Subscription rates

Subscription rates (post free) for the 1979 volume of the *Advances* are as follows:

Subscribers in North, Central and South America, and Australia:

U.S. $67.50, $A. 60.75, £39.00 for libraries and institutions;
U.S. $22.50, $A. 20.05, £13.00 for individuals belonging to a recognised scientific society.

All other subscribers:

£30.00 for libraries and institutions;
£10.00 for individuals belonging to a recognised scientific society.

All enquiries about the *Advances*, as well as other subscriptions, should be sent to the Executive Editor, Miss M. Hitchcock, Department of Probability and Statistics, The University, Sheffield S3 7RH, England. The price of back numbers varies from volume to volume, and enquiries should be sent to the Executive Editor. Cheques, money orders, etc., should be made out to *Applied Probability*; cheques on U.S., U.K. and Australian banks will be acceptable.

Notes for Contributors

Submission of papers. It is a condition of publication in the *Advances in Applied Probability* that papers shall not previously have appeared elsewhere, and will not be reprinted without the written permission of the Trust. The copyright of all published papers shall be vested in the Trust. It is the general policy of the *Advances* not to accept for publication papers which cannot appear in print within 15 months of their date of submission. Authors will receive 50 reprints of their papers free, and joint authors a proportional share of this number. Additional reprints will be provided at cost.

Manuscripts should be written in English or French; manuscripts in other languages may be accepted by the Editors, but will appear (subject to the author's agreement) in English or French translation in the *Advances*. Authors are requested to comply with the following instructions in submitting their papers:

Authors in Britain, Europe, North and South America should send *three copies* of their submissions to the Applied Probability Office in Sheffield.

Authors in Australasia and the Far East should send *three copies* of their submissions to the Editor-in-Chief, Dr. J. Gani, in Canberra.

The Editor-in-Chief and the Applied Probability Office are in direct contact by Telex, and full details of the papers submitted either in Sheffield or Canberra are available in both centres.

Alternatively, authors may submit papers to any of the Editors listed on the inside front cover. In this case, *two copies* of the submission should be sent to the Editor concerned, and *one copy*, with a copy of the covering letter, should be sent to the Applied Probability Office in Sheffield.

Journal conventions. It will be of help to the Editors if the following conventions are adopted:

a) The manuscript should be typewritten, using double spacing, on one side of the paper only.

b) Each paper submitted should be accompanied by

(i) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results;

(ii) a list of keywords detailing the contents for the purpose of computerised information retrieval.

c) References should be indicated in the text by the name of the author(s) and the date, thus: Feller (1961), and the full references listed at the end of the article in alphabetical order. Journal references should include the title of the article cited, the title of the journal (abbreviated in the style of the *International Journal of Abstracts: Statistical Theory and Method*) the volume, and inclusive page numbers. Book references should give the full title, the publisher, and the place of publication. For example:

Feller, W. (1961) A simple proof of renewal theorems. *Comm. Pure Appl. Math.* **14,** 285–293.

Robinson, E. A. (1959) *An Introduction to Infinitely Many Variates.* Griffin, London.

d) Type faces should be carefully distinguished on the manuscript using the following standard methods of marking:

Italics capitals (*T, I, R*) and lower case letters (*t, i, r*)should be underlined once, e.g. T, I, R, t, i, r.

Bold-face capitals (***T, I, R***) and lower case letters (***t, i, r***) should have a curly underline, e.g. T, I, R, t, i, r. Greek characters (α, β, θ) and script letters ($\mathcal{J}, \mathcal{I}, \mathcal{R}$) should be carefully drawn and identified when first used by a marginal note of the form 'α—lower case Greek alpha' or '$\mathcal{R}$—script R'.

e) Indices and subscripts should be clearly distinguished, using the marking $\widehat{4}$, $\overset{4}{\vee}$ where necessary.

Authors will receive only first proofs for correction; charges will be made for excessive alteration to these.

PRINTED IN NORTHERN IRELAND AT THE UNIVERSITIES PRESS (BELFAST) LTD.
