

BULLETIN

ISSN 0004-9727

of the AUSTRALIAN MATHEMATICAL SOCIETY

Volume 34 Number 3

December 1986

The higher derivations of functions bounded in various senses by Shinji Yamashita	321
On the almost sure convergence of a general stochastic approximation procedure by S. N. Evans and N. C. Weber	335
Kleene algebras are almost universal by M. E. Adams and H. A. Priestley	343
Erdos-Turan mean convergence theorem for Lagrange interpolation at Lobatto points by William E. Smith	375
Proper embeddability of inverse semigroups by A. Shehadah	383
Some examples of compressible group algebras and of noncompressible group algebras by Kaoru Motose	389
Lie group valued integration in well-adapted toposes by Anders Kock	395
A theorem on commutativity of semi-prime rings by Murtaza A. Quadri and Mohd. Ashraf	411
A duality theorem for a multiple objective fractional optimization problem by T. Weir	415
Representing a distribution by stopping a Brownian Motion: Root's construction by Shey Shiung Sheu	427
On a maximal outer area problem for a class of meromorphic univalent functions by Stephen M. Zemyan	433
On variants of a semigroup by J. B. Hickey	447
A note on n-harmonic majorants by Hang Oh Kim and Chang Ock Lee	461
A characterization of the topological group of real numbers by Sidney A. Morris	473
ABSTRACTS OF AUSTRALIAN Ph.D. THESES	
The LQRE computational method in optimal control theory by Nikola B. Nedeljkovic	447
A system of nonlinear reaction diffusion equations by J. G. Burnell	479

The University of Queensland Press, St Lucia, Queensland, 4067, Australia

Printed in Australia by Watson Ferguson & Co.

Registered by Australia Post - Publication No. QBQ2945

BULLETIN OF THE AUSTRALIAN MATHEMATICAL SOCIETY

Editors: Sheila Oates-Williams Deputy Editor: H. B. Thompson
Honorary Editor: B. H. Neumann

Associate Editors

Robert S. Anderssen	B. J. Gardner	B. D. Jones	Ross Street
Alan L. Andrew	J. R. Giles	P. E. Kloeden	G. Szekeres
E. J. Billington	J. R. J. Groves	Rodney Nilsen	D. G. Tacon
B. D. Craven	J. A. Hempel	G. B. Preston	E. U. Tarafdar
Brian A. Davey	D. A. Holton	J. H. Rubinstein	Colin J. Thompson
P. Donovan	D. C. Hunt	Leon Simon	A. J. van der Poorten

N. C. Weber

Assistant Editors

K. G. Smith G. A. Chandler

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field.

As even minor revisions are generally not permitted, authors should read carefully all the details listed below and on the inside back cover.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,
Department of Mathematics, University of Queensland,
St. Lucia, Queensland, 4067, Australia

but should not send the original typescript of their papers, as material submitted to the BULLETIN will usually not be returned. Authors should note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification. (1985 Revision).

Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.

©Copyright Statement. Where necessary, permission to photocopy for internal or personal use or the internal or personal use of specific clients is granted by the Treasurer, Australian Mathematical Publishing Association, Inc., for libraries and other uses registered with the Copyright Clearance Center (CCC), provided that the base fee of \$A2.00 per copy of article is paid directly to CCC, 21 Congress Street, Salem, MA 01970, U.S.A. Special requests should be addressed to the Treasurer, Australian Mathematical Publishing Association, Inc., c/- Department of Mathematics, University of Queensland, St. Lucia, Qld., 4067, Australia. Serial-fee code: 0004-9727/86 \$A2.00 + 0.00

