Study of Fish Growth. Nutrition. Metabolism. Protein, Lipid and Caloric Contents. Tissues and Growth. Influence of Hormones. Determination of Age and Growth of Fish. Growth, Competition and the Niche Concept. Increase and Self-regulation of Fish Populations. Feeding Relations, Correlated Functional Morphology, Growth and Size. Production Dynamics of Fish. Fish Culture. Epilogue: Applications and the Future. References. Index.

£37.00 (UK and Europe only)/\$65.00,

ISBN: 0-12-739055-3, 446 pages, 1987

The Natural History of
**WHALES
&
DOLPHINS**

Peter G.H. Evans

Over the last decade there has been an enormous growth in studies of whales and dolphins, in all subject areas but particularly involving observations on behaviour and ecology of living cetaceans in the wild. This book provides an up-to-date review of recent advances in all these fields.

Although concentrating upon ecological and behavioural studies of wild cetaceans, the book also considers recent advances in our understanding of evolutionary history of the order Cetacea, past and present population sizes for commercially exploited species, the most up-to-date system of classification with key identification features for all species, zoogeography and distribution, breeding biology, diet and migration patterns, the history of whaling and conservation problems.

For anyone concerned with the conservation of whales and dolphins, this is an indispensable book!

£13.95 hbk 0-7470-0800-0 360 pages

Illustrated in colour and black and white

From bookshops, in case of difficulty send orders to Christopher Helm Ltd, FREEPOST, Bromley BR1 1XP (No stamp required in the UK).

Add £1.50 for p&p in the UK; £3.00 for p&p overseas.

THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

Professor T. H. Huxley took the chair at the initial meeting held in the rooms of the Royal Society and was elected the first President. Among those present were Sir John Lubbock (afterwards Lord Avebury), Sir Joseph Hooker, H. N. Moseley, Mr G. J. Romanes, and Sir E. Ray Lankester who, after Professor Huxley, was for many years president of the Association. It was decided to build a laboratory at Plymouth, where a rich and varied fauna is found.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up-to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium, modernized in 1959, opened to the public.

Since its foundation the Association has been supported by subscriptions and donations from private members, universities, learned societies, the Fishmongers' Company and other public bodies. For some time past, however, the main financial support for the work of the Plymouth Laboratory has come from Government funds, and since 1965 the Laboratory has been grant-aided through the Natural Environment Research Council.

The Marine Biological Association, under the direction of its Council, undertakes research in all branches of marine science and the main results are published in this journal. Accounts of the laboratory and aquarium are to be found in Vol. 27 (p. 761), Vol. 39 (p. 391) and Vol. 43 (p. 281), and summaries of the activities and research of the Association are given annually in the Report of the Council in the November issue of the Journal.

The laboratory is open throughout the year and its work is carried out by a fully qualified research staff under the supervision of the Director. The names of the members of the staff will be found on the inner page of the front cover. Accommodation is available for British and foreign scientific workers who wish to carry out independent research in all branches of marine science. Arrangements are made for courses for advanced students, and marine animals and plants are supplied to educational institutions.

Work at sea is undertaken by three research vessels and by a motor boat, and these also collect the specimens required in the laboratory.

TERMS OF MEMBERSHIP

	£
Annual Members, receiving the Journal per annum	15.00
Annual Members, without the Journal per annum	3.00
Founders	100.00
Governors	500.00

Annual subscriptions become due on 1 January.

Members of the Association have the following rights and privileges; they elect annually the Officers and Council; they are entitled to receive the Journal of the Association at a reduced rate; they are admitted to view the laboratory at Plymouth; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc.; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth during working hours.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscriptions paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill, Plymouth, PL1 2PB.

The *Journal of the Marine Biological Association* is published quarterly. The subscription price of volume 67, 1987, of the Journal to non-members of the Association is £115.00 net a volume of four parts, post free, or US \$250.00 in USA and Canada, payable in advance. Single parts cost £30.00 (US \$73.00 in USA and Canada) plus postage. Subscriptions may be sent to any bookseller or to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, or in USA and Canada, to Cambridge University Press, 32 East 57th Street, New York, 10022. Second class postage paid at New York, NY and at additional mailing offices. POSTMASTER: send address changes in the USA and Canada to *Journal of the Marine Biological Association*, Cambridge University Press, 32 East 57th Street, New York, NY 10022. All orders must be accompanied by payment.
