

## NOTES FOR AUTHORS

The Supplement series of the Bulletin of Entomological Research is designed to publish large occasional research papers concerning mites, ticks or other arthropods of economic importance in agriculture, forestry, stored products, biological control, medicine, animal health and resource management. The geographical scope of the Bulletin is worldwide but with emphasis on the tropics. Taxonomic papers are accepted if relevant. The Supplement series is self supporting and each issue requires sponsorship. All manuscripts will be subjected to the usual refereeing policies of the Bulletin of Entomological Research.

The supplements will be issued free to subscribers of the Bulletin of Entomological Research and are for sale to non subscribers.

**Page Format.** The Supplement series is printed in a two-column format (column width of 80 mm) with a text area of 170×225 mm.

**Text.** Papers should be typed, on one side of the paper only, with double line spacing and ample margins (at least 1.5 cm) on each side and with no underlining or bold in text except for scientific names. Draft quality print from a word-processor is not acceptable. Standard abbreviations (e.g. fig. and figs) and metric units must be used. Guidelines for taxonomic papers are available.

When the paper has been accepted word-processed text stored on floppy disk should be submitted using software that is IBM/DOS compatible, however discs must be accompanied by a hard copy.

**Abstract.** Each paper must commence with a carefully prepared, accurate, informative abstract, that is complete in itself and intelligible without reference to text or figures. A short title should be provided as a running head.

**Tables.** Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must fit conveniently into single column, full width or landscape (if absolutely necessary) format. Table captions should be typed on a separate sheet.

**Illustrations.** Copies only of artwork should be submitted. The original illustrations should accompany the paper after acceptance and revision. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they are a real contribution to the text. Figure and

captions should be typed on a separate sheet in the following format:

Figs 23–26. Figs 23–24, Urophora eggs: 23, U. hispanica; 24, U. stigma. Figs 25–26, spermathecae: 25, U. maura; 26, U. stigma; scale lines=0.05 mm.

**Voucher specimens.** The deposition of voucher specimens should be considered where appropriate.

**References.** References must be based on the name and year system, give full journal titles and conform to the following styles:

- Powell, W. (1986) Enhancing parasitoid activity in crops. pp. 319–340 in Waage, J. & Greathead, D. (Eds) Insect parasitoids. London, Academic Press (Symposium, Royal Entomological Society of London No. 13).
- Southwood, T.R.E. (1978) Ecological methods with particular reference to the study of insect populations. 2nd edn. 524 pp. London, Chapman & Hall.
- Zhou, X., Carter, N. & Mumford, J. (1989) A simulation model describing the population dynamics and damage potential of the rose grain aphid, Metopolophium dirhodum (Walker) (Hemiptera: Aphididae), in the UK. Bulletin of Entomological Research **79**, 373–380.

Citation of authors in the text should appear in the form: Polaszek (1990) or (Polaszek, 1990). More than one author should be cited in chronological order as: (Holloway et al., 1987; Walker & Huddleston, 1988).

**Manuscripts.** Three copies of the manuscript and artwork should be submitted to:

**The Series Editor**  
**Bulletin of Entomological Research**  
**International Institute of Entomology**  
**56, Queen's Gate**  
**London**  
**SW7 5JR, UK.**

# BULLETIN *of* ENTOMOLOGICAL RESEARCH SUPPLEMENT SERIES

No.1

Management of pyrethroid and endosulfan resistance in *Helicoverpa armigera*  
(Lepidoptera: Noctuidae) in Australia

Neil W. Forrester, Matthew Cahill, Lisa J. Bird and Jacquelyn K. Layland

No.2

The *Bactrocera dorsalis* complex of fruit flies (Diptera: Tephritidae: Dacinae) in Asia

R.A.I Drew and D.L. Hancock

No.3

Muscid shoot-flies of the Philippine Islands (Diptera: Muscidae, genus *Atherigona*  
Rondani)

A.C. Pont and F.R. Magpayo
