

## Major Anniversaries in 2016

2016 will be a special year for those using powder diffraction instruments, analysis methods, and reference data. Three particularly noteworthy anniversaries in 2016 to reflect upon are:

- The 30th year for the journal *Powder Diffraction* journal (PDJ).
- The 75th year for the International Centre for Diffraction Data (ICDD).
- 65th Anniversary of the Denver X-ray Conference.
- The 100th year of the method known as powder X-ray diffraction (PXRD).

Look for more about each of these as the year progresses in multiple places including future editorials in *Powder Diffraction* journal (PDJ).
