

**JOURNAL OF
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,
Silver Street, Cambridge, CB3 9EW England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,
Stanford University, Stanford, California 94305, U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy,
University of Manchester, Manchester M13 9PL, England*

PROF. W. B. THOMPSON

*Department of Physics,
University of California, La Jolla, California 92093, U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

© Cambridge University Press 1977

For permission to reproduce material from *Journal of Plasma Physics*, please apply to the London or New York office of the Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

JOURNAL OF PLASMA PHYSICS is published once every two months in February, April, June, August, October and December, by Cambridge University Press, P.O. Box 92, London NW12DB and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 17 and 18 (1977) is £30.00 net per volume (US \$75.00 in the U.S.A. and Canada) for institutions; £15.00 (US \$40.00) per volume for individuals. Single parts cost £12.00 net (US \$30.00 in the U.S.A. and Canada) plus postage.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

JOURNAL OF PLASMA PHYSICS

**VOLUME 17
1977**

**CAMBRIDGE UNIVERSITY PRESS
CAMBRIDGE · LONDON · NEW YORK**

CONTENTS OF VOLUME 17

PART 1 FEBRUARY 1977

- Modification of a turbulent spectrum through the injection of a monochromatic wave. Part 2. The dispersion relation. A. L. BRINCA *page 1*
- Study of longitudinal electron oscillations in a plasma with a cut off Maxwellian velocity distribution. J. G. TROTIGNON and M. R. FEIX 13
- Non-symmetric two-stream instability. S. CUPERMAN, L. GOMBEROFF, I. ROTH and W. BERNSTEIN 23
- Influence of a high frequency pump on trapped particle modes. A. K. SUNDARAM and A. SEN 41
- Nonlinear interaction between three ordinary electromagnetic modes. P. MUÑOZ and S. DAGACH 51
- A sufficient condition for instability of BGK type waves in both unmagnetized and magnetized plasmas. E. INFELD and G. ROWLANDS 57
- Precursor photo-ionization model for magnetically-driven transverse shock waves. B. P. LEONARD 69
- Statistical mechanics of a guiding centre plasma. J. H. WILLIAMSON 85
- Parametric excitation of magnetoacoustic waves by a pump magnetic field in a high- β plasma. N. F. CRAMER 93
- Low-frequency instabilities of a warm plasma in a magnetic field. Part 1. Instabilities driven by field-aligned currents. D. F. SMITH and J. V. HOLLWEG 105
- Electromagnetic ion-cyclotron wave growth rates and their variation with velocity distribution function shape. B. ABRAHAM-SHRAUNER and W. C. FELDMAN 123

PART 2 APRIL 1977

- Ion and electron heating in the earth's bow shock region. P. REVATHY and G. S. LAKHINA 133
- Finite geometry effect on the interaction of a hot beam with a plasma. M. M. SHOUCRI and R. R. J. GAGNE 139
- Alfvén waves in a stochastic magnetic field. M. L. MITTAL and Y. S. PRAHALAD 147
- On the theory of Langmuir solitons. J. GIBBONS, S. G. THORNHILL, M. J. WARDROP and D. TER HAAR 153

Electromagnetic radiation from line sources embedded in a moving bounded magnetoplasma sheath. P. K. MUKHERJEE	<i>page</i> 171
Stationary nonlinear interaction between high- and low-frequency waves and the generation of density cavities in a plasma. K. BAUMGÄRTEL and K. SAUER	185
Theoretical cross-spectrum of the microfield measured by two small dipoles in a warm isotropic plasma. R. POTTELETTE, C. CHAULIAGUET and L. R. O. STOREY	201
Finite amplitude $E \times B$ oscillations in bounded plasmas. ØIVIN HOLTER	233
Propagation of the higher-order Landau modes of electron plasma wave. S. IKEZAWA, Y. KAWAI, T. HARA, Y. NAKAMURA, T. ITOH and T. KAWABE	251
Generalized elliptic equilibria in the magnetohydrodynamic approximation. M. L. WOOLLEY	259
Ion dynamics in a perpendicular collisionless shock. D. SHERWELL and R. A. CAIRNS	265
Locally excited magnetohydrodynamic waves in a uniform cylindrical plasma waveguide. W. N-C. SY	281
Nonlinear, superluminous, periodic waves in a plasma with magnetic field. P. C. CLEMMOW	301
Magnetic dynamo action in two-dimensional turbulent magnetohydrodynamics. D. FYFE, G. JOYCE and D. MONTGOMERY	317

