

## New Microscopy Bulletin Board

Nestor Zaluzec and colleagues at Argonne National Laboratory have inaugurated a new Microscopy ListServer/MailReflector System as a centralized Internet address to facilitate rapid exchange of scientific and technical information on all phases of modern microscopy. This new Microscopy Server supplements ANLEMC (Argonne National Laboratory EM Center) eMail communications and the widely-used EMMPDL (Microscopy and Analysis Public Domain Library). This new system is not to be confused with the Microscopy Society of America's electronic bulletin board.

The Microscopy Server went on-line on October 1, 1993 with about 200 "subscribers" gleaned from the world wide ANLEMC eMail address file. The overseas response has been enthusiastic and impressive. To date the format has been largely a question and answer dialog on equipment and software purchases, technique troubles and references on many of the most important aspects of microscopy. The microscopy server topics have included scanning probe microscopies, SEM, HVEM, HREM, analytical microscopy and even positron annihilation. Most of the material has been of some to major interest to this reader but it does fill up your in-basket with 10-15 messages a day. In the future, the system will allow subscribers to restrict their eMail traffic to topics of primary interest to them.

Subscription is free - to enroll send an eMail message to "LISTSERVER@ANLEMC.MSD.ANL.GOV" and in your message simply include the line "SUBSCRIBE MICROSCOPY user name@your .eMail. address". e.g. "SUBSCRIBE MICROSCOPY RMFISHER@U.WASHINGTON.EDU" To reverse the process, simply send "UNSUBSCRIBE etc."

The system will "read" this statement, understand your purpose and send you a startup message to confirm your address. At that point you will be in electronic touch with the whole wide world of microscopy.

## SEM / TEM USERS:

### YOUR COMPLETE ELECTRON MICROSCOPY SUPPLIER

- \* KODAK, POLAROID, ILFORD & FUJI FILMS
- \* KODAK, ILFORD, AGFA PAPERS & CHEMICALS
- \* WIDE SELECTION OF SUNDRIES & ACCESSORIES (KODAK SLEEVES, SAVAGE GLASSINE ENVELOPES, NEGATIVE FILES, & VIEWING EQUIPMENT)
- \* SAME DAY SHIPMENT
- \* FRESH DATED PRODUCTS
- \* VERY COMPETITIVE PRICES

### KODAK

#### ELECTRON MICROSCOPE FILM 4489 & ELECTRON IMAGE FILM SO163

3 1/4" X 4" 100 & 250 SHEETS \*  
IN STOCK

(OTHER SIZES AVAILABLE)

**CALL FOR A QUOTE ON  
ALL YOUR PHOTOGRAPHIC NEEDS TODAY !!**

**CALL GEORGE LAING OR BARBARA DEFRANCESCO**

**TOLL FREE AT 1-800-223-7130**

226 NORTH ALLEN STREET

ALBANY, NY 12206

**FAX NUMBERS: OUTSIDE NYS (800) 832-2205 NYS (518) 438-0940**

**\*SUBSTANTIAL SAVINGS ON NEW 250 SHEET MULTI-PACK**

AFTER FOLDING, PLEASE TAB WITH SCOTCH TAPE - THANK YOU

*The Light Side*

How many field service engineers does it take to change a light bulb?

*It depends upon how many defective bulbs they brought with them.*
