

would a any senior consultant. However, 'minor' errors in judgement are slightly sneered at and you are allowed to continue, although a 'final report' is made of your skills. Despite being in good humour, they are accurate scenarios backed up with a sound knowledge base. It must be remembered that this site is dedicated to trauma, where things are prioritised differently than the anaesthetic or recovery room, and any guesswork or assumption is quickly ruled out. The website also contains a small library of pictures of injuries following trauma, this is well set out and easy to navigate. The website also contains a trauma bank, which allows clinicians to discuss current cases and learn from the experiences of others. This is very useful as there is no recriminations but a genuine desire on the part

of others around the globe to help. With other features including links to trauma organisations both medical and nursing, plus other resources, this is a comprehensive site dedicated to the science of trauma and is well worth a visit for those with an interest.

## HAPPY NEW YEAR TO ALL MEMBERS OF BARNA.

### To all Link Members,

Sorry, unfortunately this notice was not included in the March Journal as planned but better late than never! Thank you for your effort over the last 8 months in getting the Link Member scheme up and running. I am looking forward to meeting most of you at the conference in June.

Please send me any information you want adding to the Newsletter.

I hope you will use this allocated slot in the Journal to share experiences in order to support each other and also to get new Link Members.

Currently there are 39 Link Members so we do need some more!

### **Are you interested in becoming a Link Member!**

Well you can either have a look on our web site or contact me (please see page 1 for contact numbers) if you want any further information.

### **The role of the link member is to:**

- Advertise BARNA and encourage others to join.
- Ensure that conferences/study days dates are well publicised locally.

- Feedback information on clinical research undertaken locally.
- Feedback "grass roots" information to help the committee develop the association.

### **Pre-requisites to become a BARNA Link Member:**

1. Be member of BARNA
2. Work within the area of Anaesthetic and/or Post Anaesthetic Care Nursing.

### **Work involved:**

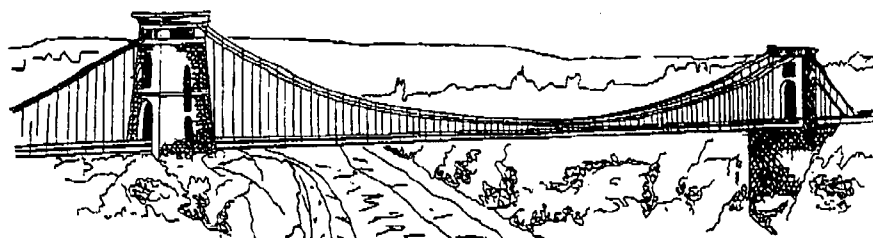

- Very little paper work.
- Net working.
- Read 3 monthly Newsletter sent to all Link Members.

### **How to apply:**

Call, e-mail, fax or write to (please see page 1 for contact numbers) me and I will get back in touch with you.

**Inge D. Bateman**  
Link liaison officer.

## BRISTOL ROYAL HOSPITAL FOR SICK CHILDREN

### PAEDIATRIC RECOVERY STUDY DAY FOR NURSES.

11 July 2000 or 5 December 2000.

**VENUE: THE BRISTOL MEDICAL SIMULATION CENTRE**

Days comprise a stimulating mix of practical skills, management of real time scenarios, small group discussions and one lecture.

**£50 per person per day.**

Registration form from:-Dr G. R. Lauder

c/o The Anaesthetic Department

St Michael's Hospital

Bristol BS2 8EG

Tel: 0117 928 5203 Fax: 0117 928 5209

email: [113163.2270@compuserve.com](mailto:113163.2270@compuserve.com)

## SISTER – RECOVERY DEPT

**£25,800-£30,700 pay award pending**

**37½ hour week**

**Total commitment. Total cover. Total recovery.**

Jersey's modern, friendly General Hospital – set in an area of outstanding natural beauty – now requires a full-time Sister within the Recovery Department attached to its main suite of 4 operating theatres.

This is a senior role, in which you'll lead and develop a busy team of recovery nurses – serving theatres providing 24-hour emergency and trauma cover.

An RGN who has at least 4 years' experience – and ideally a post-registration qualification in recovery/anaesthetic nursing, you must be motivated and enthusiastic, with good communication and team management skills, plus the flexibility to undertake rotational weekend and on-call duties.

You should either hold, or be willing to study for, ENB 998, City & Guilds 730 or D32/D33.

For an informal discussion, please call Andree de la Mare on 01534 622754 or write to her at Personnel Department, General and Acute Services, General Hospital, Gloucester Street, St. Helier, Jersey JE1 1QS.

Closing date 5th June.

# GUIDELINES FOR AUTHORS

Submissions for the Journal of the British Anaesthetic and Recovery Nurses Association,  
(Anaesthetic and Recovery Nurse).

Anaesthetic and Recovery Nurse is the only specialist Journal for a group of specialist Nurses.

## Manuscript Presentation

- ◆ Two copies of the article are to be submitted to the editorial team. Articles can be sent on disk but in the Microsoft Word/Works format.
- ◆ Manuscripts must be typed on A4 paper, with double spacing.
- ◆ Comment or Opinion articles up to 500 words.
- ◆ Clinical, management and research articles between 1000 – 1500 words. Longer articles can be published in more than one part.
- ◆ The frontispiece should include professional details including Job title, work address and qualifications.