PART 3 JUNE 1977

Magnetic field-line reconnection by localized enhancement of resistivity. Part 1. Evolution in a compressible MDH fluid. M. UGAI and T. TSUDA	337
Higher harmonics of electron plasma waves. E. MÄRK and N. SATO	357
Dissipative, forced turbulence in two-dimensional magnetohydrodynamics. D. FYFE, D. MONTGOMERY and G. JOYCE	369
Beat frequency heating of a magnetized plasma by circularly polarized microwaves. J. E. WILLETT and R. ELLIALTIUGLU	399
Stability of cylindrical rotating plasmas to axisymmetric electrostatic perturbations. E. M. BARSTON	409
Shocks in an anisotropic plasma. P. D. HUDSON	419
Finite amplitude effects in the propagation and interaction of $m = 0$ torsional hydromagnetic waves. I. R. JONES and A. D. CHEETHAM	433
Cyclotron instabilities of a magnetized electron plasma with anisotropic temperatures. C. CHIUDERI, G. EINAUDI and R. GIACHETTI	453

The phase velocity, ray velocity and group velocity for a magneto-ionic medium. A. D. M. WALKER	<i>page</i> 467
Self-modulation of a non-linear ion wave packet. S. WATANABE	487
Electrostatic plasma turbulence. Part 2. The nonlinear dispersion relation and fluctuation theorem. H. C. BARR and T. J. M. BOYD	503
Approximate theory of large-amplitude wave propagation. H. KIM	519
The effect of high-frequency potential on the reflexion of p -polarized electromagnetic waves from the plasma layer. V. V. DOLGOPOLOV, R. N. EL-SHEREIF and A. M. HUSSEIN	537
Quasi-linear relaxation of runaway electrons in an HF heated tokamak plasma. R. KLÍMA and V. V. PARAIL	543
Time asymptotic statistics of the Vlasov equation. G. KNORR	553
AUTHOR INDEX, VOLUME 17	571

JOURNAL OF PLASMA PHYSICS

Volume 17 Part 3 June 1977

CONTENTS

- Magnetic field-line reconnection by localized enhancement of resistivity. Part 1. Evolution in a compressible MHD fluid
M. UGAI AND T. TSUDA *page* 337
- Higher harmonics of electron plasma waves
E. MÄRK AND N. SATO 357
- Dissipative, forced turbulence in two-dimensional magnetohydrodynamics.
D. FYFE, D. MONTGOMERY AND G. JOYCE 369
- Beat frequency heating of a magnetized plasma by circularly polarized microwaves
J. E. WILLETT AND R. ELLIALTIOGLU 399
- Stability of cylindrical rotating plasmas to axisymmetric electrostatic perturbations
E. M. BARSTON 409
- Shocks in an anisotropic plasma
P. D. HUDSON 419
- Finite amplitude effects in the propagation and interaction of $m=0$ torsional hydromagnetic waves
I. R. JONES AND A. D. CHEETHAM 433
- Cyclotron instabilities of a magnetized electron plasma with anisotropic temperatures
C. CHIUDERI, G. EINAUDI AND R. GIACHETTI 453
- The phase velocity, ray velocity and group velocity for a magneto-ionic medium
A. D. M. WALKER 467
- Self-modulation of a nonlinear ion wave packet
S. WATANABE 487
