# OUTBREAK RESPONSE TOOL KITS

The SHEA/CDC Outbreak Response Training Program (ORTP) tool kits are your source for quick, concise information and resources to help you and your facility effectively manage outbreaks.

- Expert-selected checklists, flow charts, summaries, and diagrams
- Guidance in implementation and leadership during a crisis
- Downloadable and fillable tables to make sure you have the information you need
- Free access on mobile devices, desktops, and via the Guideline Central app
- And more...

View the tool kits online  
**ORTP.GuidelineCentral.com**

## CONTENTS

### Joint Statement

- 1398** Training infection prevention leaders for the present and future: United in patient safety  
*Keith S. Kaye and Janet Haas*

### Original Articles

- 1400** The positive effects of an antimicrobial stewardship program targeting outpatient hemodialysis facilities  
*Erika M. C. D'Agata, Curt C. Lindberg DMan, Claire M. Lindberg, Gemma Downham, Brandi Esposito, Douglas Shemin and Sophia Rosen*
- 1406** From ward to washer: The survival of *Clostridium difficile* spores on hospital bed sheets through a commercial UK NHS healthcare laundry process  
*Joanna Tarrant, Richard O. Jenkins and Katie T. Laird*
- 1412** Whole-genome sequencing for methicillin-resistant *Staphylococcus aureus* (MRSA) outbreak investigation in a neonatal intensive care unit  
*Theresa Madigan, Scott A. Cunningham, Robin Patel, Kerryl E. Greenwood-Quaintance, Jean E. Barth, Priya Sampathkumar, Nicolynn C. Cole, Peggy C. Kohner, Christopher E. Colby, Garth F. Asay, Jennifer L. Fang, Christine A. Baker, Angela L. Heinrich, Kelly A. Fjerstad, Maria J. Lujero, Nicholas Chia, Patricio R. Jeraldo, Heidi Nelson and W. Charles Huskins*
- 1419** Improvement of gram-negative susceptibility to fluoroquinolones after implementation of a pre-authorization policy for fluoroquinolone use: A decade-long experience  
*Rachael A. Lee, Morgan C. Scully, Bernard C. Camins, Russell L. Griffin, Danielle F. Kunz, Stephen A. Moser, Craig J. Hoesley, Todd P. McCarty and Peter G. Pappas*
- 1425** Transmission of resistant Gram-negative bacteria to healthcare personnel gowns and gloves during care of residents in community-based nursing facilities  
*Natalia Blanco, J. Kristie Johnson, John D. Sorkin, Alison D. Lydecker, Lauren Levy, Lona Mody and Mary-Claire Roghmann*
- 1431** Poor clinical outcomes associated with community-onset urinary tract infections due to extended-spectrum cephalosporin-resistant Enterobacteriaceae  
*Judith A. Anesi, Ebbing Lautenbach, Irving Nachamkin, Charles Garrigan, Warren B. Bilker, Jacqueline Omorogbe, Lois Dankwa, Mary K. Wheeler, Pam Tolomeo and Jennifer H. Han, for the CDC Prevention Epicenters Program*
- 1436** Reassessing the need for active surveillance of extended-spectrum beta-lactamase-producing Enterobacteriaceae in the neonatal intensive care population  
*Xiaoyan Song, Lamia Soghier, Tara Taylor Floyd, Tracie R. Harris, Billie L. Short and Roberta L. DeBiasi*

Image “John Snow memorial and pub,” copyright Justinc - made available under a Creative Commons Attribution-Share Alike 2.0 Generic license.**

- 1442** Interventions to reduce unnecessary central venous catheter use to prevent central-line-associated bloodstream infections in adults: A systematic review  
*Zhaoyu Xiong and Haiyan Chen*
- 1449** Interventions to improve healthcare workers' hand hygiene compliance: A systematic review of systematic reviews  
*Lesley Price, Jennifer MacDonald, Lucyna Gozdziewska, Tracey Howe, Paul Flowers, Lesley Shepherd, Yvonne Watt and Jacqui Reilly*

### Review

- 1457** Introduction to Machine Learning in Digital Healthcare Epidemiology  
*Jan A. Roth, Manuel Battegay, Fabrice Juchler, Julia E. Vogt and Andreas F. Widmer*

### Commentary

- 1463** Water as a source for colonization and infection with multidrugresistant pathogens: Focus on sinks  
*Sarah S. Lewis, Becky A. Smith, Emily E. Sickbert-Bennett and David J. Weber*