## Illustrations and Photographs

- ◆ Graphs and drawings should be plain drawn or computer generated on separate sheet from the text.
- ◆ Photographs should be in original, with clear label on the rear. If patients are visible then written permission from them is required before publication.

## References and Reference Lists

- ◆ The Harvard system is used in the journal text. i.e. Harvard (1989)
- ◆ The reference list must be placed in alphabetical order.
- ◆ The reference list should include the following; Harvard, J. (1989)

How to reference

London BARNA Publications.

## Administration Details

- ◆ Manuscripts will always be acknowledged by letter.
- ◆ Editing of the article may be required for final printing.
- ◆ Authors will be required to sign a release that the work is original and the copyrighted to BARNA.
- ◆ Payment for articles will consist of one the following ;
  1. Free membership for one year, if already a member then a friend can be nominated.
  2. Reduction in conference fee for same year by £20.

**All manuscripts should be sent to:**

Mark Radford  
BARNA, 6 Bromyard Avenue  
Walmley, Sutton Coldfield B76 1RQ

## Foundations of Anesthesia Basic & Clinical Sciences

**Hugh Hemmings**, Professor of Anesthesiology and Pharmacology, Cornell University Medical College, US, **Phillip Hopkins**, Senior Lecturer, Academic Unit of Anesthesia, St. James' University Hospital, Leeds, UK  
*Foundations of Anesthesia: Integrated Basic and Clinical Sciences* emphasises the principles and clinical applications of the four major areas of basic science that are relevant to anaesthesia practice: molecular and cell biology, physiology, pharmacology, and physics and measurement. The approach is integrated and systems oriented, avoiding the artificial boundaries between the basic sciences. Recognising that no single author possesses the breadth and depth of understanding of all relevant subjects, each chapter is authored by an expert in that area representing many of the finest institutions of North America and the United Kingdom.

### FEATURES

- Gives the complete and latest scientific knowledge necessary for anaesthetic practice
- Presents in one book all that the anaesthetist needs for qualifying exams and practice
- User-friendly style with outstanding explanatory colour graphics

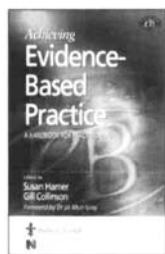

0 7234 2787 9 November 1999 Hardback  
640 pages / 700 illus Mosby-Wolfe £99.00

## Achieving Evidence-Based Practice

### A handbook for practitioners

**Susan Hamer**, Programme Director, Centre for Development of Nursing Policy and Practice, University of Leeds, UK, **Gill Collinson**, Independent Development Consultant and Counsellor, Formerly Assistant Regional Nurse Director, NHS Executive, Anglia & Oxford, UK

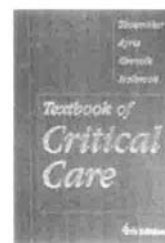

This book aims to provide a practical introduction to and overview of, the development and implementation of EBP. Reflecting both the clinical and managerial agendas, it describes the processes involved in defining, identifying and locating appropriate evidence for practice and addresses the significant issues in changing attitudes to practice. Extensively using case studies, reflective exercises and practice checklists, this book will demystify issues and provide a practical source of information which readers can clearly use to develop their own practice and use evidence as a basis for clinical decisions.

## Textbook of Critical Care 4th Edition

**William C. Shoemaker**, Professor of Surgery and Anesthesia, University of Southern California School of Medicine, US, **Stephen M. Ayres**, Professor of Medicine, Dean Emeritus, School of Medicine, Director, International Health Programs, Virginia Commonwealth University, Medical College of Virginia, US, **Ake Grenvik**, Distinguished Service Professor of Critical Care Medicine, University of Pittsburgh Medical Centre, US, **Peter R. Holbrook**, Professor of Anesthesia and Pediatrics, George Washington University School of Medicine, US

This 4th Edition conveniently compiles the state-of-the-art expertise of more than 275 authorities under one cover. The new edition of this classic critical care text has been updated and expanded to reflect the most current, clinically relevant information available. It has also been reorganised so that life-threatening conditions are presented first.

## Textbook of Pain 4th Edition

**Patrick D. Wall**, Professor Emeritus of Physiology St. Thomas's Hospital, London UK, **Ronald Melzack, E. P. Taylor** Professor of Psychology, McGill University, Montreal, Quebec, Canada

Since the publication of the first edition in 1984, *Textbook of Pain* embodies a unique combination of the theoretical and practical aspects of pain from basic scientific concepts to specific strategies of therapeutic management. *Textbook of Pain* serves as a comprehensive guide to current concepts of pain. It will appeal to the practicing clinician as well as the researcher.

### FEATURES

- A single volume reference that covers all aspects of the understanding and management of pain
- An outstanding editorial achievement. Provides succinct and readable coverage of this complex area of medicine
- User friendly. Includes a quick reference Index at the front of the book to help the reader to quickly access chapter headings and key words
- Contains new chapters on Neurotrophins, Cortex Imaging, Acute Medical/Intensive Care and Pain Measurement in Persons with Disabilities
