

Leonardo da Vinci (1452-1519) . . . painter, inventor, engineer, craftsman . . . spent a lifetime in the pursuit of excellence.
Ambu's continuing search also combines art, science and human engineering to a unique degree.

Simplicity

SIMPLICITY, in its design, use, and versatility, the Ambu® Matic Automatic Resuscitator provides the safety and effectiveness demanded by today's critical care provider.

SIMPLICITY, engineered into a high-quality, time-cycled automatic resuscitator that ensures reliability and efficiency in both first-response emergency use and as an in-house transport ventilator.

SIMPLE, EXTREMELY COMPACT, AND EASY TO USE, yet has many unique features:

- Single slide control for simultaneous adjustment of both volume and physiologically appropriate frequency
- 60%-100% FIO₂ selector switch
- Manual override control
- Optional manometer for monitoring direct intraoral pressures

The Ambu Matic Automatic Resuscitator from Ambu, the company which developed the first manual resuscitator and still recognized as a world leader in emergency care products.

The world's # 1 AED
Now Offers Optional Strip Chart

Heartstart® 3000 QR

Comprehensive Patient Documentation!

The Heartstart 3000

has always integrated all critical ECG and device data and printed a comprehensive patient record.

Now the Heartstart 3000 QR with built in strip chart offers "immediate" on-scene documentation *in the field* or upon *hospital arrival*.

- **Superior Data Quality.**

All ECG data, times, device messages, and defibrillator shocks are prioritized, annotated and printed.

- **Smallest and Lightest.**

The Heartstart 3000QR weighs only 11.5 pounds and is the smallest defibrillator with a strip.

- **Versatility.**

Programmability, manual override and "event mark" capability for system wide application.
