

QUATERNARY RESEARCH

Quaternary Research is an international journal devoted to the advancement of the interdisciplinary understanding of the Quaternary Period. We aim to publish articles of broad interest with relevance to more than one discipline, and that constitute a significant new contribution to Quaternary science. The journal's scope is global, building on its nearly 50-year history in advancing the understanding of earth and human history through interdisciplinary study of the last 2.7 million years. Research areas include geoarcheology, geochemistry and geophysics, geochronology, geomorphology, glaciology, neotectonics, paleobotany and paleoecology, paleoclimatology, paleogeography, paleohydrology, paleontology, paleoceanography, paleopedology, Quaternary geology, volcanology and tephrochronology.

Submit manuscripts online at <http://editorialmanager.com/qr>. See instructions for submitting your manuscripts at <https://www.cambridge.org/core/journals/quaternary-research/information/guide-for-authors>.

Subscription Information: *Quaternary Research* published two volumes per year with three issues each. The journal is published on behalf of Quaternary Research Center by Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA. Annual subscription rates for Volumes 87 and 88 (2017): Institutional rate, print only: \$1,312.00 (£795.00 + VAT). Institutional rate, online only: \$1,287.00 (£780.00 + VAT). Institutional rate, print and online: \$1,365.00 (£827.00 + VAT). For subscriptions, renewals, and address changes, please visit <https://www.cambridge.org/core/journals/quaternary-research/subscribe>. Email subscriptions_newyork@cambridge.org if you are in the Americas or journals@cambridge.org for the rest of the world.

CONTENTS

- 191–207 Monazite chemical weathering, rare earth element behavior, and paleoglaciohydrology since the last glacial maximum for the Loch Vale watershed, Colorado, USA**
Jason R. Price, Joel Moore, and Dalton Kerans
- 208–226 Reconstruction of the hydrologic history of a shallow Patagonian steppe lake during the past 700 years, using chemical, geologic, and biological proxies**
Corina Coviaga, Andrea Rizzo, Patricia Pérez, Romina Daga, Daniel Poiré, Gabriela Cusminsky, and Sergio Ribeiro Guevara
- 227–245 Late Holocene hydroclimatic change at Cienega Amarilla, west-central New Mexico, USA**
Jill Onken, Susan J. Smith, Manuel R. Palacios-Fest, and Karen R. Adams
- 246–257 Coastal plain stratigraphy records tectonic, environmental, and human habitability changes related to sea-level drawdown, ‘Upolu, Sāmoa**
Hawnani H. Kane, Charles H. Fletcher, Ethan E. Cochran, Jerry X. Mitrovica, Shellie Habel, and Matthew Barbee
- 258–274 Variations in late Quaternary wind intensity from grain-size partitioning of loess deposits in the Nenana River Valley, Alaska**
Lyndsay M. DiPietro, Steven G. Driese, Tyler W. Nelson, and Jane L. Harvill
- 275–287 Pollen record of the centennial climate changes during 9–7 cal ka BP in the Changjiang (Yangtze) River Delta plain, China**
Bing Song, Zhen Li, Houyuan Lu, Limi Mao, Yoshiki Saito, Sangheon Yi, Jaesoo Lim, Zhen Li, Anqing Lu, Longbing Sha, Rui Zhou, Xinxin Zuo, and Vera Pospelova
- 288–297 Link between black carbon, fires, climate change, and human activity during the Holocene period shown in the loess-paleosol sequence from Henan, China**
Yan Mu, Xiaoguang Qin, Lei Zhang, and Bing Xu
- 298–313 Palaeoenvironmental dynamics and Palaeolithic occupation at Katoati, Thar Desert, India**
James Blinkhorn, Hema Achyuthan, Peter Ditchfield, and Michael Petraglia
- 314–330 Preliminary palaeoenvironmental analysis of permafrost deposits at Batagaika megaslump, Yana Uplands, northeast Siberia**
Julian B. Murton, Mary E. Edwards, Anatoly V. Lozhkin, Patricia M. Anderson, Grigoriy N. Savvinov, Nadezhda Bakulina, Olesya V. Bondarenko, Marina V. Cherepanova, Petr P. Danilov, Vasilij Boeskorov, Tomasz Goslar, Semyon Grigoriev, Stanislav V. Gubin, Julia A. Korzun, Alexei V. Lupachev, Alexei Tikhonov, Valeriya I. Tsygankova, Galina V. Vasilieva, and Oksana G. Zanina
- 331–346 Dissolution collapse of a growing diapir from radial, concentric, and salt-withdrawal faults overprinting in the Salinas de Oro salt diapir, northern Spain**
Jesús Guerrero
- 347–362 An intriguing middle-sized horse from Coste San Giacomo (Anagni Basin, central Italy)**
Maria Rita Palombo, Maria Teresa Alberdi, Luca Bellucci, and Raffaele Sardella
