## Epidemiology of Psychogenic Disorders

The Mannheim Study  
Results of a Field Survey in the Federal Republic of Germany

In cooperation with numerous experts

Translated from the German by R. Mills

1987. 9 figures. XIV, 176 pages. Soft cover DM 58,-.  
ISBN 3-540-18027-3

This book presents for the first time the results of a ten-year research project on the epidemiology of psychogenic disorders (psychoneuroses, character neuroses and psychosomatic disorders). The study concentrates on the age group relevant for psychotherapeutic care: 25-50 year olds living in urban communities. The results show that 26% of the population suffers from these symptoms and would be cases for clinical treatment. Apart from differentiated descriptive epidemiological basic data, the study answers a number of analytical-epidemiological questions concerning, for instance, the influence of early origins, of life events and of symptom-triggering situations, and the relationship of morbidity data to behavioral variables. Dreams and the earliest childhood memories of "healthy" people are evaluated, and the course of the disease together with consequences for therapeutic care are empirically presented and discussed.

B. Gulnagh, University of Florida, Gainesville

## Catharsis and Cognition in Psychotherapy

1987. IX, 131 pages. Soft cover DM 49,50. ISBN 3-540-96530-0

M. C. Angermeyer, Hamburg, FRG (Ed.)

## From Social Class to Social Stress

New Developments in Psychiatric Epidemiology

1987. Approx. 330 pages. Hard cover DM 128,-.  
ISBN 3-540-18042-7

This volume presents the latest developments in psychiatric epidemiology in the light of new investigations. Descriptive epidemiological studies on the relationship between social class and psychiatric disorder form the point of departure. Subsequently, various approaches in analytical epidemiological research are presented which attempt to determine to what extent social causation or social selection processes can be said to be responsible for the higher rates of psychiatric disorder in lower social strata. In the next section studies are reported which investigate the influence of social stress on the onset and course of various forms of psychiatric disorder. Social stress is conceived as stressful life events and as difficult life situations which are sustained over a long time (e.g. noisome occupational conditions, unemployment). Finally, the book presents the first attempts to link the concepts of social class and social stress.

N. Peseschkian, Wiesbaden

## Positive Psychotherapy

Theory and Practice of a New Method

1987. 33 figures. XVIII, 443 pages. Soft cover DM 48,-.  
ISBN 3-540-15794-8

A. Marneros, Bonn; M. T. Tsuang, Brockton (Eds.)

## Schizoaffective Psychoses

With contributions by J. Angst, P. Berner, G. Gross, G. Huber, R. Kendell, A. Marneros, H. Y. Meltzer, C. Perris, P. Pichot, E. Strömngren, M. A. Taylor, M. T. Tsuang, G. Winokur, E. Zerbini-Rudin and others

1986. 22 figures, 98 tables. IX, 325 pages.  
Hard cover DM 158,-. ISBN 3-540-16895-8

I. Hand, University of Hamburg; H.-U. Wittchen, University of Mannheim (Eds.)

## Panic and Phobias

Empirical Evidence of Theoretical Models and Longterm Effects of Behavioral Treatments

1986. 22 figures. XIII, 130 pages. Hard cover DM 58,-.  
ISBN 3-540-16513-4

H. Häfner, W.-F. Gattaz, Mannheim; W. Janzarik, Heidelberg (Eds.)

## Search for the Causes of Schizophrenia

1987. 35 figures, 57 tables. IX, 389 pages. Hard cover DM 128,-.  
ISBN 3-540-17376-5

R. J. Daly, Wilton, Cork, Ireland; E. A. Sand, Brussels (Eds.)

## Psychological Treatment of Mental Illness

Research Strategies and Design

In Collaboration with Other Members of the EMRC Study Group on Mental Illness Research

E. E. Anttinen, T. Heigason, H. Hippus and R. Sadoun

1987. 28 figures, 22 tables. XI, 155 pages. Hard cover DM 98,-.  
ISBN 3-540-17596-2

## NOTES FOR CONTRIBUTORS

**PAPERS** Papers for publication should be addressed to the Editor, Professor Michael Shepherd, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London SE5 8AF. Contributors should send at least three copies of the text, tables, and figures. Copies other than the first may be xeroxed. The S.I. system should be adopted for text and figures. A short synopsis of about 50 words should be provided at the beginning of each article. Foreign quotations and phrases should be followed by a translation. If necessary, guidelines for statistical presentation may be found in: Altman, D. G., Gore, S. M., Gardner, M. J. & Pocock, S. J. (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere.

In addition to longer articles, the Editor is prepared to accept preliminary and brief communications of between 1500 and 2500 words.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins throughout, including references. The following information must be given on a single separate sheet: (1) title and short title for running head (not more than 100 characters); (2) authors' names, and (3) department in which work was done. Footnotes on the same sheet should list: (i) the authors' present addresses if different from departments in which work was done; (ii) name and address of the author to whom correspondence should be addressed; (iii) receipt of grants. Authors who would like a reprint address to be printed should include this on their manuscript.

**REFERENCES** (1) In the text these should follow the Harvard system – that is, name followed by date: Brown (1970). If there are more than two authors the first author's name followed by *et al.* should be used, even the first time that the reference appears. (2) The list of references should be typed in alphabetical order on a separate sheet and should appear as follows: Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* **1**, 134–136. Journal titles should be given in full.

Books should be cited as follows: Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

Articles from edited books should be cited as follows: Brown, G. W. (1974). Meaning, measurement and stress of life events. In *Stressful Life Events: Their Nature and Effects* (ed. B. S. Dohrenwend and B. P. Dohrenwend), pp. 217–244. John Wiley: New York.

**ILLUSTRATIONS** Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. 70 mm). *Diagrams* These will usually be reduced to 70 mm wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

**PROOFS AND OFFPRINTS** Page proofs will be sent to the senior author. Corrections other than printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.
