

Index

The following index refers only to the part of these proceedings that contains review articles.

Index

- β Lyr, 22
 ω Cen, 52, 71, 344
47 Tuc, 69, 168, 344
- Abell 2256, 228, 229
Abell 370, 232, 332
Abell 665, 272, 273
- abundance gradients, 53, 54, 57,
58, 77, 109, 112–114, 142,
145, 148, 188, 241, 248,
253, 260–262, 303
- abundance–velocity–dispersion re-
lation, 103, 109, 115, 255,
257, 265, 283, 284, 286,
329, 332, 333, 335
- AGB stars, 169, 171, 172, 174, 176,
183, 241
- age–metallicity degeneracy, 170, 173,
251, 252, 278, 333
- age–metallicity relation, 109, 112,
113, 115, 137, 144, 186,
187, 341
- age–velocity–dispersion relation, 110–
112, 115, 136, 341
- Alpher, 17
- And I, 168, 169
- And II, 168, 169
- And III, 168
- angular momentum, 135
- anisotropic models, 217
- anisotropic velocity distribution, 218
- Arp 2, 58, 71
- asymmetric drift, 102
- Atkinson, 12
- Baade, ix, xi, xv, 17, 18, 21–31,
39, 40, 45, 46, 51–53, 63,
75, 85, 154, 165–174, 179,
239, 275, 325, 337, 339,
346
- Baade sheet, 166, 179
- Baade’s Window, 24, 29, 48, 106,
141, 326, 336
- bar instability, 143
- baryon fraction, 233, 235
- Bethe, 14, 15, 16, 17, 25
- binaries, 68, 70, 72–74, 76, 138,
139, 148, 185, 248, 267
- Blaauw, x, 44, 167, 301, 344
- black holes in galactic nuclei, 215–
218
- blue stragglers, 60, 70, 72, 121, 123,
254
- Bottlinger, 346
- Bottlinger diagram, 36
- brown dwarfs, 71, 199
- bulge formation, 142, 143, 267
- Butcher–Oemler effect, 300, 302,
304, 305, 307, 308, 310
- Carbon stars, 31, 34, 43, 52, 169,
174, 176, 183
- Carina dwarf, 60, 62, 177, 350
- Centaurus A, 219
- Cepheids, 24, 52, 73, 94, 153, 156,
158, 178, 183, 184, 189,
192
- Chandrasekhar, 13, 14, 15, 17, 42
- Chalonge, iv
- chemical evolution, 57, 99, 115, 133–
149, 160, 174, 200, 334,
342, 343
- Cl 0024+1654, 230

- closure density, 233, 235
- clusters
 - arclets, 231, 232
 - X-rays, 227, 228
- COBE, 143, 273
- Coma cluster, 88, 270, 272, 273, 282–285, 329, 332, 336
- cooling flows, 88, 89, 229, 230, 232, 235
- CS22873-139, 76
- dark matter
 - a stellar population?, 199, 212
 - clusters, 227–235
 - Cold Dark Matter theory, 134
 - elliptical galaxies, 218–221
 - Galaxy, 195–203, 339
 - shape of halos, 212, 221
 - spiral galaxies, 205–214
- Darwin, 3
- DDO 210, 178
- DDO photometry, 198
- disk galaxies
 - evolution, 302–306
- disk heating, 111, 136, 211
- Disk Population, 41, 44–46
- distance indicators, 154, 255, 269, 281, 282, 285, 286
- Draco dwarf, 166, 176, 177
- Eddington, 5, 6, 8, 9, 12, 17
- Eggen, Lynden-Bell and Sandage model, 47, 57, 99, 100, 103, 105, 135, 141
- Einstein, 227, 230
- Einstein radius, 201
- elliptical galaxies
 - ages, 165, 167, 169, 240, 249–257, 270, 283, 332–333, 353
 - colors, 281
 - evolution, 306–308
 - stellar populations, 249–257, 275, 280–287, 328–332
 - UV upturn, 248, 327, 336
- epicyclic frequency, 211
- exponential disk, 211
- exponential scalelength, 199, 211
- Fornax cluster, 88, 89, 220, 282
- Fornax dwarf, xii, 25, 27, 106, 155, 162, 177, 188
- fundamental plane, 218, 255, 269–274, 285, 328–333, 335, 354
- G-dwarf problem, 115, 137, 339, 340
- Galactic bulge, 103, 135, 140–143, 200, 325–327
- Galactic center, 45
- galactic evolution, 43, 47, 99, 100, 103, 297, 301–319, 342
- Galactic fountain, 131
- Galactic orbits, 37, 110
- galaxy counts, 292, 293, 311–319
- galaxy formation, 99, 115, 133–149, 155, 221, 308, 323
- galaxy morphology, xi, 136, 143, 297, 319
