

## Index to Volume 9, 2007

<b>A</b>		<b>D</b>				<b>Q-R</b>	
Abdominal pain	114, 347	Database	267	Implementation	275	Quality improvement	118
Access and evaluation	286	<i>Datura stramonium</i>	467	Infestation	380	Radical head subluxation	333
Access to care	428	Delphi technique	339	Information technology	260	Radio-capitellar line	383
Acetaminophen	267	Diagnosis	87	Injury	9, 16	Radius	383
Acute pain	30	Disaster	171	Intensive care	38	Rapid sequence	
Adherence	435	Dislocated elbow	333	Intensive care admissions	34	intubation	101
Advance directives	250	Do-not-resuscitate orders	250	Jimson weed	467	Regression analysis	111
Adverse effects	459			<b>K-L</b>		Renal colic	463
Adverse outcomes	157	<b>E</b>		Ketorolac	30	Research ethics	118
Advocacy	282	ED length of stay	105	Kidney stone	463	Residency	449
AFA	21	Elderly	87	Knee, penetrating injury	46	Rheumatoid arthritis	40
Airbag injuries	470	Emergency	347	Leaking aortic		Right testicular pain	124
Alternative funding		Emergency department	79,	aneurysm	124	Rural	449
agreements	21	171, 297, 304,		Learning	93	Rural medicine	374
Ambulances	171	333, 378, 421, 428		Linear regression	111		
Aminophylline	26	Emergency medical		Logistic regression	111	<b>S</b>	
Analgesia	30, 114, 421	services	171, 250	Low-risk chest pain	435	Sedation	93
Angkor Hospital		Emergency medicine	38, 64,	<b>M</b>		Self-injurious behaviour	267
for Children	374	2	93, 171, 275,	Manpower	38	Sepsis	34
Antibiotics	441	86, 374, 441, 449		Medical emergency teams	34	Sharp objects	16
Anticholinergic poisoning	467	Emergency medicine		Medical therapy	463	Siem reap	374
Asthma	304, 353	ethics	118	Metaphyseal injuries	383	Significance	368
<b>B</b>		Emergency physician	121	Monomethylhydrazine	127	South Korea	171
Bado classification	383	Emergency physician		Monteggia	383	Stroke	368
Barriers	275	demographics	449	Monteggia combination		Survival	105
Blunt trauma	105	Emergency physician		injury	383	Syncope	157
Botfly	380	training	449	MRSA	300	<b>T</b>	
Bronchodilators	304	Endotracheal intubation	101	Mushroom poisoning	127	Technology	
Burnout	121	Epidemiology	267	Myiasis	380	implementation	260
<b>C</b>		Epiphysis	383	<b>N-O</b>		Tendinopathy	459
Cambodia	374	Etanercept	40	Neck injury	101	Trauma	16
Canada	300	Ethics	114, 250	Necrotizing pneumonia	300	Trauma centre	101
Cardiac arrest	26, 250	Exercise stress test	435	Non-OHIP dollars,		Trauma team leader	105
Cardiac tamponade	43	Expulsive therapy	463	fast-track	21	Treatment outcome	383
Cardiopulmonary		<b>F</b>		Nursemaid's elbow	333	Triage	260, 428
resuscitation	26	Facilitators	275	Nurse practitioner	275,	<b>U</b>	
Career satisfaction	121	False morel	127	286, 297		Ulna	383
Carotid artery bruit	368	Family physician	79	Overcrowding	339, 378, 428	Ultrasonography	131
Catheter, subclavian	43	Firearms	16	<b>P</b>		Ultrasound	131, 371
Central venous		Fluoroquinolones	459	Paracetamol	267	Ultrasound guided	371
catheterization	43, 131	Follow-up	79, 435	Paramedics	250	Ultrasound guidance	43
Chest x-ray	347	Forearm injury	383	Pediatrics	9, 93, 374, 459	Urinary tract infection	87
Child	383	Fracture	9	Penetrating wounds	101	Utility	368
Children	333, 347	Furuncular myiasis	380	Phantom	371	<b>V-Y</b>	
<i>Clostridium septicum</i>	133	<b>G-H</b>		Pneumonia	347	Vascular access	371
Community	449	Gas gangrene	133	Pneumonitis	470	Victim	164
Community-acquired		Guidelines	93, 353	Prediction rule	157	Violence	164
MRSA	300	Guidewire	131	Prehospital care	171, 250	Wait time	333
Compliance	435	Gyromitra esculenta	127	Prevention	164, 353	Wound infection	441
Computerized decision		Gyromitrin	127	Primary care provider	428	Youth	164
support	260	Health care quality	286	Procedural sedation	421		
Continuing education	93	Health services		Professional role	282		
Continuity of care	79	accessibility	339	Prophylaxis	441		
Corticosteroids	353	Holistic medicine	374	Propofol	421		
Critical care response		Human bites	441	Pulled elbow	333		
teams	34	<b>I-J</b>		Purulent pericarditis	40		
Crowding	339	Ibuprofen	30
