John Tuomey O'Donnell + Tuomey, Ireland
Sarah Wigglesworth Sarah Wigglesworth Architects, UK
Jianfei Zhu The University of Melbourne, Australia

arq: Architectural Research Quarterly (issn 1359-1355) is published four times a year in March, June, September and December. Four parts form a volume. The subscription price which includes print and electronic access (but excluding vat) of volume 20 is £297.00 (US \$499.00 in USA, Canada and Mexico) for institutions; £53.00 (US \$81.00 in USA, Canada and Mexico) for individuals and £36.00 (US \$60.00 in USA, Canada and Mexico) for students, which includes print only, ordering direct from the publishers and certifying that the journal is for their personal use. Single parts are £78.00 net (US \$125.00 in USA, Canada and Mexico) plus postage. EU subscribers (outside the UK) who are not registered for vat should add vat at their country's rate. vat registered members should provide their vat registration number. Japanese prices for institutions (including ASP delivery) are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan. Orders which must be accompanied by payment, may be sent to a bookseller, subscription agent or direct to the publisher: Cambridge University Press, Journals Fulfillment Department, UPH, Shaftesbury Road, Cambridge CB2 8BS, UK; or in the USA, Canada and Mexico: Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Copies of the journal for subscribers in the USA, Canada and Mexico are sent by air to New York to arrive with minimum delay.

Copying

The journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA who are also registered with C.C.C may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. Copyright law) subject to payment to C.C.C. of the per-copy fee of \$16. This consent does not extend to multiple copying for promotional or commercial purposes. Code 1359-1355/2016/\$16.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or from the American Branch of Cambridge University Press.

Information on **arq: Architectural Research Quarterly** and all other Cambridge journals can be accessed via <http://www.journals.cambridge.org/>

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

 funded project
 'Computational
 Seeding of
 Bioreceptive
 Materials', Bartlett
 School of Architecture,
 UCL (2016).
 See pp.51–64.

leader	3	Biotechnology and the built environment
perspective	5	Building Science: Synthetic Biology and emerging technologies in architectural research Martyn Dade-Robertson
design	10	Cities as biological computers Claudia Pasquero and Marco Poletto propose a conceptual model and a bio-computational design method to articulate the world's Urbansphere, suggesting new terms for its co-evolution with the Biosphere.
	20	(Experimenting with) Living Architecture: a practice perspective Emma Flynn shows that as a tree responds to and moderates its surrounding environment, nature can become a key inspiration in developing mechanisms to reduce the impact of climate change and resource depletion.
theory	29	Design scrying: an alternative aesthetics for synthetic biology Rachel Armstrong investigates both 'design scrying' - the generation of images through interface distortions that occur at reflective surfaces and 'dark gels' - used as an image generating system for an alternative aesthetics of life.
	39	The unit of survival Andrew Ballantyne considers how, if we draw the boundaries of an entity in the wrong place then we can think it is doing well, when it is heading for disaster.
	45	Machines for living in: connections and contrasts between designed architecture and the development of living forms Jamie Davies reflects on how buildings are designed 'top-down' and use external expertise and repair, whereas natural bodies emerge from 'bottom-up' processes at a hierarchy of scales, and build and repair themselves by adaptive self-organisation.
materials	51	Bioreceptive design: a novel approach to bio-digital materiality Marcos Cruz and Richard Beckett explore the emergence of bioreceptive design, a new material phenomenon which is changing the environmental and biologically-integrated performativity of architecture.
practice	65	The laboratory life of a designer at the intersection with algal biotechnology Marin Sawa offers an empirical account of the scientific research laboratory as a place to work for a designer in biodesign practice.
	73	SolarLeaf: The world's first bioreactive façade Jan Wurm and Martin Pauli discuss the technology, first monitoring results and future potentials of the world's first bioreactive façade, SolarLeaf, which generates biomass and heat in a closed loop system.
arq review	81	Architecture's Pretexts: Spaces of Translation Reviewed by Joseph Clarke
insight	85	'Architecture and Macaroni': Digesting knowledge through ingesting food Lisa Hsieh
