

INTERNATIONAL JOURNAL OF

MICROWAVE AND WIRELESS TECHNOLOGIES**Special Issue: MIKON 2018****Guest Editors: Konrad Jędrzejewski and Frank Weinmann****Special Issue: EuMW 2018 (Part II)****Guest Editors: Vicente E. Boria, Teresa Martín, Mateo Burgos****CONTENTS**

EDITORIAL

Recent challenges and advances in microwave and radar techniques – MIKON 2018 special issue
Konrad Jędrzejewski and Frank Weinmann 543

MIKON 2018

ISM 2.45 GHz band high-efficient 15 W GaN HEMT power amplifier: design validation
Marcin Góralczyk and Wojciech Wojtasiak 546

Impact evaluation of DC operating condition on DPD linearizability and power efficiency in GaN-based power amplifiers
Konrad Jędrzejewski, Dawid W. Rosolowski and Wojciech Wojtasiak 554

Modifications of active phased antenna arrays near-field diagnosis method based on compressive sensing
Grigory Kuznetsov, Vladimir Temchenko, Maxim Miloserdov and Dmitry Voskresenskiy 568

Toward 3D passive radar exploiting DVB-T2 transmitters of opportunity
Aleksy Barkhatov, Evgenii Vorobev, Vladimir Veremyev and Vladimir Kutuzov 577

On the efficient computation of range and Doppler data in noise radar
Christoph Wasserzier and Gaspare Galati 584

TDOA estimation using a pair of synchronized anchor nodes
Vitomir Djaja-Josko, Jerzy Kolakowski and Jozef Modelski 593

Verifying a concept of adaptive communication with LEO satellites using SDR-based simulations
S. Kozłowski, K. Kurek, J. Skarzyński, K. Szczygielska and M. Darmetko 602

EuMW 2018

Highly compact GaN-based all-digital transmitter chain including SPDT T/Rx switch for massive MIMO applications
Florian Hühn, Andreas Wentzel and Wolfgang Heinrich 609

Novel DC-biasing circuits with arbitrary harmonics-control capability for compact high-efficiency power amplifiers
Shinichi Tanaka, Tomoya Oda and Kento Saiki 618

Design and characterization of a 6–18 GHz GaN on SiC high-power amplifier MMIC for electronic warfare
Eduardo Oreja Gigorro, Emilio Delgado Pascual, Juan José Sánchez Martínez, María Luz Gil Heras, Virginia Bueno Fernández, Antonio Bódalo Márquez and Jesús Grajal 625

Design and modeling of an ultra-wideband low-noise distributed amplifier in InP DHBT technology
T. Shivan, E. Kaule, M. Hossain, R. Doerner, T. Johansen, D. Stoppel, S. Boppel, W. Heinrich, V. Krozer and M. Rudolph 635

Push-pull configuration of high-power MOSFETs for generation of nanosecond pulses for electropermeabilization of cells
I. W. Davies, C. Merla, A. Casciati, M. Tanori, A. Zambotti, M. Mancuso, J. Bishop, M. White, C. Palego and C. P. Hancock 645

Low loss, fully-printed, ferroelectric varactors for high-power impedance matching at low ISM band frequency
Daniel Kienemund, Nicole Bohn, Thomas Fink, Mike Abrecht, Walter Bigler, Joachim R. Binder, Rolf Jakoby and Holger Maune 658

Large-signal vector characterization of LDMOS devices for analysis and design of broadband Doherty high-power amplifiers
Alessandro Cidronali and Giovanni Colodi 666

A SiGe transceiver chipset for automotive radar applications using wideband modulation sequences
Jan Schoepfel, Simon Kueppers, Klaus Aufinger and Nils Pohl 676

Evaluation of a robust correlation-based true-speed-over-ground measurement system employing a FMCW radar
Torsten Reissland, Bjoern Lenhart, Johann Lichtblau, Michael Sporer, Robert Weigel and Alexander Koelpin 686

ANTENNA DESIGN, MODELLING AND MEASUREMENTS

Low profile dual band-stop super wideband printed monopole antenna with polarization diversity
Murli Manohar, Rakesh Singh Kshetrimayum and Anup Kumar Gogoi 694

A wideband, single layer reflectarray antenna with cross loop and square ring slot loaded patch elements
Veluchamy Lingasamy, Mohammed Gulam Nabi Alsat, Krishnasamy T. Selvan and Rajeev Jyoti 703

Compact planar ultra-wideband antenna with dual notched band for WiMAX and WLAN
A. K. M. Ariful H. Siddique, Rezaul Azim and Mohammad T. Islam 711

Low-profile, extremely wideband, dual-band-notched MIMO antenna for UWB applications
Ankan Bhattacharya, Bappaditya Roy, Rafael F. S. Caldeirinha and Anup K. Bhattacharjee 719

Circular polarization realization in array antennas by a modified sequential phase feeding mechanism of linearly polarized elements
A. Haghshenas, CH. Ghobadi, J. Nourinia, M. Majidzadeh and S. Mohammadi-Asl 729
