

CLAY MINERALS

VOLUME 21, NUMBER 4, OCTOBER 1986

CONTENTS

Editorial	427
C. V. JEANS. Introduction	429
K. PYE and D. H. KRINSLEY. Diagenetic carbonate and evaporite minerals in Rotliegend aeolian sandstones of the Southern North Sea: their nature and relationship to secondary porosity development	443
M. W. GOODCHILD and J. H. McD. WHITAKER. A petrographic study of the Rotliegendes Sandstone reservoir (Lower Permian) in the Rough Gas Field	459
I. S. C. SPARK and N. H. TREWIN. Facies-related diagenesis in the Main Claymore Oilfield sandstones	479
A. LØNØY, J. AKSELSEN and K. RØNNING. Diagenesis of a deeply buried sandstone reservoir: Hild Field, Northern North Sea	497
C. V. JEANS and M. J. FISHER. Diagenesis in Upper Jurassic marine sandstones from the North Sea Well 14/26-1 and its significance	513
D. J. STEWART. Diagenesis of the shallow marine Fulmar Formation in the Central North Sea	537
P. RICHES, I. TRAUB-SOBOTT, W. ZIMMERLE and U. ZINKERNAGEL. Diagenetic peculiarities of potential Lower Jurassic reservoir sandstones, Troms 1 area, off Northern Norway, and their tectonic significance	565
W. L. HUANG, A. M. BISHOP and R. W. BROWN. The effect of fluid/rock ratio on feldspar dissolution and illite formation under reservoir conditions	585
J. M. HUGGETT. An SEM study of phyllosilicate diagenesis in sandstones and mudstones in the Westphalian Coal Measures using back-scattered electron microscopy	603
T. R. ASTIN. Septarian crack formation in carbonate concretions from shales and mudstones	617
P. L. HALL, D. M. ASTILL and J. D. C. McCONNELL. Thermodynamic and structural aspects of the dehydration of smectites in sedimentary rocks	633
S. D. BURLEY. The development and destruction of porosity within Upper Jurassic reservoir sandstones of the Piper and Tartan Fields. Outer Moray Firth, North Sea	649
M. THOMAS. Diagenetic sequences and K/Ar dating in Jurassic sandstones, Central Viking Graben: effects on reservoir properties	695
A. C. MORTON. Dissolution of apatite in North Sea Jurassic sandstones: implications for the generation of secondary porosity	711
T. R. HARPER and D. C. BULLER. Formation damage and remedial stimulation	735
J. R. GRONOW. Mechanisms of particle movement in porous media	753
J. D. KANTOROWICZ, L. LIEVAART, J. G. R. EYLANDER and M. R. P. EIGNER. The role of diagenetic studies in production operations	769
E. D. PITTMAN and G. E. KING. Petrology and formation damage control, Upper Cretaceous sandstone, offshore Gabon	781
A. HURST and J. S. ARCHER. Sandstone reservoir description: an overview of the role of geology and mineralogy	791
A. HURST and J. S. ARCHER. Some applications of clay mineralogy to reservoir description	811
