When is Electrocoagulation indicated for the removal of tonsils?

TO SUMMARIZE authoritative medical literature on this subject, the use of diathermy for electrocoagulation of tonsils is being advocated for the following types of cases:

Aged patients — Hæmophiliacs — Heart cases — Those who resist surgery — Kidney cases — Acute syphilitics — Tonsils with malignancy — Tubercular patients or tubercular tonsils — Lingual tonsils — Tonsil remains, or recurrent tonsil tissue.

There is a number of important advantages claimed for this method, when used in these selected cases. There is no shock to the patient. No injection is necessary, as topical anaesthesia is employed. There is little or no scarring, and no adhesions or contractions. The possibility of secondary infection is so remote as to be a negligible factor.

Many physicians feel that if electrocoagulation is used only in that type of case which is the result of incomplete surgical removal of the tonsils, this alone could justify the use of the method.

The fact is that the interest in electrocoagulation has increased in recent years to the extent that Victor engineers have been called upon to design a special unit, adaptable especially to ear, nose and throat work, and similar applications of a superficial nature. This Micro Surgical Diathermy Unit represents the last word in refinement of control, from the standpoint of obtaining the exact quantity and quality of current desired and the consistent duplication thereof.

We shall be glad to send a booklet containing abstracts from authoritative medical literature pertaining to this particular field of work, together with a description of the Victor Micro Surgical Diathermy Unit.

Victor X-Ray Corporation, Ltd.
15-19 Cavendish Place, London, W.1
Please send me abstracts from papers on electrocoagulation in ear, nose and throat work; also further particulars on the Micro Surgical Diathermy Unit.

The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

V. E. NEGUS AND F. W. WATKYN-THOMAS

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.

4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.

5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

7. The Annual Subscription commencing with the January issue is Forty Shillings, post free, and is payable in advance.

8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.

9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

United States of America

Orders for this Journal, for single parts or yearly subscriptions, may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York.
