Do you get the oil other pilots leave behind?

On some small airfields, your aero-oil comes from drums or barrels.

If they've just opened a barrel, the oil will be as fresh and clean as it should be.

On the other hand, you might get the bottom of the barrel. Oil that's been standing around for months, exposed to air and possibly dirt.

So you take pot luck. Which means

that you also take a risk.

The alternative is to have perfectly clean oil every time: out of our quart cans. Which is as good as having a new barrel opened for you.

So next time your aircraft wants topping up, insist on our quart cans. This way you get the tops, not the leftovers. Safe, reliable aero-oils that won't do the dirty on you.

AeroShell W80 and W100. And BP Aero Oil 100.

Guaranteed clean.
