Contents

Volume 13 Number 2

May 1996

Extragalactic

Preliminary radio continuum maps of three spiral galaxies	M. Mazzolini and R. Webster	107
The extragalactic flux of cosmic rays	R.W. Clay and A.G.K. Smith	121
The large-scale distribution of radio sources	M.J. Drinkwater and R.W. Schmidt	127

High-energy Astrophysics

Shock acceleration in hot spots	M.H. Pope, L. Ball and D.B. Melrose	132
Production of pairs by linear acceleration emission	D.B. Melrose	140
Langmuir wave emission by neutrinos in a medium	S.J. Hardy and D.B. Melrose	144

Galactic and Stellar

<i>Zeeman Doppler imaging of stars with the AAT</i>	B. Carter, S. Brown, J.-F. Donati, D. Rees and M. Semel	150
---	---	-----

Instruments, Techniques and Basic Measurements

Axel: A balloon-borne X-ray astronomy experiment	R.K. Sood, J. Panettieri, D. Grey, G. Woods, J. Hoffmann, R.K. Manchanda, R. Staubert, E. Kendziorra and G.K. Rochester	156
--	---	-----

Education in Astronomy

Research programs at the Carter Observatory: An overview	R.J. Dodd and W. Orchiston	162
Education and public astronomy programs at the Carter Observatory: An overview	W. Orchiston and R.J. Dodd	165
Sydney Observatory and astronomy teaching in the 90s	N. Lomb	173

Workshop on Millimetre-wave Astronomy

Abstracts	Edited by B. Koribalski	179
Short contributions	R. Norris, M.J. Drinkwater et al., J.M. Chapman, L. Staveley-Smith and M.G. Burton	182
Millimetre observations of protostellar disks	S.T. Maddison	190
Molecular clouds and millimetre astronomy	M.G. Burton	197
Chemical abundances and isotope ratios in molecular clouds	M.R. Hunt	202

Society Business

Council meetings and 29th AGM report		204
