

## EDITORS' NOTE

A. J. TIMOTHY JULL<sup>1</sup> and STEVEN W. LEAVITT<sup>2</sup>

<sup>1</sup>Editor, RADIOCARBON, Dept. of Geosciences, University of Arizona, Tucson, AZ 85721.

<sup>2</sup>Editor, TREE-RING RESEARCH, Lab. of Tree-Ring Research, University of Arizona, Tucson, AZ 85721.

We are pleased to introduce this special issue devoted to a collection of papers organized in association with the Center for Mediterranean Archaeology & the Environment (CMATE). The issue has been largely developed and edited by Guest Editors Charlotte L. Pearson and Steven L. Kuhn, employing multiple confidential peer reviews of each paper, editorial evaluation, and various iterations of revision for the papers that appear herein.

This issue has been jointly produced by the journals RADIOCARBON and TREE-RING RESEARCH who have assisted with planning and execution. This is an extra issue beyond those regu-

larly scheduled by the journals. Each article has been accordingly assigned two DOIs, one representing each journal. Despite the two DOIs, there is only one corresponding article, so it should not be counted as two separate articles. In this way, both journals will receive credit for participation in the publication of each paper in the project.

We would like to expressly thank Mark McClure, Managing Editor of RADIOCARBON, for his heroic efforts in getting the accepted manuscripts into a format ready for printing and for handling the technical aspects of publishing and referencing.
