

STATGRAPHICS

Statistical Graphics System

Turns lifeless data ... into vital statistics

FEATURES

User friendly with simple menu driven procedures.

Import / Export facilities.

Data editing, selections and transformations.

Full range of statistical techniques including :-

Regression Analysis **Analysis of Variance**

Experimental Design **Sampling**

Time Series Procedures **Distribution Fitting**

Over 50 plots, both 2D and 3D, overlay, Multiple graphs etc.. All these features and many more are fully integrated in one system

To use STATGRAPHICS is to take a step towards fully understanding your data, and being able to present it clearly, as quickly and as efficiently as possible.

Agricultural users include The Freshwater Fisheries Lab (Department of Agriculture) who utilise STATGRAPHICS for analysing data on salmon population in relation to density growth. STATGRAPHICS can help you turn lifeless data into vital statistics

STATGRAPHICS runs on all IBM PC compatible hardware.

For further information contact
