

Notes on
THE PREPARATION OF PAPERS
for publication in
The Journal of Hygiene
and in
Parasitology
By the late **G. H. F. NUTTALL**

Under the editorial guidance of the late Professor G. H. F. Nuttall, the *Journal of Hygiene* and *Parasitology*, both of which he founded, did a great deal to raise the standard of literary workmanship in scientific papers, and both were looked on as models, upon which the publications of several scientific societies were based. In his editorial work Professor Nuttall displayed the same thoroughness as in his research, and his belief that the functions of an editor do not stop at mere supervision led him to give much of his time and energy to the correction and improvement of papers and to helping young and inexperienced workers with the publication of their work. It was his intention to publish his conclusions in one of his journals, and with this object in view he collected, in the form of notes, a large amount of information about the composition, arrangement, illustration, and printing of scientific papers. These notes are now published in book form, selected and edited by G. S. Graham-Smith and D. Keilin, the present editors of the *Journal of Hygiene* and *Parasitology*.
