# Fetal and Maternal Medicine Review

## Editor-in-chief

Stephen Robson, Fetal Medicine Unit, Royal Victoria Infirmary, Newcastle upon Tyne, UK

*Fetal and Maternal Medicine Review* publishes high-quality reviews drawn from all relevant disciplines in this rapidly expanding field. Each issue includes a selection of clinical and research reviews from experts in the field. Rapid publication and a deliberate preference for authors currently active in research ensures this journal has immediate relevance to contemporary clinical practice. Subject areas covered include fetal medicine, maternal medicine, neonatology, obstetric anaesthesia, epidemiology and basic science. It is essential reading for all engaged in the care of pregnant women and neonates, including obstetricians and neonatologists, postgraduates training for specialist careers, specialist nursing and midwifery staff.

## Instructions for Contributors

*Zygote* is an international journal dedicated to the rapid publication of original research in early embryology. It covers interdisciplinary studies on gametogenesis through fertilization to gastrulation in animals and humans. The scope has been expanded to include clinical papers, molecular and developmental genetics. While the editors will favour work describing fundamental processes in the cellular and molecular mechanisms of animal development, and, in particular, the identification of unifying principles in biology, new technologies, review articles, debates and letters will become a prominent feature.

Subjects covered include gametogenesis, sperm–oocyte interaction, gamete and embryo physiology, cell polarity, cell–cell interactions, nuclear transfer, haploidization, molecular and developmental genetics, in-vitro fertilization, stem cell and cryoconservation technologies.

To submit a manuscript, please email a complete copy, including figures and illustrations to:

- Brian Dale, Editor-in-Chief, *Zygote*, Centre for Reproductive Biology, Italy.  
Email: [brian.dale@virgilio.it](mailto:brian.dale@virgilio.it) or to
- Jacques Cohen, North American Editor, *Zygote*, Tycho-Galileo Research Laboratories, 3 Regent Street, Suite 301, Livingston, NJ 07039, USA  
Email: [jc@embryos.net](mailto:jc@embryos.net) or to
- Professor Norio Suzuki, Asian Pacific Editor, *Zygote*, Department of Biological Science, Hokkaido University, Japan.  
Email: [medaka-s@kdp.biglobe.ne.jp](mailto:medaka-s@kdp.biglobe.ne.jp)

Submission of a paper will be taken to imply that it is unpublished and it is not being considered for publication elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

There is no formal restriction on length; however, original articles and reviews of less than 15000 words are likely to appear sooner than longer ones. Short communications should not exceed 1500 words and News and Views Commentaries 500 words.

### Preparation of manuscripts

Manuscripts should be organised as follows: Title page (with full names and addresses of all authors, a running headline of up to 35 characters, and a contact address with telephone number and email address), an Abstract

of not more than 250 words followed by 5 Keywords, Introduction, Materials and Methods, Results, Discussion (combined Results and Discussion may be used for short papers), Acknowledgements, References, Endnotes, Tables and Figure Legends.

Manuscripts should be prepared using SI units

### Figures

Figures should be numbered consecutively as they appear in the text. Any indication of features of special interest should also be included. Figures must be supplied electronically. They must be saved at final publication size and supplied in the following file formats: halftone figures (black & white, and colour) as TIF files at 300 dpi; black & white line figures as TIF or EPS files at 800 – 1200 dpi. When relevant, photographs should be submitted with proposed reduction or magnification indicated, when relevant, by a scale line on or beside, the illustration. The places for insertion into the text should be indicated in the text as 'Fig. 1' etc. Legends for all illustrations should be typed together, separately from the main text. A charge of £500 per figure will be made for colour photograph reproduction and printing.

### Tables

Tables with concise headings should be placed at the end of the paper. Each table must have a text reference, in the form 'Table 1' etc.

