PROTESTANTS AND PIONEERS

Individualism and Conformity on the American Frontier
by T. Scott Miyakawa

This work is a temperate but penetrating corrective to overstatements of the role of individualism in settling our continent. It is Mr. Miyakawa's thesis that the pioneers, contrary to accepted notions, led lives which were not only conforming, but regimented. They also, he suggests, contributed distortions to the American view of race, education, and the role of the intellectual, which affect contemporary attitudes and policies. *Cloth \$7.50*

THE URBAN FRONTIER

by Richard C. Wade

A vital reassessment of its subject, *The Urban Frontier* develops the neglected importance of cities in the growth of the American West. Discussing pioneer life in Pittsburgh, Cincinnati, Lexington, Louisville and St. Louis, Professor Wade points out that these cities were platted at the very beginning of the assault on the wilderness and vitally affected social and economic trends.

Phoenix paperback (P161) \$2.45

THE MORMONS

by Thomas F. O'Dea

Of the many sects created by nineteenth-century millennial revivalism in the United States, the Mormon Church alone survived and flourished in contemporary America. In many ways it has developed as an autochthonous culture of its own, which has left its stamp on a vast territory and affected its members' lives in deep and lasting ways. "A penetrating study of the Mormons by a Catholic scholar . . . Throughout, the author has striven to combine intellectual objectivity with intelligent human sympathy. He has succeeded magnificently." — LELAND H. CREER, *Mississippi Valley Historical Review*.

1964. xv + 858 pages, 8 facsimiles. Cloth.

Dglds. 90,00

The collection of over 800 documents, covering the Revolution's most important period from 1917-1922, has been divided into two volumes. The first and currently available title contains roughly half the documents and accounts for the period 1917-1919.

The second volume which we intend to publish in a few years, will contain the documents for the period 1920-1922.

The documents in the first volume necessarily reflect the Civil War in the first place. They give ample documentation of Trotsky's leading role in it. If there is no document directly reflecting the creation itself of the Army, there is enough in them to show the central importance of Trotsky's work in building it up and, also, to document some of the conflicts that contributed to his later downfall.

The documents give a vivid picture of Civil War Russia from the inside. They were often written in a hurry, as their style shows, and without any conscious thought of documentation. Thus they convey the spirit of that tense time perhaps better than do the few pondered memoranda that belong to the collection. These have their own interest, as is shown by document nr. 347; this is one of the clearest formulations of the Eastern Orientation in Soviet foreign policy.

It is hoped that this volume will contribute towards the study and towards a better understanding of a sequence of events which have helped to shape and deeply influenced the history of the Soviet Union.