### Concise Communications

- 1467** A multicenter investigation to characterize the risk for pathogen transmission from healthcare facility sinks  
*Scott A. Gestrich, Annette L. Jencson, Jennifer L. Cadnum, Scott H. Livingston, Brigid M. Wilson and Curtis J. Donskey*
- 1470** Preventing hospital-acquired Legionnaires' disease: A snapshot of clinical practices and water management approaches in US acute-care hospitals  
*Karen M. Ehret, Allison T. Chamberlain, Ruth L. Berkelman and Scott K. Fridkin*
- 1473** Utilizing the electronic health record to construct antibiograms for previously healthy children with urinary tract infections  
*Yusuf Y. Chao, Larry K. Kociolek, Xiaotian T. Zheng, Tonya Scardina and Sameer J. Patel*
- 1476** Understanding changes in the standardized antimicrobial administration ratio for total antimicrobial use after implementation of prospective audit and feedback  
*Meghan E. Griebel, Brett Heintz, Bruce Alexander, Jason Egge, Michihiko Goto and Daniel J. Livorsi*
- 1480** Variability of surgical prophylaxis in penicillin-allergic children  
*David F. Butler, Brian R. Lee, Sarah Suppes, Tracy Sandritter, Jason G. Newland, Lory Harte and Jennifer L. Goldman*
- 1484** Immediate impact of healthcare-facility-onset *Clostridium difficile* laboratory-identified events reporting methodology change on standardized infection ratios  
*Carlos E. Figueroa Castro, Louis Palen, Carrie Johnson, Mary Beth Graham, David Letzer, Nathan Ledebuer, Blake Buchan, Timothy Block, Heather Seliger, Siddhartha Singh, Elizabeth Behrens, Susan Huerta and L. Silvia Munoz-Price*

- 1487** Epidemiology of *Staphylococcus aureus* infections in patients admitted to freestanding pediatric hospitals, 2009–2016  
*Alicen B. Spaulding, Cary Thurm, Joshua D. Courter, Ritu Banerjee, Jeffrey S. Gerber, Jason G. Newland, Sarah K. Parker, Thomas V. Brogan, Matthew P. Kronman, Samir S. Shah, Michael J. Smith, Sameer J. Patel, Brian R. Lee and Adam L. Hersh*
- 1491** How frequently are hospitalized patients colonized with carbapenem-resistant *Enterobacteriaceae* (CRE) already on contact precautions for other indications?  
*Katherine E. Goodman, Patricia J. Simner, Eili Y. Klein, Abida Q. Kazmi, Avinash Gadala, Clare Rock, Pranita D. Tamma, Sara E. Cosgrove, Lisa L. Maragakis, and Aaron M. Milstone for the CDC Prevention Epicenters Program and the CDC MIND-Healthcare Program*
- 1494** Culturing practices and the care of the urinary catheter in reducing NHSN-defined catheter-associated urinary tract infections: The tale of two teaching hospitals  
*Ana Cecilia Bardossy, Takiah Williams, Karen Jones, Susan Szpunar, Marcus Zervos, George Alangaden, Katherine Reyes and Mohamad G. Fakih*

### Research Brief

- 1497** Efficacy of automated disinfection with ozonated water in reducing sink drainage system colonization with *Pseudomonas* species and *Candida auris*  
*Scott Livingston, Jennifer L. Cadnum, Scott Gestrich, Annette L. Jencson and Curtis J. Donskey*

### Letters to the Editor

- 1499** The GAIN Act legislation to combat antimicrobial resistance: Where do we stand?  
*Maroun M. Sfeir*
- 1501** SCAN: A novel approach for vancomycin time-out  
*Kayihura Manigaba, Samuel J. Borgert, Kenneth P. Klinker, Kartikeya Cherabuddi and Veena Venugopalan*
- 1503** Implementation of a carbapenem prescribing algorithm at a community hospital  
*Stacy E. Shimata, Christine M. Antczak, Phillip S. Yu and Kavita K. Trivedi*

### Corrigenda

- 1505** Chlorhexidine-related ventilator-associated events: Toward recognition? — CORRIGENDUM
- 1506** Centers for medicare and medicaid services hospital-acquired conditions policy for central line-associated bloodstream infection (CLABSI) and catheter-associated urinary tract infection (CAUTI) shows minimal impact on hospital reimbursement — CORRIGENDUM
- 1507** Blood culture utilization at an academic hospital: Addressing a gap in benchmarking — CORRIGENDUM

# MICROBIAL SURVEILLANCE TESTING MADE EASY

*Healthmark offers the One-Two Punch to Identify and Document the Efficacy of Your Endoscope Reprocessing*

## SCREEN WITH THE NOW! TEST

*Rapid Indicator of Gram-Negative bacteria*

Immediate, practical screening test. Simply flush the lumen of a flexible endoscope, such as a duodenoscope, and follow the procedure for gram-negative bacteria detection in less than 12 hours.

