

**The Reformation
of Cathedrals**
Cathedrals in English
Society, 1485–1603
Stanford E. Lehmberg

Stanford Lehmberg, a noted authority on the Tudor period, examines the impact of the Reformation on the cathedrals of England and Wales. Based largely on manuscript materials from the cathedral archives themselves, this book is the first attempt to draw together information for all twenty-nine of the cathedrals that existed in the Tudor period. The author scrutinizes the major changes that took place during this era in the institutional structure, personnel, endowments, liturgy, and music of the cathedral and shows how the cathedrals, unlike the monasteries that were dissolved by Henry VIII, succeeded in adapting successfully to the Reformation.
