What if one day next week you couldn't Walk?

Or maybe you couldn't speak clearly. Or your vision was blurred. That's what it's like to live with multiple sclerosis, an unpredictable disease of the central nervous system. Things you take for granted can become impossible and you don't know when or where or if it will strike again. But the research and services programs of the Multiple Sclerosis Society of Canada are providing some answers. With your help, we can connect with a cure.
