

Instructions to authors

Detailed instructions to authors are available online here:
[cambridge.org/core/journals/journal-of-glaciology/information](https://www.cambridge.org/core/journals/journal-of-glaciology/information)

The *Journal of Glaciology* publishes three types of paper:

- Articles - concerning new findings and theories, or new instruments and methods, in glaciology; or review articles that offer an up-to-date, coherent account of a glaciological subject that is developing rapidly or has been neglected
- Letters - identical in form and general content to Articles, but of reduced length, and carrying substantially reduced processing charges
- Communications - short pieces without abstracts that could be, e.g., comments on published articles/letters, book reviews, or short correspondence on topics of interest to the community

Papers submitted should be:

- of high scientific quality
- complete and clear
- substantially different from previously published work.

Length

Papers should be concise. Lines and pages should be numbered. Letters are limited to five *Journal* pages and Correspondences to two (one *Journal* page = about 1000 words).

Original submission

Submit your paper via the *Journal of Glaciology* online submission system at <https://mc.manuscriptcentral.com/jog>

Review process

Your paper will be peer reviewed by at least two reviewers. The Scientific Editor will discuss any alterations required to the paper. The Associate Chief Editor will inform you if and when your paper is accepted for publication. Papers written in poor English, not appropriate for the journal, or of inferior quality will be rejected without review.

You will be sent a proof of your text and illustrations to check and correct in advance of online publication.

Final submission

The final accepted version of the paper should be in electronic format.

- Acceptable formats are
 - Text (including tables and figure captions) – Word, rtf or LaTeX (the IGS class file should be used; downloadable from the website). Please also supply a final PDF
 - Figures – ideally in tif or eps format (or otherwise in the format in which they were created)
- Responsibility for the accuracy of all data (including references) rests with the authors

Supplementary material

The *Journal of Glaciology* accepts and makes available online appropriate supplementary material. It should be clearly named and labelled and provided in standard file formats.

General points

- Title should be concise
- Abstract should be less than 200 words

- Papers should be divided into numbered sections with short section headings
- Use SI units
- Use internationally recognized systems of abbreviation
- Illustrations should
 - be one or two column widths: up to 85 mm or up to 178 mm
 - not be in boxes
 - use strong black lines (avoid tinting if possible)
 - use SI units in labels
 - use Optima, Arial or a similar sans serif font in labels
- TeX authors: please provide a pdf of the whole paper (text, tables, figures and captions) as well as the individual LaTeX and graphics files
- Equations should
 - be set in MathType or advanced equation editor
 - NOT be embedded as graphics in the text
- Tables should
 - be numbered in Arabic
 - be referred to in text (as Table 1 etc.)
 - NOT be submitted as illustrations
- All citations in text should include the author name(s) and the year of publication (e.g. Smith, 2010; Smith and Jones, 2012; Smith and others, 2014) and must have an entry in the reference list
- Reference lists should
 - be concise
 - be complete and accurate, including doi numbers
 - be provided in precise *Journal* format, including punctuation and emphasis (see past papers for style)
 - be arranged in alphabetical order by first author's surname
 - include works accepted but not published as 'in press'
 - not include personal communications, unpublished data or manuscripts in preparation or submitted for publication (these should be included in the text)

Open Access and page charges

As a gold open access journal, the *Journal of Glaciology* is published without restriction and receives no subscription revenue. The costs of publication are instead covered by an article publishing charge (APC) levied upon the corresponding author, or his/her funding body or institution.

The APC for non-IGS members is £1,320 for a regular article (of 6 published pages or more), £660 for a letter (of 5 published pages or fewer) and £300 for a communication (of 2 published pages or fewer). IGS members receive a 10% discount on these charges.

Figures quoted here are correct for 2020.

Upon acceptance for publication the corresponding author will be contacted by Rightslink on behalf of Cambridge University Press, who will administer the collection of the article publishing charge. At that stage the corresponding author can pay by credit card or arrange for an invoice to be issued to his/her funding body or institution. Selected authors may be granted an APC waiver by the IGS. In such cases, a waiver code shall be provided, which should be issued to Rightslink upon receipt of the payment.

Journal of GLACIOLOGY

CONTENTS Vol 66 No 256 2020

175–187 **Quantifying parameter uncertainty in a large-scale glacier evolution model using Bayesian inference: application to High Mountain Asia**

David R. Rounce, Tushar Khurana, Margaret B. Short, Regine Hock, David E. Shean, Douglas J. Brinkerhoff

188–202 **Classification and kinematics of the Planpincieux Glacier break-offs using photographic time-lapse analysis**

Daniele Giordan, Niccolò Dematteis, Paolo Allasia, Elena Motta

203–218 **Evaluation of the relative contribution of meteorological and oceanic forces to the drift of ice islands offshore Newfoundland**

Reza Zeinali Torbati, Ian D. Turnbull, Rocky S. Taylor, Derek Mueller

219–230 **High altitude accumulation and preserved climate information in the western Pamir, observations from the Fedchenko Glacier accumulation basin**

Astrid Lambrecht, Christoph Mayer, Pascal Bohleber, Vladimir Aizen

231–247 **Diurnal lake-level cycles on ice shelves driven by meltwater input and ocean tidal tilt**

Douglas R. MacAyeal, Ian C. Willis, Alison F. Banwell, Grant J. Macdonald, Becky Goodsell

248–258 **Black carbon and mineral dust on two glaciers on the central Tibetan Plateau: sources and implications**

Xiaofei Li, Shichang Kang, Michael Sprenger, Yulan Zhang, Xiaobo He, Guoshuai Zhang, Lekhendra Tripathy, Chaoliu Li, Junji Cao

259–277 **An ~1899 glacier inventory for Nordland, northern Norway, produced from historical maps**

Paul Weber, Liss M. Andreassen, Clare M. Boston, Harold Lovell, Sidsel Kvarteig

278–290 **A cross-validated three-dimensional model of an englacial and subglacial drainage system in a High-Arctic glacier**

Lena U. Hansen, Jan A. Piotrowski, Douglas I. Benn, Heidi Sevestre

291–302 **A benchmark dataset of in situ Antarctic surface melt rates and energy balance**

Constantijn L. Jakobs, Carleen H. Reijmer, C. J. P. Paul Smeets, Luke D. Trusel, Willem Jan van de Berg, Michiel R. van den Broeke, J. Melchior van Wessem

303–312 **The role of subglacial hydrology in ice streams with elevated geothermal heat flux**

Silje Smith-Johnsen, Basile de Fleurian, Kerim H. Nisancioglu

313–328 **Glacier change in Norway since the 1960s – an overview of mass balance, area, length and surface elevation changes**

Liss M. Andreassen, Hallgeir Elvehøy, Bjarne Kjølmoen, Joaquín M. C. Belart

329–347 **Seismic characterization of a rapidly-rising jökulhlaup cycle at the A.P. Olsen Ice Cap, NE-Greenland**

Michael Behm, Jacob I. Walter, Daniel Binder, Feng Cheng, Michele Citterio, Bernd Kulesa, Kirsty Langley, Phillipe Limpach, Stefan Mertl, Wolfgang Schöner, Mikkel Tamstorf, Gernot Weyss

Corrigendum

348–348 **Surface and basal boundary conditions at the Southern McMurdo and Ross Ice Shelves, Antarctica – CORRIGENDUM**

C. Grima, I. Koch, J. S. Greenbaum, K. M. Soderlund, D. D. Blankenship, D. A. Young, D. M. Schroeder, S. Fitzsimons

Published for the International Glaciological Society, Cambridge, UK