**< 10 CFU**

 **healthmark**

## AUDIT WITH THE FLEXIBLE ENDOSCOPE SAMPLING KIT

*Surveillance tool for the random testing of duodenoscopes in compliance with CDC guidelines - In association with Nelson Laboratories*

A simple and complete kit. After flushing and brushing the lumen and elevator mechanism of a duodenoscope, simply follow the procedure to have the sample solution & brush heads quickly sent to Nelson Laboratories - the leader in independent testing of flexible endoscopes. All tools are included for testing and shipment.

## About the cover:

Since 2015, the cover format of each volume of *Infection Control & Hospital Epidemiology* has been designed to honor one of the many professionals throughout history who not only recognized how disease might be spread but also how to apply those principles to reduce healthcare-associated infections.

John Snow (1813–1858) was 1 of 9 children born to a working-class family in York, England. At the age of 14, he was apprenticed as a surgeon-apothecary with a family friend in Newcastle. He was sent to tend the afflicted in a nearby mining town during a cholera outbreak in 1832. He pursued his medical degree at the University of London, with the sponsorship of a wealthy uncle, and he initially set up a general practice in Soho. He gained fame as a practitioner of the new discipline of anesthesia and tended to Queen Victoria during the births of her children.

On August 24, 1854, a baby died of cholera on Broad Street near Soho. Shortly thereafter, 700 deaths from cholera occurred within a radius of 250 yards, and Snow happened to live nearby. As an anesthetist, he recognized how gases dissipated, and he rejected the prevailing dogma that cholera was spread through the inhalation of atmospheric vapors from decaying material because it would not explain how patients were affected miles away from the source. Snow hypothesized that water, contaminated with some cholera agent in feces, was the more likely explanation.

Using epidemiological principles, he identified who was affected using death certificates and where the illness was acquired (e.g., where case patients lived), then he determined what water supply they had used. He discovered that most households with a cholera case obtained water from the Broad Street pump. Snow ordered that the pump handle be removed. A local curate, Henry Whitehead, initially sought to disprove Snow's suspicions through further surveillance. Instead, Whitehead found that 8-fold more case patients had drunk from the pump than had not. Furthermore, he revealed that deaths occurred more often among residents who resided closest to the pump than in houses located farther away or that used a different water source. Ultimately, a leak between the Broad Street pump and a neighboring cesspool was discovered.

John Snow continued to carefully study the relationship between water contamination and cholera. Unfortunately, his work in epidemiology was ignored or pilloried in editorials in major journals. Snow would not live long enough to be recognized as a founder of modern epidemiology; he died of "apoplexy" or stroke at the age of 45 years. The John Snow Inn and a replica of the Broad Street pump can still be found in what is now called Broadwick Street in Soho, central London.

# Infectious Disease Physician Hospital Epidemiologist

The Division of Infectious Diseases at Mayo Clinic, Jacksonville, Florida invites applications for a position in clinical infectious disease and hospital epidemiology.

Mayo Clinic is seeking a board certified academic infectious disease physician who is trained in hospital epidemiology and infection prevention and control. Qualified candidates are required to have Infectious Diseases fellowship training and be Board Certified/ Board Eligible in Infectious Diseases.

Evidence of academic productivity and commitment to research and education in infectious disease and hospital epidemiology is expected. The position will include an academic appointment with the Mayo Clinic College of Medicine. The division supports an ACGME-accredited fellowship in general infectious diseases.

Our group practice focuses on providing high quality, compassionate medical care. We are the largest integrated, not-for-profit medical group practice in the world with approximately 3,800 physicians and scientists across all locations. This unique working environment brings together the best in patient care, groundbreaking research and innovative medical education. We offer a highly competitive compensation package, which includes exceptional benefits, and we have been recognized by *FORTUNE* magazine as one of the top 100 "Best Companies to Work For".

Please visit **[Mayocareers.com/ICHEHE](https://www.mayocareers.com/ICHEHE)** to apply online and learn more about Mayo Clinic and the vast array of opportunities that await you.

*Heal the sick,  
Advance the science,  
Share the knowledge.*

# Medicine

Books and Journals from  
Cambridge University Press

The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas with our great strength in the clinical brain sciences. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, anaesthesia and critical care, emergency medicine and pathology.

Our journals programme covers a broad spectrum of medical disciplines including emergency and disaster medicine, epidemiology and infectious diseases, biomedical science, genetics, nutrition, mental health and psychiatry, and neuroscience.

We partner with many learned societies including The Society for Healthcare Epidemiology of America, and the Neuroscience Education Institute, and the Royal College of Obstetricians and Gynaecologists.
