K. Sornig, D. Tannen, J. Thomas, J. van der
Auwera, J. Wagner, Y. Wilks

Linguistic pragmatics has formulated a number of questions that are essential to our understanding of language as human being's main instrument of "natural" and "societal" interaction. By providing a possible theoretical foundation for the study of linguistic practice, linguistic pragmatics has helped to increase the knowledge of human interaction.

The **Journal of Pragmatics** attempts to bridge the gap between such fields as semiotics, sociolinguistics, psycholinguistics, computational linguistics (including the information sciences, artificial intelligence research, and the theory and practice of human-computer interaction (HCI), applied linguistics (including the theory and practice of language teaching and learning), psychiatry (including the study of schizophrenic speech), and psychoanalysis.

The **Journal** regularly publishes a special issue devoted to a single topic: on *Wording and Warding* (dealing with the pragmatics of therapeutic communication) in 1981; on *Problems of Artificial Intelligence and the Humanities* and on *Stories* in 1982; on *Conditionals* and the *Linguistic Problems of Literacy* in 1983; on *Speech Acts after Speech Act Theory* and on *Metapragmatics* in 1984; on *Shared Knowledge* and on *Pragmatic Aspects of Lexical Acquisition and Development* in 1985; *Particles* and on *Japanese Sociolinguistics* in 1986; on *Cognition* in 1988 and *Australian Contributions to Discourse Theory* in 1989.

Cognitive Neuropsychology

Editor: Max Coltheart, Macquarie University, Australia

Cognitive Neuropsychology promotes the study of cognitive processes from a neuropsychological perspective. It publishes papers in this rapidly growing area of research which involves the coalescence of interests of clinical neuropsychology and cognitive psychology.

Some Topics Covered in Recent Issues of the Journal

Dementia ● Cognitive Skills ● Unilateral Neglect ● Prosopagnosia ● Conduction Aphasia ● Pathological Development ● Visual Neglect ● Letter-by-Letter Reading

Special Issues

1988: The Cognitive Neuropsychology of Visual and Semantic Processing of Concepts, guest editors Remo Job and Giuseppe Sartori

1988: Methodological Problems in Cognitive Neuropsychology, guest editor A. Caramazza

1989: Connectionism, guest editor J. McClelland

1989: Classic Papers in Cognitive Neuropsychology, guest editor A. Ellis

Of interest to

clinical psychologists, cognitive psychologists, linguists, neurologists, neuropsychologists, physiotherapists, psychiatrists, psycholinguists and speech pathologists.

Reading and Writing: An Interdisciplinary Journal

Editor:

R. Malatesha Joshi, *Dept. of Reading, School of Education and Human Development, Fayetteville State University, NC, USA*

Reading and writing skills are fundamental to literacy. Consequently, the processes involved in reading and writing and the failure to acquire these skills, as well as the loss of once well-developed reading and writing abilities have been the targets of intense research activity involving professionals from a variety of disciplines, such as neuropsychology, cognitive psychology, psycholinguistics and education. The findings that have emanated from this research are most often written up in an jargon that is specific to the particular discipline involved, and are published in specialized journals. This generally leaves the expert in one area almost totally unaware of what may be taking place in any area other than his own.

Reading and Writing: An Interdisciplinary Journal cuts through this fog of jargon, breaking down the artificial boundaries between disciplines. The journal focuses on the interaction among various fields, such as linguistics, information processing, neuropsychology, cognitive psychology, speech and hearing science and education.

Reading and Writing publishes research articles, critical reviews, theoretical papers, case studies and book reviews. Special emphasis is given to articles that address models, diagnosis and remediation of reading, writing and spelling; orthography and its relation to reading and writing; computer literacy; cross cultural studies; and developmental and acquired disorders of reading and writing.

