This series reports new developments in physical research and teaching – quickly, informally and at a high level. The type of material considered for publication includes:

1. Preliminary drafts of original papers and monographs
2. Lectures on a new field or presentations of new angles in a classical field
3. Seminar work-outs
4. Reports of meetings, provided they are
 - a) of exceptional interest and
 - b) devoted to a single topic.

The timeliness of a manuscript is more important than its form, which may be unfinished or tentative. Thus, in some instances, proofs may be merely outlined and results presented which have been or will later be published elsewhere. If possible, a subject index should be included. Publication of Lecture Notes is intended as a service to the international physical community, in that a commercial publisher, Springer-Verlag, can offer a wide distribution of documents which would otherwise have a restricted readership. Once published and copyrighted, they may be documented in the scientific literature.

Manuscripts

Manuscripts should be no less than 100 and preferably no more than 450 pages in length. If possible, a preliminary version should be submitted for evaluation by the editors.

Manuscripts are reproduced by a photographic process and therefore must be typed with extreme care. Detailed instructions for the preparation of manuscripts are provided by Springer-Verlag upon request. The typescript is reduced in size (75 % of the original). Therefore any writing within the figures should not be smaller than 2.5 mm. Best results will be obtained if the text is kept within the overall limit of 18 × 26.5 cm (7 × 10.5 inches) as outlined on the special paper which the publisher will supply upon request. Figures and line drawings should be submitted as originals or glossy prints; Xerox copies are not suited for reproduction.

Authors receive 50 free copies and are free to use the material in other publications. Manuscripts in English, German or French should be sent to one of the editors or directly to Springer-Verlag Heidelberg, Physics Editorial, Tiergartenstraße 17, 6900 Heidelberg.

Editors' addresses:

H. Araki, Research Institute for Mathematical Sciences, Kyoto University, Kitashirakawa, Sakyo-ku, Kyoto 606, Japan

J. Ehlers, MPI für Physik und Astrophysik, Institut für Astrophysik, Karl-Schwarzschild-Straße 1, D-8046 Garching

K. Hepp, Institut für Theoretische Physik, ETH, CH-8093 Zürich
