CONTENTS

	PAGE
COMPLEX ROOTS OF A TRANSCENDENTAL EQUATION. H. GOLDENBERG, -	161
OBLIQUE PEDALS. E. H. NEVILLE, - - - - -	166
EULER'S EQUATION AND (p, r) COORDINATES. K. E. BULLEN, - - -	172
NOTES ON DIFFERENTIAL EQUATIONS. F. UNDERWOOD, - - - - -	175
UNITS AND DIMENSIONS. H. V. LOWRY, - - - - -	181
REAL PROJECTIVE GEOMETRY. E. J. F. PRIMROSE, - - - - -	185
MATHEMATICAL NOTES (2427-2451). W. R. ANDRESS; W. BARRETT; F. BOWMAN; G. W. CAUNT; V. G. CAVALLARO; A. R. CURTIS; C. E. EASTHOPE; C. GATTEGNO; R. L. GOODSTEIN; A. J. HOWIE; A. HURRELL; M. JACKSON; B. M. MCKENZIE; F. G. MAUNSELL; A. J. MOAKES; E. H. NEVILLE; H. PERFECT; G. S. SMITH; V. THÉBAULT; D. A. T. WALLACE; C. WALMSLEY; A. E. WILLIAMS AND B. W. CONNOLLY, - - - - -	190
REVIEWS. P. BERNAYS; B. C. BROOKES; E. D. CAMIER; H. M. COOK; J. L. B. COOPER; R. L. GOODSTEIN; W. V. D. HODGE; W. J. HODGETTS; L. J. MORDELL; HANNA NEUMANN; C. G. PARADINE; D. H. PARSONS; D. PEDOE; D. E. RUTHERFORD; F. SANDON; J. A. TODD; S. VAJDA; J. WILLIAMS; T. J. WILLMORE, - - - - -	215
GLEANINGS FAR AND NEAR (1781-1793), - - - - -	171
ANNUAL MEETING, 1955; BRANCH REPORT; NOTES; BOOKS RECEIVED, xiii-xvi	

Intending members of the Mathematical Association are requested to communicate with one of the Secretaries, F. W. Kellaway, Miss W. Cooke, 29 Gordon Square, London, W.C.1. The subscription to the Association is 21s. per annum, and is due on Jan. 1st. Each member receives a copy of "The Mathematical Gazette" and a copy of each new Report as it is issued.

Change of Address should be notified to the Membership Secretary, Mr. M. A. Porter, Gordon House, 29 Gordon Square, London, W.C.1. If Copies of the "Gazette" fail for lack of such notification to reach a member, duplicate copies can be supplied only at the published price. If change of address is the result of a change of appointment, the Membership Secretary will be glad to have notice of this.

Subscriptions should be paid to the Hon. Treasurer, Mathematical Association, Gordon House, 29 Gordon Square, London, W.C.1.

A CONCISE HISTORY OF MATHEMATICS

by D. J. STRUIK, *Professor of Mathematics, Massachusetts Institute of Technology.* Over 30 portraits. 14s. net

A history of mathematics from the earliest records to the beginning of the present century. The work of a number of important mathematicians is analysed in detail. Among the illustrations are portraits of many of these great figures.

"This is a profitable book, well balanced, omitting the ever repeated anecdotes, but giving a number of often neglected facts (as for example Fibonacci's proof that a certain cubic cannot be solved by quadratic radicals); it will be welcomed by teachers who are encouraged by modern examination syllabuses to teach some history of their subject."—*MATHEMATICAL GAZETTE*. "In short compass it is impossible to indicate how carefully and with what discrimination the author has surveyed this immense subject. His book will, perhaps, only be fully appreciated by a reader with a fair mathematical equipment, but as a contribution to the history of civilisation it should have a wider appeal."

TIMES LITERARY SUPPLEMENT.

MATHEMATICS IN ACTION

by O. G. SUTTON, C.B.E., D.Sc., F.R.S. 16s. net

This book, by the Director of the Meteorological Office and former Bashforth Professor of Mathematical Physics at the Royal Military College of Science, Shrivenham, gives an account of the contribution of mathematics to physical science. "The story which the author tells illumines the essential features of the scientific method—the search for basic principles hidden within experimental results, and the development of pathways from basic principles to new experiments and speculations. The writing is simple and elegant, and not without evidence of a dry humour; the author has a flair for simple exposition and has steered a masterly course between the Scylla of over-simplification and the Charybdis of over-elaboration. "Mathematics in Action" should be of considerable value to young mathematicians, physicists and engineers, in the upper forms of secondary schools, and also in technical colleges and universities. It should be an excellent source-book of ideas for teachers."—*NATURE*.