INSTRUCTIONS TO AUTHORS

The Editors of *Applied Psycholinguistics* are Catherine E. Snow, Harvard Graduate School of Education, and John L. Locke, Massachusetts General Hospital. Authors should submit their original manuscript plus three copies to:

Applied Psycholinguistics, Editorial Office
Harvard Graduate School of Education
Larsen Hall, 7th Floor
Cambridge, MA 02138

Submissions may be full length articles (original research, theoretical or methodological studies, issue-oriented literature reviews), short notes, or critical responses to articles previously published in *Applied Psycholinguistics*.

Spelling, capitalization, and punctuation should be consistent within each article and should follow the style recommended in the Third Edition of the *Publication Manual of the American Psychological Association*. A title should be given for each article. An *auxiliary short title* should be given for any article whose title exceeds 50 characters. The *author's name* should be given in the form preferred for publication; the *affiliation* should include the author's full mailing address and telephone number. An *abstract* should be prepared for each article (limited to 120 words). Author's personal note(s) appear in the *acknowledgment* section. *Notes* should be numbered consecutively throughout the text and typed together on a separate page following the acknowledgment section. *Tables and figures* should be numbered consecutively throughout the article and appear as a unit following the reference section. *Bibliographic citations in the text* must include the author's last name and the date of publication and may include page references. Complete bibliographic information for each citation must be included in the list of references. Examples of correct styling for bibliographic citations are: Brown (1973), Ingram (1976, 54–55), Smith and Miller (1966), (Smith & Miller, 1966), (Peterson, Danner, & Flavell, 1972), and subsequently (Peterson et al., 1972). If more than one, citations should be listed in alphabetical order. *References* should be cited in the text and should be typed in alphabetical order using the following style:

Brown, R. (1973). Schizophrenia, language and reality. *American Psychologist*, 28, 395–403.

Ingram, D. (1976). *Phonological disability in children*. New York: Elsevier.

Krashen, S. D. (1978). Individual variation in the use of the Monitor. In W. C. Ritchie (Ed.), *Second language acquisition research*. New York: Academic.

Smith, F., & Miller, G. A. (Eds.). (1966). *The genesis of language*. Cambridge, Mass.: MIT Press.

Titles of journals should *not* be abbreviated. Unpublished citations should be listed in the references.

Preparation of the manuscript

The entire manuscript, including notes and references, should be typed double-spaced on 8½ by 11 inch or A4 paper, with margins set to accommodate approximately 70 characters per line and 25 lines per page. Manuscript pages should be numbered consecutively. Each element of the article should begin on a new page and should be arranged as follows: title page (title, short title, author's full name, affiliation, and mailing address), abstract, text, appendices, acknowledgments, notes, references, tables and figures.

Each table and figure should be submitted on a separate page and should be titled. Figures should be ready for photographic reproduction; they cannot be redrawn by the publisher. Charts, graphs, or other artwork should be drawn in black ink on white paper to occupy a standard area of 8½ by 11 or 8½ by 5½ inches before reduction. Photographs should be glossy black-and-white prints; 8 by 10 inch enlargements are preferred. All labels and details on figures should be clearly printed and large enough to remain legible after a 50% reduction. It is recommended that labels be done in transfer type of a san-serif face such as Helvetica.

Copyediting and proofreading

The publisher reserves the right to copyedit and proofread all articles accepted for publication. The lead author will review the copyedited manuscript only if changes have been substantial. Page proof of an article will be sent to the lead author for correction of typographical errors only; authors must notify the editorial office of any changes within 48 hours or approval will be assumed.

The Third Edition of the *Publication Manual of the American Psychological Association* should be consulted for instructions on aspects of manuscript preparation and style not covered in these instructions. The Editor may find it necessary to return manuscripts for reworking and retyping that do not conform to requirements.

The lead author will receive 25 offprints of his or her article without charge; additional copies may be purchased if ordered at proof stage.

Submission of an article implies that it has not been published elsewhere. Authors are responsible for obtaining written permission to publish material (quotations, illustrations, etc.) for which they do not own the copyright. Contributors of accepted articles will be asked to assign their copyrights, on certain conditions, to Cambridge University Press.
