

SUBSCRIPTION RATES

Subscription rates (post free) for Volume 35 (2003) of *Advances in Applied Probability* are as follows:

US\$223.00; \$A413.00; £145.50 for libraries and institutions;
US\$74.25; \$A137.75; £48.50 for individuals belonging to a recognised scientific society.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

NOTES FOR CONTRIBUTORS

Contributors in *Advances* may be of six kinds:

(1) *review papers*; (2) *longer research papers* in applied probability, which may include expository material; (3) *expository papers* on branches of mathematics of interests to probabilists; (4) *papers outlining areas in the biological, physical, social and technological sciences* in which probability models can usefully be developed; (5) *papers in applied probability* presented at conferences which do not publish their proceedings; (6) *letters to the editor* on any appropriate topic in applied probability. In addition, the SGSA section includes contributions relating to stochastic geometry and statistical applications. Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to be published in that journal.

Shorter research papers and *short communications* are published in the *Journal of Applied Probability*. The editors may publish accepted papers in either journal, however, according to the space available, in order to meet publication deadlines.

Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purposes of computerised information retrieval; (3) primary and secondary classifications according to the 2000 Mathematics Subject Classification.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.appliedprobability.org> or on PC-compatible disk from the Applied Probability Office. For instructions on how papers may be submitted electronically, please consult the notes for contributors at the above URL.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,
University of Sheffield, Sheffield S3 7RH, UK.**

COPYRIGHT

The copyright of all published papers is vested in the Trust. When a paper is accepted for publication, the Trust asks the author(s) to assign copyright to the Trust by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Centre (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus 0.20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA (<http://www.copyright.com>). 0001-8678/03 \$00.70 + 020.

Stochastic Geometry and Statistical Applications

- 847 BARTŁOMIEJ BŁASZCZYSZYN AND RENÉ SCHOTT. Approximate decomposition of some modulated-Poisson Voronoi tessellations
- 863 PIERRE CALKA. An explicit expression for the distribution of the number of sides of the typical Poisson-Voronoi cell
- 871 MARCO DALL'AGLIO AND MARCO SCARSINI. Zonoids, linear dependence, and size-biased distributions on the simplex
- 885 ALFRED KUME AND HUILING LE. On Fréchet means in simplex shape spaces
- 898 ILYA MOLCHANOV AND VADIM SCHERBAKOV. Coverage of the whole space
- 913 TOMASZ SCHREIBER. Asymptotic geometry of high-density smooth-grained Boolean models in bounded domains
- 937 SANDEEP R. SHAH. A note on stochastic domination and conditional thinning

General Applied Probability

- 941 DANIEL BEREND AND LUBA SAPIR. Between the expert and majority rules
- 961 ULRICH HORST. Stability of linear stochastic difference equations in strategically controlled random environments
- 982 V. ČEKANA VIČIUS. Infinitely divisible approximations for discrete nonlattice variables
- 1007 J.-P. RAOULT AND R. WORMS. Rate of convergence for the generalized Pareto approximation of the excesses
- 1028 JOHAN SEGERS. Functionals of clusters of extremes
- 1046 BERND HEIDERGOTT AND ARIE HORDIJK. Taylor series expansions for stationary Markov chains
- 1071 AMAURY LAMBERT. Coalescence times for the branching process
- 1090 HANS-OTTO GEORGII AND ELLEN BAAKE. Supercritical multitype branching processes: the ancestral types of typical individuals
- 1111 ANDREW G. HART, SERVET MARTÍNEZ AND JAIME SAN MARTÍN. The λ -classification of continuous-time birth-and-death processes
- 1131 ATTAHIRU SULE ALFA. Algorithmic analysis of the BMAP/D/k system in discrete time
- 1153 S. LEORATO, E. ORSINGHER AND M. SCAVINO. An alternating motion with stops and the related planar, cyclic motion with four directions
- 1169 Index (General Applied Probability)
- 1171 Index (Stochastic Geometry and Statistical Applications)
