### Prisoners of Shangri-La

*Tibetan Buddhism and the West*

DONALD S. LOPEZ, JR.

"[This] book furnishes a timely and courageous exploration of how we got caught up in what [Lopez] calls a 'lingua franca of the fantastic.' . . . The result is less a polemical corrective than a rumination—learned, discursive, and critical—on our ways of seeing Tibet. . . . [Lopez's] book will sharpen the terms of the debate over what the Tibetans and their observers can or should be doing about the place and the idea of Tibet. And that alone is what will give us all back our Shambhala." —Jonathan Spence, *Lingua Franca Book*

The book's masterful synthesis of academic studies of Japan in Western languages is helpful to Japan specialists. . . . *Japanese Civilization* will probably be of even greater value to those less familiar with Japan. . . . With the publication of this book, Japan can no longer be marginalized by the Western academic world." —*Journal of Interdisciplinary*

## NEW TITLES IN ASIAN STUDIES

### RECORDS OF WIND AND EARTH: A TRANSLATION OF Fudoki, with INTRODUCTION AND COMMENTARIES

by Michiko Y. Aoki

In A.D. 713, the Japanese central government ordered all provincial governors to compile surveys of their respective regions, including products, animals, plants, land conditions, etymologies of place names, legends, and oral traditions. The five extant "old" *fudoki* translated in *Records of Wind and Earth* are all that remain of these early reports. Three of these *fudoki* (Harima, Bungo, and Hizen) are being made available here for the first time in English. This collection contains invaluable records for any English-speaking person wishing to understand the early history of Japan—its land, its people, and its earliest literature.

### RIVER OF SORROW: ENVIRONMENT AND SOCIAL CONTROL IN RIPARIAN NORTH INDIA, 1770-1994

by CHRISTOPHER V. HILL

In this analysis of colonial attempts to control and manage the agrarian region surrounding the Kosi River, Hill argues that colonial ecological, political, and social policies were inextricably intertwined. The colonial administrators set about "improving" India's physical environment, just as they "improved" its social and political climate. In so doing, they were ill-prepared to understand, let alone administer, a river such as the Kosi—which traced a violent and erratic course out of the Himalayas, "carrying thousands of tons of silty sand and destroying everything in its path." The ecological paternalism imposed by the colonial governors introduced social and revenue policies that were to have a profound effect on the peasantry that continues to this day.

## Buddhist Fundamentalism and Minority Identities in Sri Lanka

Tessa J. Bartholomeusz and Chandra R. de Silva, editors

"This is a superlative collection of essays on an extremely important subject, one that will be of interest to readers from all sorts of disciplines: history, sociology, religious studies, and political science. The topic is significant from several perspectives: 1) it is arguably the single most important issue facing Sri Lanka today, and 2) it is the 'tip of the iceberg,' so to speak, of a phenomenon that is increasingly encountered both in the region and in the world at large, notably religio-ethnic communalism. ## Zen Buddhist Landscape Arts of Early Muromachi Japan (1336–1573)

Joseph D. Parker

"Parker challenges the entrenched views of Japanese scholars who dismiss the Zen monk artists and art critics of the period as spiritual degenerates who had succumbed to worldly enticements. His weaving together of the themes of illusion, playfulness, and non-dualism and his use of them to explicate the attitudes toward art evinced in the writings of medieval monks is original and provocative." — T.
