**Noise, noise sensitivity & psychiatric disorder: epidemiological & psychophysiological studies**  
*Stephen A. Stansfeld*

Is noise sensitivity a risk factor for psychiatric disorder? This monograph reports on two important studies of noise sensitivity: a 6-year follow-up study of a group of highly noise sensitive and low noise sensitive women, and a longitudinal study examining changes in noise sensitivity with recovery from depression.

**A diagnostic analysis of the casebooks of Ticehurst House Asylum, 1845-1890**  
*Trevor H. Turner*

The recent discovery of the casebooks of around 600 patients admitted to Ticehurst House, an expensive private asylum, in 1845-6 offered direct insights into Victorian psychological medicine. In addition Dr Turner is able to demonstrate that the core symptoms of manic depressive disorder and schizophrenia shown by patients in the 1980s were shared by their Victorian predecessors.

Titles should be typed above the table.
