

**JOURNAL OF
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,
Silver Street, Cambridge, CB3 9EW England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,
Stanford University, Stanford, California 94305, U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy,
University of Manchester, Manchester M13 9PL, England*

PROF. W. B. THOMPSON

*Department of Physics,
University of California, La Jolla, California 92093, U.S.A.*

Authors wishing to have papers published in the **JOURNAL** should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the **JOURNAL** free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Plasma Physics*, please apply to the London or New York office of the Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

JOURNAL OF PLASMA PHYSICS is published once every two months in February, April, June, August, October and December, by Cambridge University Press, P.O. Box 92, London NW1 2DB and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 19 and 20 (1978) are £36.00 net per volume (US \$80.00 in the U.S.A. and Canada) for institutions; £18.00 (US \$40.00) per volume for individuals. Single parts cost £15.00 net (US \$33.50 in the U.S.A. and Canada) plus postage.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

CONTENTS TO VOLUME 19

PART 1 FEBRUARY 1978

Three component non-symmetric counter-streaming instabilities: longitudinal electron plasma modes. S. CUPERMAN, L. GOMBEROFF and I. ROTH	<i>page 1</i>
Improved measurement of the electron temperature of a low-density shock-heated argon plasma by means of microwaves. C. P. SCHNEIDER	15
The coherent wave-particle resonance perturbed by turbulence. A. L. BRINCA	43
Filamentation of a laser beam in a strongly ionized magnetoplasma. L. A. PITALE	55
Plasma heating by a relativistic electron beam with secondary instabilities. T. TAJIMA	63
Stability of aligned magnetoatmospheric flow. J. A. ADAM	77
Nonlinear decay of a propagating lower-hybrid wave in a plasma. P. K. SHUKLA and M. A. MAMEDOW	87
On the propagation of energetic ion beams through a fusion target chamber. S. JORNA and W. B. THOMPSON	97
Elementary derivation of the kinetic equation for the two-dimensional guiding centre plasma. M. MOND and G. KNORR	121
Self-similar solutions for Vlasov and water-bag models. J. R. BURGAN, J. GUTIERREZ, E. FIJALKOW, M. NAVET and M. R. FEIX	135
Kinetic theory of binary correlations in turbulent plasmas. J. H. MISGUICH and R. BALESU	147
Collisional absorption of two laser beams in plasma. M. MOHAN and R. ACHARYA	177
Stability of a stratified partially ionized plasma in a vertical magnetic field. S. L. MAHESHWARI and P. K. BHATIA	183

PART 2 APRIL 1978

Electrostatic instabilities in anti-loss-cone plasma. K. G. BHATIA and G. S. LAKHINA	193
On the emission of radiation from a localized current source in a magnetoplasma. M. J. GILES	201
Low frequency response of a resistive plasma to axially independent or axisymmetric perturbations. T. H. JENSEN and W. B. THOMPSON	227

Ion beam excitation of ion-cyclotron waves and ion heating in plasma with drifting ions. J. P. HAUCK, H. BÖHMER, N. RYNN and G. BENFORD	page 237
Ion beam excitation of ion-cyclotron waves and ion heating in plasmas with drifting electrons. J. P. HAUCK, H. BÖHMER, N. RYNN and G. BENFORD	253
Measurements of non-Maxwellian electron velocity distributions in a reflex discharge. C. R. PHIPPS, JR and D. BERSHADER	267
Excitation of lower hybrid waves by electron beams in finite geometry plasmas. Part 1. Body waves. M. M. SHOUCRI and R. R. J. GAGNÉ	281
Excitation of lower hybrid waves by electron beams in finite geometry plasmas. Part 2. Surface waves. R. R. J. GAGNÉ and M. M. SHOUCRI	295
Self-focusing of a laser pulse in a transient plasma. M. S. SODHA, D. P. TEWARI and L. A. PATEL	301
Stimulated Raman backscattering in a magnetized plasma. J. E. WILLETT and B. MARAGHECHI	313

PART 3 JUNE 1978

On the relation between phase path, group path and attenuation in a cold absorbing plasma. J. A. BENNETT and P. L. DYSON	325
Fine diagnostic of laser-created plasma by induced Compton scattering. CARLOS MONTES and JEAN PEYRAUD	349
Theory of a parametric instability excited by two pump waves. J. A. FEJER, B. L. CRAGIN and R. L. SHOWEN	355
The nonlinear behaviour of axisymmetric hydromagnetic waves in a partially ionized plasma. M. L. SAWLEY	363
Observation of nonlinear effects in the propagation of $m = 0$ torsional hydromagnetic waves. M. H. BRENNAN, A. D. CHEETHAM, I. R. JONES and M. L. SAWLEY	375
Profile modifications at critical density of laser-produced plasmas. P. K. SHUKLA and K. H. SPATSCHEK	387
Nonlinear interaction between longitudinal waves in a magnetized plasma. A. A. SELIM	405
On the evolution and enhanced relaxation of a homogeneous isotropic two-dimensional plasma in a uniform magnetic field. M. J. HAGGERTY	411
A note on the modulational instability of long Alfvén waves parallel to the magnetic field. EINAR MJØLHUS	437

Three-component non-symmetric counter-streaming instabilities: oblique propagation case. S. CUPERMAN, L. GOMBEROFF and I. ROTH	<i>page</i> 449
Temperature effects in non-symmetric three-component counter-streaming electron plasmas: theory and computer simulation experiments. S. CUPERMAN, M. MOND, I. ROTH and L. GOMBEROFF	461
AUTHOR INDEX, VOLUME 19	475

JOURNAL OF PLASMA PHYSICS

Volume 19 Part 3 June 1978

CONTENTS

- On the relation between phase path, group path and attenuation
in a cold absorbing plasma
J. A. BENNETT and P. L. DYSON *page* 325
- Fine diagnostic of laser-created plasmas by induced Compton
scattering
CARLOS MONTES and JEAN PEYRAUD 349
- Theory of a parametric instability excited by two pump waves
J. A. FEJER, B. L. CRAGIN and R. L. SHOWEN 355
- The nonlinear behaviour of axisymmetric hydromagnetic waves in
a partially ionized plasma
M. L. SAWLEY 363
- Observation of nonlinear effects in the propagation of $m = 0$
torsional hydromagnetic waves
M. H. BRENNAN, A. D. CHEETHAM, I. R. JONES and
M. L. SAWLEY 375
- Profile modifications at critical density of laser-produced
plasmas
P. K. SHUKLA and K. H. SPATSCHEK 387
- Nonlinear interaction between longitudinal waves in a magnetized
plasma
A. A. SELIM 405
- On the evolution and enhanced relaxation of a homogeneous
isotropic two-dimensional plasma in a uniform magnetic field
M. J. HAGGERTY 411
- A note on the modulational instability of long Alfvén waves
parallel to the magnetic field
EINAR MJØLHUS 437