Contents

M. E. ADAMS and H. A. PRIESTLEY, Kleene algebras are almost universal	343
M. A. ARIÑO, Sequences and Bases in p -Banach spaces	87
MOHD. ASHRAF, <i>see</i> MURTAZA A. QUADRI	
C. BADEA, I. BADEA and H. H. GONSKA, A test function theorem and approximation by pseudopolynomials	53
I. BADEA, <i>see</i> C. BADEA	
THOMAS BIER, On the decomposition of integral lattices	73
J. G. BURNELL, A system of nonlinear reaction diffusion equations [A]	479
CHEW TUAN SENG, <i>see</i> LEE PENG YEE	
M. J. CURRAN and D. J. MCCAUGHAN, Central automorphisms of finite groups	191
W. DEEB, R. KHALIL and M. MARZUQ, Isometric multiplication of Hardy-Orlicz spaces	177
J. DEWYNNE, On an integral formulation for heat-diffusion moving boundary-problems [A]	153
P. M. EDWARDS, Eventually regular semigroups that are group-bound	127
S. N. EVANS and N. C. WEBER, On the almost sure convergence of a general stochastic approximation procedure	335
H. H. GONSKA, <i>see</i> C. BADEA	
M. R. GROSSINHO and L. SANCHEZ, A note on periodic solutions of some nonautonomous differential equations.	253
ISTVÁN GYÖRI, Oscillation conditions in scalar linear delay differential equations	1
J. B. HICKEY, On variants of a semigroup	447
YASUYUKI HIRANO and ISAO MOGAMI, On the additive groups of subdirectly irreducible rings	275
K. JANKOVÁ and J. SMÍTAL, A characterization of chaos	283
GUDRUN KALMBACH, The free orthomodular word problem is solvable	219
R. KHALIK, <i>see</i> W. DEEB	
HONG OH KIM and CHANG OCK LEE, A note on n -harmonic majorants	461
FAUD KITTANEH, On zero-trace commutators	119
P. E. KLOEDEN, Asymptotically stable attracting sets in the Navier-Stokes equations	37
ANDERS KOCK, Lie group valued integration in well-adapted toposes	395
VINOD KUMAR and S. L. SHUKLA, On an integral operator for convex univalent functions	211
CHANG OCK LEE, <i>see</i> HANG OH KIM	
LEE PENG YEE and CHEW TUAN SENG, On convergence theorems for nonabsolute integrals	133
P. MARITZ, Almost Baire class one multi-functions	297
M. MARZUQ, <i>see</i> W. DEEB	
MAW-DING JEAN, Closed derivations on the unit square	93
D. J. MCCAUGHAN, <i>see</i> M. J. CURRAN	
C. A. MCGILCHRIST, Regression analysis of dependent error models	199
GHANSHYAM MEHTA, Existence of an order-preserving function on normally preordered spaces	141
J. H. MEYER, A nil-implies-nilpotent result in Artinian rings	267
ISAO MOGAMI, <i>see</i> YASUYUKI HIRANO	
SIDNEY A. MORRIS, A characterization of the topological group of real numbers	473
KAORU MOTOSE, Some examples of compressible group algebras and of noncompressible group algebras	389
ITZHAK NADA, On a centre-like subset of a ring without nil ideals	149
TAKAHIKO NAKAZI, Commutator of two projections in prediction theory	65
P. N. NATARAJAN, Characterization of a class of infinite matrices with applications	161
NICOLA B. NEDELJKOVIC, The LQRE computational method in optimal control theory [A]	477
P. J. POPE, Solvability of non self-adjoint and higher order differential equations with jumping nonlinearities [A]	157
H. A. PRIESTLEY, <i>see</i> M. E. ADAMS	
MURTAZA A. QUADRI and MOHD. ASHRAF, A theorem on commutativity of semi-prime rings	411
MICHAEL JOHN REEDER, Models of frontogenesis [A]	319

P. F. RENAUD, A reversed Hardy inequality	225
W. RICKER, Remarks on completeness in spaces of linear operators	25
L. SANCHEZ, <i>see</i> M. R. GROSSINHO	
D. N. SARKHEL, A wide Perron integral	233
T. G. SCHULTZ, On balanced one-sided ideals	79
A. SHEHADAH, Proper embeddability of inverse semigroups	383
SHEY SHIUNG SHEU, Representing a distribution by stopping a Brownian motion: Root's construction	427
S. L. SHUKLA, <i>see</i> VINOD KUMAR	
J. SMÍTAL, <i>see</i> K. JANKOVÁ	
WILLIAM E. SMITH, Erdős-Turán mean convergence theorem for Lagrange interpolation at Lobatto points	375
MARK SPIVACK, Contractive projections on Banach space	271
HISAO TOMINAGA, A commutativity theorem for semi-primitive rings	293
TZU-CHU LIN, Convex sets, fixed points, variational and minimax inequalities	107
C. L. WANGNEO, Polynomial rings over rings integral over their centres	11
N. C. WEBER, <i>see</i> S. N. EVANS	
T. WEIR, A duality theorem for a multiple objective fractional optimization problem	415
NICHOLAS C. WORMALD, On the frequency of 3-connected subgraphs of planar graphs	309
SHINJI YAMASHITA, The higher derivatives of functions bounded in various senses	321
STEPHEN M. ZEMAN, On a maximal outer area problem for a class of meromorphic univalent functions	433

*[A] Abstract of PhD thesis.
