

# Paper Bodies: A Catalogue of Anatomical Fugitive Sheets, 1538–1687

ANDREA CARLINO

By their nature ephemeral, few copies survive of these unusual images with flaps under which are revealed the internal organs of both male and female bodies. In a lengthy, worldwide search, Andrea Carlino has discovered 62, all of which are listed and reproduced in this lavishly illustrated catalogue. In his Introduction, Carlino discusses the sixteenth and seventeenth-century popular market for which these prints were produced, the social, cultural and medical context in which they were created, as well as their uses and functions. This intriguing and original study will be of great interest to historians of medicine and of printing.

*Medical History*, Supplement No. 19  
368 pages, 187 black and white illustrations  
ISBN 0 854840 69 9  
£35 or US\$55 (inclusive of p&p)

# How the Idea of Profession Changed the Writing of Medical History

JOHN BURNHAM

"Burnham provides an erudite and insightful overview of the rise of the concept of the medical profession...what emerges is a tripartite dialogue of physicians, sociologists and historians... this lucid and pioneering contribution...does much to promote a more reflective and sophisticated approach to studies of professional expertise in the spheres of health and welfare."  
– Paul Weindling

"The book will create discussion and debate largely because it has elucidated the issues so cogently. It can be very strongly recommended to all medical historians and as a reading in graduate seminars." – William G Rothstein
