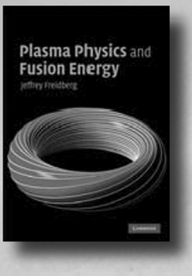
CAMBRIDGE

Classic Titles in Plasma Physics from Cambridge University Press

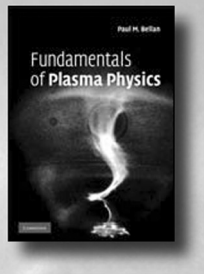
NEW in Paperback!

Plasma Physics and Fusion Energy
Jeffrey P. Freidberg
$80.00: Pb: 978-0-521-73317-5: 692 pp.



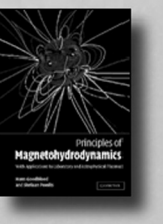
NEW in Paperback!

Fundamentals of Plasma Physics
Paul M. Bellan
$75.00: Pb: 978-0-521-52800-9: 630 pp.

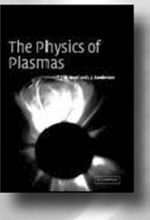


Reconnection of Magnetic Fields
Magnetohydrodynamics and Collisionless Theory and Observations
Edited by J. Birn and E. R. Priest
$153.00: Hb: 978-0-521-85420-7: 356 pp.

Principles of Magnetohydrodynamics
With Applications to Laboratory and Astrophysical Plasmas
J. P. Hans Goedbloed and Stefaan Poedts
$85.00: Pb: 978-0-521-62607-1: 630 pp.



Physics of Space Plasma Activity
Karl Schindler
$84.00: Hb: 978-0-521-85897-7: 522 pp.



The Physics of Plasmas
T. J. M. Boyd and J. J. Sanderson
$80.00: Pb: 978-0-521-45912-9: 544 pp.

Introduction to Plasma Physics
With Space and Laboratory Applications
D. A. Gurnett and A. Bhattacharjee
$80.00: Pb: 978-0-521-36730-1: 462 pp.

Principles of Plasma Diagnostics 2nd Edition!
I. H. Hutchinson
$168.00: Hb: 978-0-521-80389-2: 458 pp.

Prices subject to change.

Instructions for Authors

Editorial policy The journal welcomes submissions in any of the areas of plasma physics. Its scope includes experimental and theoretical work on basic plasma physics, the plasma physics of magnetic and inertial fusion, laser–plasma interactions, industrial plasmas, plasma devices and plasmas in space and astrophysics. This list is, of course, merely illustrative of the wide range of topics on which papers are invited, and is not intended to exclude any aspect of plasma physics that is not explicitly mentioned.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers. Manuscripts must be written in English. *Journal of Plasma Physics* employs a rigorous peer-review process whereby all submitted manuscripts are sent to recognized experts in their subjects for evaluation. The Editors' decision on the suitability of a manuscript for publication is final.

Submission of manuscripts Papers may be submitted to the Editor or any of the Associate Editors, preferably by email in pdf format. When a paper is accepted, the authors will be asked to supply source files in LaTeX or Word. Instructions for the preparation of these files and LaTeX style files are given in the Instructions for Contributors link at journals.cambridge.org/pla.

Incremental publishing and DOIs In order to make articles which have been accepted for publication in *Journal of Plasma Physics* available as quickly as possible, they are now published incrementally online (at Cambridge Journals Online; journals.cambridge.org) The online version is available as soon as author corrections have been completed and before the article appears in a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI – Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published on the web before they have appeared in a printed issue. See journals.cambridge.org/pla.

Proof reading Only typographical or factual errors may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints 50 offprints of each article will be supplied free to each first-named author. Extra offprints may be purchased from the publisher if ordered at proof stage. No page charge is made.

Copying This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of $16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/2009 $16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS

Volume 75 Part 2 April 2009

CONTENTS

Letters to the Editor

Linear superposition of nonlinear waves
SWADESH MAHAJAN and HIDEAKI MIURA 145

Drift wave excitation in a collisional dusty magnetoplasma with multi-ion species
P. K. SHUKLA and M. ROSENBERG 153

Research articles

The effect of magnetic topology on particle acceleration in a three-dimensional reconnecting current sheet: a test-particle approach
V. V. ZHARKOVA and O. V. AGAPITOV 159

Detailed analytical investigation of magnetic field line random walk in turbulent plasmas: II. Isotropic turbulence
I. KOURAKIS, R. C. TAUTZ and A. SHALCHI 183

Coupled Langmuir and nonlinear ion acoustic waves in the presence of non-thermal electrons
H. ALINEJAD, P. A. ROBINSON, O. SKJAERAASEN and I. H. CAIRNS 193

Alfvén eigenmodes in magnetic X-point configurations with strong longitudinal fields
N. BEN AYED, K. G. McCLEMENTS and A. THYAGARAJA 203

Linear and nonlinear properties of an obliquely propagating dust magnetosonic wave
W. MASOOD, H. A. SHAH, A. MUSHTAQ and M. SALIMULLAH 217

Laser-to-proton energy transfer efficiency in laser–plasma interactions
E. FOURKAL, I. VELTCHEV and C.-M. MA 235

Nonlinear saturation of the Weibel instability in a dense Fermi plasma
F. HAAS, P. K. SHUKLA and B. ELIASSON 251

Large-amplitude electrostatic solitary structures in dusty plasmas with vortex-like variable charge dust distribution and non-isothermal trapped electrons
MOULOUD TRIBECHE 259

Minimum dissipative relaxed states applied to laboratory and space plasmas
B. DASGUPTA, DASTGEER SHAIKH, Q. HU and G.P. ZANK 273
