

Clay Minerals

VOLUME 8 • NUMBER 2 • DECEMBER 1969

CONTENTS

J. J. FRIPIAT, M. PENNEQUIN, G. PONCELET and P. CLOOS. Influence of the Van der Waals force on the infrared spectra of short aliphatic alkylammonium cations held on montmorillonite	119
T. W. PARKER. A classification of kaolinites by infrared spectroscopy	135
R. PROST and J. CHAUSSIDON. The infrared spectrum of water adsorbed on hectorite	143
K. J. D. MACKENZIE. A Mossbauer study of the role of iron impurities in the high temperature reactions of kaolinite minerals	151
BIBHUTIMUKHERJEE, M. G. RAO and C. KARUNAKARAN. Genesis of kaolin deposits of Birbhum, West Bengal, India	161
J. A. BAIN and D. J. MORGAN. The role of thermal analysis in the evaluation of impure clay deposits as mineral raw materials	171
C. E. DAVIS and D. A. HOLDRIDGE. Quantitative estimation of clay minerals by d.t.a.	193
RICHARD BERRY and PER JORGENSEN. Separation of illite and chlorite in clays by electromagnetic techniques	201
W. L. GERMAN and D. A. HARDING. The adsorption of aliphatic alcohols by montmorillonite and kaolinite	213
Notes	
A. R. FRASER and J. D. RUSSELL. A spectrophotometric method for determination of cation-exchange capacity of clay minerals	229
R. VANDERSTUKKEN and P. ROBIJN. The generator bricks of a glass furnace studied by infrared spectroscopy	231
E. G. KUKOVSKY. Alteration processes in clay minerals	234
Book Reviews	239
