

Marconi Marine sales and service throughout the world

No other organisation on earth can match Marconi's experience in marine electronics – from the birth of radio to the hunt for offshore minerals.

We have the widest range of equipment. We have total capability in marine communication, radar, echosounding, direction-finding and other navigational aids, shipborne sound and colour television systems.

We have more than 350 regional offices, bases and accredited agents throughout the world, providing expert installation service wherever you build and prompt maintenance wherever you sail.

And we provide total back-up from initial planning to on-going administration and the settlement of traffic accounts.

That's our business – exclusively. Call us for whatever you need.

THE INTERNATIONAL HYDROGRAPHIC REVIEW

Half-yearly, 160 pages (approx.) 18 × 27 cm. Price 65 French francs*
Yearly subscription 120 French francs*

Among the papers of interest in the January 1981 issue are:

- Selection criteria for shipboard automated systems
(C. G. WEEKS)
- Correlation of surface and underwater position fixing techniques
(P. H. MILNE)
- The Star/Planet Detector
(C. MOLARONI)

PUBLISHED BY THE
INTERNATIONAL HYDROGRAPHIC BUREAU
7, av. President J. F. Kennedy,
B.P. 345 – MC – MONACO

The Bureau also publishes monthly
**THE INTERNATIONAL
HYDROGRAPHIC BULLETIN**

A bilingual journal – English and French – giving news of hydrographic activities worldwide. Lists in detail charts published by Member States of the International Hydrographic Organization, and contains a selective bibliography of recent works in the fields of hydrography, descriptive oceanography, navigation, cartography, etc.

Approx. 30 pages, 21 × 30 cm, 8.50 French francs per copy*
Yearly subscription: 85 French francs*

* *Postage extra in all cases*

Enlist the Same Satnav Used by 26 Navies.

More than 20 navies and coast guards around the world use Magnavox 1100 series Satellite Navigators. On duty, day in and day out. In submarines, frigates, and coastal patrol boats. The models they use are off-the-shelf commercial production units. The same reliable, hardworking equipment you'd buy for your commercial fleet.

Those navies bought Magnavox for a very good reason. They know Magnavox is number one in satnav because we're number one where it really counts. In reliability.

Commercial Features, Military Quality.

Our satnavs are the top performers in the world market. And for good reason. We build them to commercial requirements with high quality components that also

meet the toughest military-grade specifications.

Unmatched Satnav Experience.

That practice has paid off. Since Magnavox pioneered microprocessor-based satnavs in 1976, we've sold more of them than anyone else. More than 4,000 are now in service.

In every type of vessel afloat. From pleasure yachts to supertankers. And the fleets of 26 navies. That's satnav experience no one can equal.

Rast Service Worldwide.

Magnavox reliability is backed by a multi-million-dollar spare parts inventory and the most extensive satnav service organization in the business, with Magnavox-trained technicians in more than 31 countries worldwide. To find out more about why 26 navies have chosen Magnavox, contact Marine Systems Operation, Magnavox Advanced Products and Systems Co., 2829 Maricopa St., Torrance, Calif., U.S.A. 90503. Tel. (213) 328-0770. Telex 696101. Cable MAGNAMAR.

THE ROYAL INSTITUTE OF NAVIGATION

THE OBJECT of the Institute is to unite in one body those who are concerned with or who are interested in the science and art of navigation. Membership is not restricted to those who hold professional qualifications, but is open to others who wish to further the aims of the Institute.

By coordinating the knowledge and achievements of marine and air navigators, scientists and those associated with the development and production of navigational equipment, the work of the Institute is directed towards raising the standard of navigation. In the field of education it is the aim of the Institute to bring practical navigators into contact with teachers and research workers to increase a common appreciation of the issues involved. It is an object of the Institute to encourage research in equipment and methods; through its publications it gives a wide circulation to original work on navigation so that new developments and suggestions can be appreciated by those most directly concerned with them.

The activities of the Institute include the holding of monthly meetings to discuss specific problems, the publication of a Journal and of other works concerned with different aspects of navigation, and such other activities as the Council may deem necessary to promote knowledge in navigation and its associated sciences.

The *Journal of Navigation* is issued free to all Members and contains a full account of the Institute's proceedings. It prints the papers which are presented at meetings, together with their ensuing discussion, and other original papers contributing to the science of navigation. It also contains record of current navigational work, reviews of important books, and general papers of interest to navigators and those with similar interests.

The work of the Institute is coordinated with that of similar societies abroad, whose proceedings are available to members.

Membership. There are five classes of membership of the Institute:

(1) HONORARY MEMBERS, who shall be distinguished persons upon whom the Council may see fit to confer an honorary distinction.

(2) FELLOWS, who shall be members, of at least three years' standing who, in the opinion of the Council, have made a contribution of value to navigation.

(3) MEMBERS, who shall be persons over twenty-one years of age who can satisfy the Council of their interest in navigation.

(4) STUDENT MEMBERS, who shall be persons under twenty-five years of age studying with a view to making navigation, or an allied interest, their career.

(5) CORPORATE MEMBERS, who shall be companies, universities, navigation schools, government departments and other organizations, here and abroad, who are directly or indirectly interested in the science of navigation. Corporate Members are entitled to send representative to all Institute meetings and to receive six copies of the *Journal*, and other publications. They are encouraged to take an active part in the Institute's work. Applications should be sent by letter addressed to the Director.

Subscriptions. Annual subscriptions to the Institute are payable in advance as follows:

Members and Fellows	£17.00
Student Members	£7.00
Corporate Members	£140.00

The Institute's financial year begins on 1 July. Members in any category who are elected after 1 January in any year are only due for one half of their subscription until 1 July, when the full subscription for the next year becomes due.
