

RETRACTION

No effect of artificial gravity on lung function with exercise training during head-down bed rest-Retractation

Longxiang Su, Yinghua Guo, Yajuan Wang, Delong Wang and Changting Liu

doi:10.1017/S1473550415000294, published by Cambridge University Press, 1 October 2015.

The article by Longxiang *et al.* (published online 1 October 2015) was erroneously published twice on First View for *International Journal of Astrobiology*. The first version was published online before the final corrections had been made, subsequently it is necessary to retract the earlier version of the article for there to be only one correct version of the record. The incorrect version of the article has been removed from the journal and the correct version can be found by using the correct doi:10.1017/S1473550415000245. The publishers apologise for this oversight.
