Abstracts and search capability available at <https://www.cambridge.org/core/journals/prehospital-and-disaster-medicine>.

**Statement of Peer Review Policy:** PDM is a signatory with the International Committee of Medical Journal Editors (ICMJE) and the Committee On Publication Ethics (COPE). All scientific papers published in PDM are submitted to subject content and methods experts for peer review. Authors and reviewers are blinded (not aware of the identity of each other). Peer reviewers must declare that there is not a conflict of interest with any manuscript they agree to review. Peer review is accomplished by means of a standard scoring system and specific comments, the results and contents of which are returned to authors for their review.

## Prehospital and Disaster Medicine Appreciates the Journal Peer Reviewers

Prehospital and Disaster Medicine (PDM) Editorial policy adheres to the standards of the International Committee of Medical Journal Editors (ICMJE). ICMJE considers peer review as an unbiased, independent, critical assessment of scholarly work. Peer review is the objective assessment of manuscripts submitted to journals by experts who have no connection with the research or preparation of the manuscript under review. Peer review is an important extension of the scientific process. PDM is also a signatory with the international Committee On Publishing Ethics (COPE). PDM follows the COPE guidelines for journal management that are available on the organization website.

Peer review of manuscripts submitted to PDM is done in a blinded manner with the reviewer and authors unknown to each other. Content expert reviewers for a manuscript are selected based on their area of expertise. Methods reviewers are expert in study design and data analysis and assess manuscripts for scientific validity. Blinded reviews are used by PDM Editors to determine the priority for publishing manuscripts.

The Editorial Staff of Prehospital and Disaster Medicine appreciates the generous support of the Journal by the following reviewers:
