APRIL 28, 2016

A publication of the

MRS MATERIALS RESEARCH SOCIETY®
Advancing materials. Improving the quality of life.

CAMBRIDGE
UNIVERSITY PRESS

Journal of MATERIALS RESEARCH

JOURNAL OF MATERIALS RESEARCH (JMR) is an interdisciplinary journal serving the materials research community through publication of original research articles and invited reviews encompassing the synthesis, processing, characterization, properties, and theoretical description of materials.

JMR publishes new research that demonstrates a significant impact or advance of scientific understanding of interest to the materials research community. Engineering studies and applications to commercial products are beyond the scope of *JMR* and should be submitted elsewhere. Manuscripts that report data without giving an analysis, interpretation, or discussion are only acceptable if the data are sufficiently important that publication is expected to lead to significant new studies or advancements in science or technology.

Manuscripts must be submitted to the *Journal of Materials Research* electronically via ScholarOne manuscripts, at the following website address: <http://mc.manuscriptcentral.com/jmr>. Electronic submission expedites the review process and also allows authors to track the status of their manuscripts at any time. Complete instructions are available on the ScholarOne site and authors will be prompted to provide all necessary information.

Manuscripts must be prepared in English, using a word processing program, formatted to fit 8½ x 11 in. paper, and saved as .doc, .pdf, .rtf, or .ps files. Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .xls or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to .pdf format. Detailed instructions are available on the submission web site. During submission, authors must enter all coauthor names and e-mail addresses. Manuscripts will not be considered for peer review until this information is provided. Authors must also enter manuscript keywords using the *JMR* keyword list (located on the submission web site). Authors who are not fluent in English must have their manuscript edited for correct English grammar and sentence structure before submission.

Authors are expected to follow the conventional writing, notation, and illustration style prescribed in *Scientific Style and Format: the CSE Manual for Authors, Editors and Publishers, 7th edition, 2006*. Authors should also study the form and style of printed material in this journal. SI units should be used. Authors should use an identical format for their names in all publications to facilitate use of citations and author indexes.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to *JMR* who have related material under consideration or in press elsewhere should send a copy of the related material to *JMR* at the time of submission. While their manuscripts are under consideration at *JMR*, authors must disclose any such related material. To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

Articles are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

Commentaries and Reviews: *Journal of Materials Research* occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

Color policy: It is not necessary for authors to indicate that a figure should be displayed in color online. *JMR* will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author's request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will

be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be sufficiently clear for both online and print copy. When submitting figures to be in color online only, authors should include the phrase <<color online>> in the figure captions. This is the author's responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white to see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

Journal of Materials Research (ISSN: 0884-2914) is published twenty-four times a year by Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006 for the Materials Research Society. Periodical Postage Paid in New York, NY and additional mailing offices. **POSTMASTER:** Send address changes to *Journal of Materials Research*, c/o Journals Dept., Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to Subscription Fulfillment, *Journal of Materials Research*, Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA (for USA, Canada, and Mexico); or Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge, CB2 8RU, England (for UK and elsewhere). Allow at least six weeks advance notice. For address changes, please send both old and new addresses and, if possible, include a mailing label from a recent issue. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue's actual date of publication; otherwise, the issue may be purchased at the single-copy price.

Reprints of individual articles in *Journal of Materials Research* may be ordered. For information on reprints, please contact Cambridge University Press. Reprints of complete back issues older than the prior volume year may be ordered on an individual basis via the Cambridge Journals Online website. To determine availability, visit the appropriate page for the *JMR* back issue desired (www.journals.cambridge.org/jmr).

Individual member subscriptions are for personal use only.

Cover: Scanning electron micrographs of the wear debris of the Mg–6Gd–3Y–0.5Zr alloy for 400 m sliding distance and $v=0.06$ ms⁻¹, $F=15$ N, $T=25$ °C. [H.R. Jafari Nodooshan, W.C. Liu, G.H. Wu, W.J. Ding, R. Mahmudi: Effect of Gd addition on the wear behavior of Mg–xGd–3Y–0.5Zr alloys. p. 1133].

Journal of MATERIALS RESEARCH

Volume 31, Number 8, April 28, 2016

ARTICLES

- 977–994 **New opportunities for materials informatics: Resources and data mining techniques for uncovering hidden relationships** Anubhav Jain, Geoffroy Hautier, Shyue Ping Ong, Kristin Persson
- 995–1003 **Microwave sintering of fine grained MgP and Mg substitutes with amorphous tricalcium phosphate: Structural, and mechanical characterization** Elham Babaie, Yufu Ren, Sarit B. Bhaduri
- 1004–1011 **The microstructure of scale formed by oxynitriding of Ti and exhibiting significant apatite-forming ability** Masami Hashimoto, Satoshi Kitaoka, Shunsuke Muto, Kazuyoshi Tatsumi, Yoshihiro Obata
- 1012–1017 **Selective removal of As, Sb, and Se ions from multicomponent mixture by nanoparticles** Si-Hong Wang, Jing-Dong Zhang, Ji-Shou Piao, Dong-Hao Li
- 1018–1026 **Microstructure and dielectric properties with CuO additions to liquid phase sintered BaTiO₃ thin films** David T. Harris, Matthew J. Burch, Edward J. Mily, Elizabeth C. Dickey, Jon-Paul Maria
- 1027–1037 **Study of layered diamond like carbon and PECVD fluorocarbon films for ultra low dielectric constant interlayer dielectric applications** Nandini G. Sundaram, Seetharaman Ramachandran, Lawrence Overzet, Matthew Goeckner, Gil-Sik Lee
- 1038–1045 **Structural, magnetic and electrical transport properties of double perovskite Tb₂MnCoO₆** S.L. Wang, H. Xu, X.P. Wu, P.G. Li, G. Ungar, Y. Liu, J.Q. Shen, W.H. Tang
- 1046–1055 **Effect of titan yellow dye on morphological, structural, optical, and dielectric properties of zinc(tris) thiourea sulphate single crystals** Mohd. Shkir
- 1056–1064 **Revealing the mechanical properties of potassium dihydrogen phosphate crystals by nanoindentation** Y. Zhang, L.C. Zhang, M. Liu, F.H. Zhang, K. Mylvaganam, W.D. Liu
- 1065–1076 **Synthesis of WO_{3-x} nanomaterials with controlled morphology and composition for highly efficient photocatalysis** Zhenguang Shen, Zengying Zhao, Jingwen Qian, Zhijian Peng, Xiuli Fu
- 1077–1084 **The physical interpretation of the activation energy for hot deformation of Ni and Ni–30Cu alloys** Amir Momeni
- 1085–1095 **Room temperature stress relaxation in nanocrystalline Ni measured by micropillar compression and miniature tension** Gaurav Mohanty, Juri Wehrs, Brad L. Boyce, Aidan Taylor, Madoka Hasegawa, Laetitia Philippe, Johann Michler
- 1096–1112 **Deformation mechanics and microstructure evolution during indirect extrusion in (sub) mm-scale samples** Marzyeh Moradi, Saurabh Basu, M. Ravi Shankar
- 1113–1123 **Microstructure and texture evolution of novel Cu–10Ni–3Al–0.8Si alloy during hot deformation** Leinuo Shen, Zhou Li, Qiyi Dong, Zhu Xiao, Chang Chen

(Continued)

- 1124–1132 **Effect of solution treatment on microstructure and mechanical properties of cast Al–3Li–1.5Cu–0.2Zr alloy** Yu Peng, Antao Chen, Liang Zhang, Wencai Liu, Guohua Wu
- 1133–1144 **Effect of Gd addition on the wear behavior of Mg–xGd–3Y–0.5Zr alloys** H.R. Jafari Nodooshan, Wencai Liu, Guohua Wu, Wenjiang Ding, R. Mahmudi
- 1145–1152 **Effect of liquid structural transition on the dissolution of solid copper in liquid eutectic tin–bismuth** Guo-Hua Ding, Xuan Qi, Shu-Long Liu, Ming Li, Jing Hu
- 1153–1162 **The influence of Mn on the microstructure and mechanical properties of the Al–5Mg–Mn alloy solidified under near-rapid cooling** Yulin Liu, Liangyun Ou, Chaofei Han, Li Zhang, Yuhua Zhao
- 1163–1170 **Effects of annealing temperature on stress corrosion susceptibility of AA5083–H15 alloys** Chun-Hung Yen, Chih-Ting Wu, Yen-Hao Chen, Sheng-Long Lee