### References

References should be cited in the text as Conklin (1905) showed or as shown (Conklin, 1905). For papers with three or more authors use et al. A full list of references in alphabetical order should be given at the end of the text: surname of author and initials; year of publication (in parentheses); title of paper; journal or book name (the former being abbreviated in accordance with the World List of Scientific Periodicals); volume number; first and last page of the reference. For books and conference proceedings, place of publication and publisher (and editor(s) if appropriate) should be included.

### Proofs

Proofs will be sent to the author for checking. Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

### Offprints

A PDF offprint of each article will be supplied free to each first named author. Paper offprints may be purchased from the publisher if ordered at proof stage.

Printed in the United Kingdom at the University Press, Cambridge.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

# ZYGOTE

The Biology of Gametes and Early Embryos

## CONTENTS

### ORIGINAL ARTICLES

**Developmental competence of porcine oocytes after *in vitro* maturation and *in vitro* culture under different oxygen concentrations**

Kang, J.-T., Atikuzzaman, M., Kwon, D.-K., Park, S.-J., Kim, S.-J., Moon, J.-H., Koo, O.-J., Jang, G. & Lee, B.-C. 1

***In vitro* development of nuclear transfer embryos derived from porcine embryonic germ cells and their descendent neural precursor cells**

Shin, S., Ahn, K. S., Choi, S.-J., Heo, S. Y. & Shim, H. 9

**Cloning and sequence analysis of *Bufo arenarum* oviductin cDNA and detection of its orthologous gene expression in the mouse female reproductive tract**

Barrera, D., Valdecantos, P. A., Vanesa García, E. & Miceli, D. C. 17

**Effect of trichostatin A on fertilization and embryo development during extended culture of mouse oocyte**

Jee, B. C., Jo, J. W., Lee, J. R., Suh, C. S., Kim, S. H. & Moon, S. Y. 27

**Viability and apoptosis in spermatozoa of transgenic rabbits**

Chrenek, P., Makarevich, A. V. & Simon, M. 33

**Hormonal induction and semen characteristics of tambaqui *Colossoma macropomum***

Maria, A. N., Azevedo, H. C., Santos, J. P. & Carneiro, P. C. F. 39

**Equine bone marrow mesenchymal or amniotic epithelial stem cells as feeder in a model for the *in vitro* culture of bovine embryos**

Lange-Consiglio, A., Maggio, V., Pellegrino, L. & Cremonesi, F. 45

**LEFTY2 expression and localization in rat oviduct during early pregnancy**

Argañaraz, M. E., Apichela, S. A. & Miceli, D. C. 53

**Increased blastocyst formation of cloned porcine embryos produced with donor cells pre-treated with *Xenopus* egg extract and/or digitonin**

Liu, Y., Østrup, O., Li, J., Vajta, G., Lin, L., Kragh, P. M., Purup, S., Hyttel, P. & Callesen, H. 61

**Production of transgenic canine embryos using interspecies somatic cell nuclear transfer**

Hong, S. G., Oh, H. J., Park, J. E., Kim, M. J., Kim, G. A., Koo, O. J., Jang, G. & Lee, B. C. 67

**Leukemia inhibitory factor stimulates the transition of primordial to primary follicle and supports the goat primordial follicle viability *in vitro***

da Nóbrega Jr, J. E., Gonçalves, P. B. D., Chaves, R. N., de Melo Magalhães, D., Rossetto, R., Lima-Verde, I. B., Pereira, G. R., Campello, C. C., Figueiredo, J. R. & de Oliveira, J. F. C. 73

**Attempt at cloning high-quality goldfish breed 'Ranchu' by fin-cultured cell nuclear transplantation**

Tanaka, D., Takahashi, A., Takai, A., Ohta, H. & Ueno, K. 79

**Effect of age, GV transfer and modified nucleocytoplasmic ratio on PKC $\alpha$  in mouse oocytes and early embryos**

Cui, L.-B., Zhao, Z.-J., Zhou, X.-Y., Li, Q., Huang, X.-Y. & Sun, F.-Z. 87
