

# Subject Index to Volume 41

## A

Acardius 27  
Adolescents 311  
Age, maternal 165, 205  
    size-for-gestational 123  
Aging, cognitive 187  
    physical 177  
Alcohol 311  
Analysis, confirmatory factor 287  
    cytogenetic 27  
Anomaly, congenital 253  
Aptitude-Treatment Interaction 335  
Asymmetry 325

## B

Behavior, child 53  
    problem 53  
Bicarbonate 137  
Birth defect monitoring 253  
Birth order 165  
Birth, multiple 253

## C

Child behavior 53  
Childhood, early 143  
Children, twin 53  
CNS damage 5  
Cognitive abilities 65  
Cognitive aging 187  
Communicative approach 335  
Confirmatory factor analysis 287  
Congenital anomaly 253

Congenital malformation 197  
Conjoined twins 197  
Cotwin control method 335  
Creativity 65  
Cytogenetic analysis 27

## D

Delivery  
    delayed 49  
    threatened premature 149  
Development 123  
    language 97  
    speech 97  
    locomotor 97  
    mental 97  
Difference between first- and second-born 137  
Differences, ethnic 73  
Discordant sex 301

## E

Early childhood 143  
Electroencephalogram (EEG) 325  
Embryo reduction 49  
Environment 177, 335  
    home 275  
    shared 261  
Environments 187  
EPH gestosis 149  
Epidemiology 205, 261  
    genetic 261  
Ethnic differences 73

## 370 Subject Index

### F

Familial aggregation 261  
Family 311  
Family interaction 143  
Fetal death 5

### G

Genetic correlation 287  
Genetic dominance 261  
Genetic epidemiology 261  
Genetic factors 177  
Genetic studies 91  
Genetics 311  
Growth, physical 155

### H

Heredity 275, 335  
Heredity-environment influences 155  
Heritability 261, 287  
Heteropaternal 43  
Home environment 275  
Hospital base 253

### I

Immature infants 149  
Induced ovulation 165  
Interaction, family 143  
    aptitude-treatment 335  
IUGR 149

### L

Language development 97  
Laterality 325  
Litter size 73  
Locomotor development 97  
Logistic regression 311  
Longevity 177

Low birth weight 97, 155

### M

Malformation, congenital 197  
Maternal age 165, 205  
Math performance 287  
Maximum likelihood 311  
Mental development 97  
Mirror-imaging 325  
Monozygotic twins 301  
Mother-twin relationships 143  
Multiple birth 253

### N

Nondisjunction 301

### O

Odds ratios 311  
Odor detection threshold test 113  
Olfactory sensitivity 113

### P

Parentage 43  
Parity 205  
pCO<sub>2</sub> 137  
Performance 97  
    math 287  
Perinatal mortality 197  
Permissive 275  
Personality 311  
PH 137  
Physical aging 177  
Physical growth 155  
pO<sub>2</sub> 137  
Popperian philosophy 261  
Pregnancy, twin 49, 149  
    triplet 27  
Premature and immature infants 149

Prematurity 97  
 Presentation at delivery 137  
 Problem behavior 53

R

Reading disability 287  
 Reproductive strategy 73  
 Restrictive 275  
 Risk Factors 187

S

Sampling 261  
 School achievement 275  
 Selection 73  
 Sex combination 33  
     discordant 301  
 Shared environment 261  
 Size-for-gestational-age 123  
     litter 73  
 Smoking 311  
 Speech development 97  
 Superfecundation 43

T

Temperament 123

Threatened premature delivery 149  
 Tocolysis 49  
 Twin bonding 143  
 Twin children 53  
 Twin pregnancy 49, 149  
 Twinning 1, 33, 73, 205  
 Twins 5, 65, 91, 97, 123, 155, 177, 187, 261,  
     287, 325  
     chinese 197  
     conjoined 197  
     monozygotic 301  
     puberty to mid-life 105

U

Umbilical cord gas value 137

V

Variable number of tandem repeats  
 (VNTR) markers 301

W

Weinberg's rule 33
