Expert Test Services for Diagnosis of Invasive Fungal Infection

Beacon Diagnostics™ Laboratory

Beacon Diagnostics Laboratory is a fully CLIA-certified reference laboratory specializing in (1,3)- β -D-glucan analysis as an aid to diagnosing Invasive Fungal Infections (IFI).

The Fungitell™ Assay

The Fungitell assay detects (1,3)- β -D-Glucan, a fungal cell wall component that is shed into the tissues and bloodstream of patients suffering from invasive fungal infection.^{1,2} Most medically important fungal pathogens contain (1,3)- β -D-Glucan and are thus detectable using the Fungitell assay.* Beacon Diagnostics Laboratory performs (1,3)- β -D-Glucan testing using the Fungitell assay.

Monitoring serum glucan for evidence of elevated and rising levels provides a convenient marker for IFI. Levels greater than or equal to 80 pg/mL, in at risk patients, are considered positive. Because a fungal infection is a dynamic process, repeat testing (typically 2-3 times per week) improves sensitivity.

*Fungi that do not synthesize (1,3)- β -D-Glucan, such as Zygomycetes, will not generate positive results with this assay.

Six Hour Persistence. Ninety Seconds to Apply.

3M Technology delivers immediate,
persistent antimicrobial activity
without water or scrubbing.

3M Infection Prevention Solutions. A Vital Step in Infection Prevention.

3M™ Avagard™ (Chlorhexidine Gluconate 1% Solution and Ethyl Alcohol 61% w/w) Surgical and Healthcare Personnel Hand Antiseptic with Moisturizers combines proven ingredients for effective, persistent antimicrobial activity with a unique emollient base clinically proven to reduce dryness and skin breakdown. **It's the only waterless, brushless hand antiseptic that is FDA-approved.*** For more information call the 3M Health Care Customer Helpline at 800-228-3957.

3M Medical
from the 3M Health Care family

*Unlike products rated FDA-compliant, Avagard surgical hand antiseptic has undergone FDA review and approval (NDA-21074 June 7, 2001). So you have the confidence of knowing that all studies, testing and clinical research have been scrutinized, along with product claims and application instructions.

NYU Medical Center

We advance medicine™

INFECTION CONTROL AND HOSPITAL EPIDEMIOLOGY

New York University Medical Center is seeking a Medical Director of Infection Control and Hospital Epidemiology. Responsibilities include leadership of hospital infection control and antibiotic management at NYU Hospitals Center, the university hospitals of the NYU School of Medicine. Additional responsibilities will include close interaction with the University Division of Infectious Diseases, including research in infection control and antibiotic management, teaching of fellows, residents, and students, and leadership of an extramurally-funded research program. An academic appointment in the Department of Medicine at the NYU School of Medicine commensurate with experience, together with start-up funds, will be included.

Requirements for the position include a New York State license, Board Certification in Infectious Diseases, formal training in epidemiology, and a minimum of 5 years experience in hospital epidemiology. Experience in leading a research program in infection control and/or antibiotic management would be a strong asset, as would experience in training and education of physician and non physician specialists.

The NYU Medical Center, located on the east side of Manhattan, is expanding its clinical and research programs, and offers outstanding opportunities for collaborative program development.

Interested applicants should send a curriculum vitae and a description of relevant experience and interests to: Dr. Joel Ernst (Director, Division of Infectious Diseases; joel.ernst@med.nyu.edu) and / or Dr. Max Cohen (Chief Medical Officer, NYU Hospitals Center; max.cohen@med.nyu.edu).

MICROBIOLOGIST

The American University of the Caribbean (AUC), a 25+ year old accredited medical school, with over 3000 graduate physicians is pleased to announce an opening for a Microbiologist, Ph.D. Rank is commensurate with experience.

We seek an individual with experience and expertise, who both enjoys and is dedicated to teaching. Applicants must have some documented teaching of infectious diseases. Individuals familiar with U.S. medical education, and evaluation systems are encouraged to apply. All lectures are in English, largely with powerpoint presentations. Teamwork is encouraged; the majority of the basic science faculty being drawn from North America and the EU, with clinical clerkships in the U.S., UK and Ireland.

AUC (www.aucmed.edu) is in a new, up to date facility on the delightful island of St. Maarten in the Netherlands Antilles, some 3 hrs. by air from Miami.

Interested parties should send their CV, and the names of three references, with coordinates, via e-mail to Kathleen Shupe, <kshupe97@earthlink.net>, Ph.D., Course Coordinator, Department of Microbiology.

The only
percutaneous device dressing
proven to reduce the incidence of
CRBSI and local infections¹

BIOPATCH Dressing is specifically designed to inhibit bacterial growth around all percutaneous devices, including catheters and orthopedic pins.

**Powerful protection...
Powerful proof.**

- BIOPATCH Dressing provides protection against a broad spectrum of bacteria including resistant strains MRSA and VRE, as well as *Candida albicans*.
- In a controlled, randomized trial, use of BIOPATCH Dressing resulted in a reduction in the incidence of CRBSI and local infections as compared with standard care.¹

BIO PATCH^{*}
ANTIMICROBIAL DRESSING
with Chlorhexidine Gluconate

B.E.S.T. Practice means BIOPATCH Every Single Time.[†]
