

(Contents continued)

222–233 **Using ^{10}Be dating to determine when the Cordilleran Ice Sheet stopped flowing over the Canadian Rocky Mountains**

Helen E. Dulfer, Martin Margold, Zbyněk Engel, Régis Braucher and Aster Team

234–246 **Quantitative assessment of the oxygen isotope composition of fish otoliths from Lake Mungo, Australia**

Kelsie Long, David Heslop, Eelco J. Rohling

247–259 **Paleobiology of a large mammal community from the late Pleistocene of Sonora, Mexico**

Rachel A. Short, Laura G. Emmert, Nicholas A. Famoso, Jeff M. Martin, Jim I. Mead, Sandy L. Swift and Arturo Baez

CORRIGENDUM

260–261 **Late Pleistocene and Early Holocene aeolian deposits of Tasmania and their climatic implications – Corrigendum**

Peter D. McIntosh, Christina Neudorf, Olav B. Lian, Adrian J. Slee, Brianna Walker, Rolan Eberhard, Richard Doyle and Grant Dixon

QUATERNARY RESEARCH

Quaternary Research is an international journal devoted to the advancement of the interdisciplinary understanding of the Quaternary Period. We aim to publish articles of broad interest with relevance to more than one discipline, and that constitute a significant new contribution to Quaternary science. The journal's scope is global, building on its 50-year history in advancing the understanding of earth and human history through interdisciplinary study of the last 2.6 million years. Research areas include geoarcheology, geochemistry and geophysics, geochronology, geomorphology, glaciology, neotectonics, paleobotany and paleoecology, paleoclimatology, paleogeography, paleohydrology, paleontology, paleoceanography, paleopedology, Quaternary geology, volcanology and tephrochronology.

Submit manuscripts online at <http://editorialmanager.com/qr>. See instructions for submitting your manuscripts at <https://www.cambridge.org/core/journals/quaternary-research/information/guide-for-authors>.

Subscription Information: *Quaternary Research* publishes six volumes per year. The journal is published on behalf of Quaternary Research Center by Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA. Annual subscription rates for Volumes 99–104 (2021): Institutional rate, print only: \$1,561.00 (£1107.00 + VAT). Institutional rate, online only: \$1,531.00 (£1087.00 + VAT). Institutional rate, print and online: \$1,624.00 (£1154.00 + VAT). For subscriptions, renewals, and address changes, please visit <https://www.cambridge.org/core/journals/quaternary-research/subscribe>. Email subscriptions_newyork@cambridge.org if you are in the Americas or journals@cambridge.org for the rest of the world.

Beyond the limits of glaciation, aeolian deposits are a key paleoclimate archive examined in the SHeMax (Southern Hemisphere Last Glacial Maximum) project. Photo displays podzol development in aeolian sands at Rainbow Beach, SE Queensland, Australia. Photo: James Shulmeister (Guest Editor, SHeMax Thematic Set, this issue).

(Table of Contents continued)

THEMATIC SET: SOUTHERN HEMISPHERE LAST GLACIAL MAXIMUM (SHEMAX)

Guest editors: Jasper Knight, James Shulmeister and Lynda Petherick

- 1–4 Preface: Introduction to the SHeMax thematic set and prospects for LGM research in the Southern Hemisphere**
Jasper Knight, James Shulmeister and Lynda Petherick
- 5–23 A continental perspective on the timing of environmental change during the last glacial stage in Australia**
Haidee Cadd, Lynda Petherick, Jonathan Tyler, Annika Herbert, Tim J Cohen, Kale Sniderman, Timothy T. Barrows, Reka H. Fulop, Jasper Knight, A. Peter Kershaw, Eric A. Colhoun and Mathew R.P. Harris
- 24–38 Quantifying late Quaternary Australian rainfall seasonality changes using the Poaceae: Asteraceae pollen ratio**
Annika V. Herbert and Jennifer M. Fitchett
- 39–52 Vegetation over the last glacial maximum at Girraween Lagoon, monsoonal northern Australia**
Cassandra Rowe, Christopher M. Wurster, Costijn Zwart, Michael Brand, Lindsay B. Hutley, Vladimir Levchenko and Michael I. Bird
- 53–67 Late Pleistocene glaciolacustrine MIS 3 record at Fagnano Lake, Central Tierra del Fuego, southern Argentina**
Romina Sanci, María J. Orgeira, Andrea Coronato, Rita Tófaló, Héctor O. Panarello, Diego Quiroga, Ramiro López, Pedro Palermo and Claudia S. Gogorza
- 68–90 Patterns of aeolian deposition in subtropical Australia through the last glacial and deglacial periods**
Richard J. Lewis, John Tibby, Lee J. Arnold, Patricia Gadd, Geraldine Jacobsen, Cameron Barr, Peter M. Negus, Michela Mariani, Daniel Penny, David Chittleborough and Edward Moss
- 91–114 Late Pleistocene and Early Holocene aeolian deposits of Tasmania and their climatic implications**
Peter D. McIntosh, Christina Neudorf, Olav B. Lian, Adrian J. Slee, Brianna Walker, Rolan Eberhard, Richard Doyle and Grant Dixon
- 115–129 A palaeoenvironmental record of the Southern Hemisphere last glacial maximum from the Mount Cass loess section, North Canterbury, Aotearoa/New Zealand**
Peter C. Almond, Sándor Gulyás, Pál Sümegei, Balázs P. Sümegei, Stephen Covey-Crump, Merren Jones, Joseph Shaw and Andrew Parker
- 130–141 Hydrographic shifts south of Australia over the last deglaciation and possible interhemispheric linkages**
Matthias Moros, Patrick De Deckker, Kerstin Perner, Ulysses S. Ninnemann, Lukas Wacker, Richard Telford, Eystein Jansen, Thomas Blanz and Ralph Schneider

ARTICLES

- 142–152 Charcoal evidence for environmental change ca. 3.5 ka and its influence on ancient people in the West Liao River Basin of northeastern China**
Xin Jia, Shuzhi Wang, Yonggang Sun, Yiyin Li, Yanjing Jiao, Zhijun Zhao and Harry F. Lee
- 153–174 Growth response of Great Basin limber pine populations to climate variability over the past 4002 years**
Constance I. Millar, Diane L. Delany, John C. King and Robert D. Westfall
- 175–187 Holocene ice wedge formation in the Eureka Sound Lowlands, high Arctic Canada**
Kethra Campbell-Heaton, Denis Lacelle, David Fisher and Wayne Pollard
- 188–204 A multi-proxy reconstruction of climate during the late-Pleistocene to early Holocene transition in the northeastern, USA**
Laurie D. Grigg, Kevin J. Engle, Alison J. Smith, Bryan N. Shuman and Maximilian B. Mandl
- 205–221 Late Pleistocene–Holocene stress in the South American intraplate evidenced by tectonic instability in central Amazonia**
Dilce F. Rossetti, Francisco H. R. Bezerra, Márcio M. Valeriano and Eder Cassola Molina
