Musings

Gayle Salamon
Justification and Queer Method, or Leaving Philosophy

Notes on Contributors

Hypatia (Hy-pay-sha) was an Egyptian woman philosopher, mathematician, and astronomer who lived in Alexandria from her birth in about 370 A.D. until her death in 415. She was the leader of the Neoplatonic School in Alexandria and was famous as an eloquent and inspiring teacher. The journal *Hypatia* is named in honor of this foresister. Her name reminds us that although many of us are the first women philosophers in our schools, we are not, after all, the first in history.

Hypatia has its roots in the Society for Women in Philosophy, many of whose members have for years envisioned a regular publication devoted to feminist philosophy. *Hypatia* is the realization of that vision; it is intended to encourage and communicate many different kinds of feminist philosophy.
