CAMBRIDGE JOURNALS

JFM ARCHIVE

Journal of Fluid Mechanics
Digital Archive
1956–1996

Vital research from the definitive source

The JFM Digital Archive contains every article from the first 40 years of the journal, scanned and digitised to the highest standards.

Please speak to your librarian about gaining access.

CAMBRIDGE JOURNALS

JFM FAST TRACK HAS EVOLVED

JFM RAPIDS

- Faster publication
- Greater visibility for papers
- Freely available to all for the first year

CAMBRIDGE JOURNALS

European Journal of Applied Mathematics

Co-Editors-in-Chief
S. D. Howison, *University of Oxford, UK*
A. A. Lacey, *DPMMS, Heriot-Watt University, UK*
M. J. Ward, *University of British Columbia, Canada*

Since 2008 *EJAM* surveys have been expanded to cover Applied and Industrial Mathematics. Coverage of the journal has been strengthened in probabilistic applications, while still focusing on those areas of applied mathematics inspired by real-world applications, and at the same time fostering the development of theoretical methods with a broad range of applicability. Survey papers contain reviews of emerging areas of mathematics, either in core areas or with relevance to users in industry and other disciplines. Research papers may be in any area of applied mathematics, with special emphasis on new mathematical ideas, relevant to modelling and analysis in modern science and technology, and the development of interesting mathematical methods of wide applicability.

CAMBRIDGE JOURNALS

Journal of Mechanics

Published on behalf of The Society of Theoretical and Applied Mechanics, R.O.C.

Ediror-in-Chief
K. C. Wu, National Taiwan University, Taiwan

The objective of the *Journal of Mechanics* is to provide an international forum to foster exchange of ideas among mechanics communities in different parts of world. The Journal publishes original research in all fields of theoretical and applied mechanics.

The *Journal of Mechanics* especially welcomes papers that are related to recent technological advances, such as micro/nanomechanics, medical and biological systems, and microscale heat transfer. The contributions, which may be analytical, experimental or numerical, should be of significance to the progress of mechanics. Papers which are merely illustrations of established principles and procedures will generally not be accepted. Reports that are of technical interest are published as Short articles. Review articles are published only by invitation.

CAMBRIDGE JOURNALS

Journal of Plasma Physics

Editors
Bill Dorland, University of Maryland Honors College, USA
Alex Schekochihin, University of Oxford, UK

With two new Editors and seven new Associate Editors joining the editorial team *Journal of Plasma Physics* aspires to be the intellectual home of those who think of plasma physics as a fundamental discipline. The journal will particularly focus on publishing research on laboratory plasmas, space physics and plasma astrophysics that takes advantage of the rapid ongoing progress in instrumentation and computing to advance fundamental understanding of multiscale plasma dynamics.

618 Controlled reattachment in separated flows: a variational approach to recirculation length reduction
E. Boujo & F. Gallaire

636 Natural convection with mixed insulating and conducting boundary conditions: low- and high-Rayleigh-number regimes
P. Ripesi, L. Biferale, M. Sbragaglia & A. Wirth

S 664 Steady-state resonance of multiple wave interactions in deep water
Z. Liu & S.-J. Liao

701 Spatially varying mixing of a passive scalar in a buoyancy-driven turbulent flow
D. D. J. A. van Sommeren, C. P. Caulfield & A. W. Woods

721 ERRATUM

JFM Rapids (online only)

R1 Capillary and viscous perturbations to Helmholtz flows
M. R. Moore, H. Ockendon, J. R. Ockendon & J. M. Oliver

R2 Ship waves in the presence of uniform vorticity
S. Å. Ellingsen

R3 An idealised assessment of Townsend's outer-layer similarity hypothesis for wall turbulence
D. Chung, J. P. Monty & A. Ooi

S indicates supplementary data or movies available online.

742 ISSN 0022-1120
Journal of Fluid Mechanics 10 March 2014

1 The surprising relevance of a continuum description to granular clusters
M. Y. Louge

5 Adding in-line motion and model-based optimization offers exceptional force control authority in flapping foils
J. S. Izraelevitz & M. S. Triantafyllou

35 Detrainment from a turbulent plume produced by a vertical line source of buoyancy in a confined,ventilated space
C. Gladstone & A. W. Woods

50 Stochastic dynamics of active swimmers in linear flows
M. Sandoval, N. K. Marath, G. Subramanian & E. Lauga

71 Wavepacket models for supersonic jet noise
A. Sinha, D. Rodríguez, G. A. Brès & T. Colonius

96 Erythrocyte responses in low-shear-rate flows: effects of non-biconcave stress-free state in the cytoskeleton
Z. Peng, A. Mashayekh & Q. Zhu

119 The turbulent/non-turbulent interface and entrainment in a boundary layer
K. Chauhan, J. Philip, C. M. de Silva, N. Hutchins & I. Marusic

152 Unsteady propulsion near a solid boundary
D. B. Quinn, K. W. Moored, P. A. Dewey & A. J. Smits

171 Velocity statistics in turbulent channel flow up to $Re_\tau = 4000$
M. Bernardini, S. Pirozzoli & P. Orlandi

S 192 Turbulent wake behind a curved circular cylinder
J. P. Gallardo, H. I. Andersson & B. Pettersen

230 A Kolmogorov-like exact relation for compressible polytropic turbulence
S. Banerjee & S. Galtier

243 Coins falling in water
L. Heisinger, P. Newton & E. Kanso

254 Transient growth in linearly stable Taylor–Couette flows
S. Maretzke, B. Hof & M. Avila

291 Velocity–vorticity correlation structure in turbulent channel flow
J. Chen, F. Hussain, J. Pei & Z.-S. She

308 An experimental study of the free evolution of rotating, nonlinear internal gravity waves in a two-layer stratified fluid
H. N. Ulloa, A. de la Fuente & Y. Niño

340 Maximum palinstrophy growth in 2D incompressible flows
D. Ayala & B. Protas

368 On multiphase turbulence models for collisional fluid–particle flows
R. O. Fox

425 Effect of a distant rigid wall on microstreaming generated by an acoustically driven gas bubble
A. A. Doinikov & A. Bouakaz

S 446 Effects of magnetic field on the turbulent wake of a cylinder in free-surface magnetohydrodynamic channel flow
J. R. Rhoads, E. M. Edlund & H. Ji

466 Effects of distributed pressure gradients on the pressure–strain correlations in a supersonic nozzle and diffuser
S. Ghosh & R. Friedrich

495 Forced spreading of films and droplets of colloidal suspensions
L. Espín & S. Kumar

520 Streak evolution in viscoelastic Couette flow
J. Page & T. A. Zaki

552 On the origin of the flip–flop instability of two side-by-side cylinder wakes
M. Carini, F. Giannetti & F. Auteri

577 Growth of multiparticle aggregates in sedimenting suspensions
A. Z. Zinchenko & R. H. Davis
