PRACTICAL MATHEMATICS

By CLEMENT V. DURELL, M.A.

This inexpensive volume presents in concise form those processes and principles of elementary mathematics which are an essential part of the equipment of all technical students and form the necessary foundation for more specialised work. The book is distinguished by all the characteristics which have given Mr. Durell's mathematical textbooks so high a reputation, and it has been specially planned to meet the needs of those who cannot afford the time to study detailed textbooks of Arithmetic, Algebra, Geometry, Trigonometry and Mechanics.

The book merits careful examination by all engaged in teaching mathematics to those who are preparing themselves for technical branches of the armed forces or other forms of national service, and by those responsible for the training of A.T.C. cadets, etc. There is an adequate supply of carefully graded examples; logarithmic and other tables are included; and answers are provided.

Ready shortly. 192 pages. Limp cloth. 3s. 3d.

The book will also be available in cloth boards, 3s. 6d. net.

STAGE 'A' TRIGONOMETRY

By CLEMENT V. DURELL, M.A.

A short and easy course of numerical trigonometry, including the general solution of triangles and circular measure. "May be recommended with confidence. . . . The examples are clearly and concisely worded. The printing and arrangement are both excellent."

MATHEMATICAL GAZETTE.

Eighth Edition. 1s. 9d. With tables, 2s.

G. BELL & SONS, LTD., PORTUGAL ST., W.C.2

POLISH UP YOUR MATHEMATICS

By R. C. FAWDRY, M.A., B.Sc.

To-day there are many who would like to revive their interest in mathematics, and many who find that the part it plays in modern warfare is so great that some knowledge of it is essential. Mr. Fawdry's new book aims at giving in readable form a general survey of the elementary parts which have a practical bearing in everyday life and which are within the grasp of anyone who takes any interest in the subject.

Historical illustrations add to the interest of the book by showing the improvement in methods which have been evolved in the course of time.

Ready immediately. Probable price, 5s. net.

A FIRST COURSE IN STATISTICS

By D. CARADOG JONES, M.A.

"An excellent 'first course' . . . the examples are well chosen . . . the work is clearly expressed." MATHEMATICAL GAZETTE.

"It is extremely lucid and interesting, and strikes me as an extremely good piece of work." A PROFESSOR OF COMMERCE.

"A very compact, clear and sufficiently complete account of the mathematical machinery employed in analysing raw statistical material and in deducing general statements regarding its characteristics." JOURNAL OF EDUCATION.

Seventh Edition. 16s. net. Part I, separately, 8s. net.
